# Cost Proposal

Description	Direct labor hours per task	Amount
Discovery	All-inclusive and as needed	\$7,362
Design	All-inclusive and as needed	\$20,724
Development	All-inclusive and as needed	\$27,940
Delivery	All-inclusive and as needed	\$2,082
Unlimited training through the warranty period		Included
90-day post deployment warranty		Included
AudioEye license for year one		Included
All premium plugin licenses for year one		Included
<b>Total Cost - Fixed Firm</b>		<b>\$58,108</b>

Post launch services (Optional)	Amount
Maintenance & support packages for year one	
Package A.	\$7,800
Package B.	\$14,500
Cloud hosting services for year one	\$2,820
AudioEye and premium plugin licenses from year two	Actual

**\*AudioEye:** AudioEye License fees are based on our negotiated contract. The yearly licensing fee is based on total yearly website pageviews. The fee listed above is for sites having no more than 1.2 million page views / year. 1.2 million to 1.8 million page views are: \$1,080/year.

Our proposal includes the cost of all premium plugins for year 1 and the initial SSL certificate. Some premium plugins may have an annual license fee after year 1. Neumeric will renew those license fees at their actual cost upon request.

The actual AWS hosting charges for the production and staging environments will be invoiced monthly. A copy of the actual AWS invoices will be provided. AWS hosting charges are determined by the number of instances, security, support applications, capacity, bandwidth, storage, and redundancy requirements.

### Special Notes:

If Neumeric provides the yearly post deployment & warranty maintenance & support services - we do NOT add any fees to the AWS hosting and monitoring charges. Monitoring the hosting instances and working with the AWS support team is included within our M&S package.

If M&S services are not provided by Neumeric we will manage the hosting and monitoring service at the actual AWS fees plus 18% service fee.
