Inteplast Linear Low Density PE can liners are designed without gussets. The bottom of the bag is center-folded and sealed, creating the star bottom seal. This seal eliminates gaps, helps avoid leaks, and is great for equal weight distribution. The leak-resistant bag holds wet contents better than bottom flat seal, gusseted seal or tomato seal can liners. Unlike flat-packed liners, IBS coreless rolls pack neatly and easily into our white clamshell boxes, with no mess if the box is dropped or spilled.
