#### **A. BROADENED WHO IS AN INSURED**

Paragraph **A.1. Who Is an Insured** of **SECTION II — LIABILITY COVERAGE** is amended to include the following:

- d. Any "employee" of yours is an "insured" while using a covered "auto" you don't own, hire or borrow in your business or your personal affairs.
- e. Any "employee" of yours is an "insured" while using an "auto" hired or rented under a contract or agreement in that "employee's" name, with your permission, while performing duties related to the conduct of your business.
- f. Each person or Organization to whom you are required by a written contract or agreement to provide additional insured status is an "insured" under Liability Coverage, but only to the extent that person or organization qualifies as an "insured" under the Who is an Insured Provision contained in Section II of the coverage form. The written contract or agreement must be in effect during the policy period shown in the Declarations and must have been executed prior to the "bodily injury" or "property damage."

#### **B. LIABILITY COVERAGE EXTENSIONS SUPPLEMENTARY PAYMENTS**

Paragraphs **A.2.a. (2)** and **A.2.a. (4) Coverage Extensions — Supplementary Payments** of **SECTION II — LIABILITY COVERAGE** are deleted and replaced with the following:

- (2) Up to \$5,000 for the cost of bail bonds (including bonds for related traffic law violations) required because of an "accident" we cover. We do not have to furnish these bonds.

- (4) All reasonable expenses incurred by the "insured" at our request, including actual loss of earnings up to \$500 a day because of time off from work.

#### **C. FELLOW EMPLOYEE COVERAGE**

Paragraph **B.5. Fellow Employee** Exclusion contained in **SECTION II — LIABILITY COVERAGE** does not apply if the "bodily injury" results from the use of a covered "auto" you own or hire that is not a bus, motorcycle or van used to transport employees.

This Fellow Employee Coverage is excess over any other collectible insurance.

#### **D. POLLUTION LIABILITY — BROADENED COVERAGE FOR COVERED AUTOS**

##### **1. Liability Coverage** is changed as follows:

- a. Paragraph **B.11.a.** of the **Pollution** Exclusion in **SECTION II — LIABILITY COVERAGE** applies only to liability assumed under a contract or agreement.
- b. With respect to the coverage afforded by Paragraph **1.a.** Above, Exclusion **B.6. Care, Custody or Control** of **SECTION II — LIABILITY** does not apply.

##### **2. Changes in Definitions**

For the purposes of this endorsement, Paragraph **D.** of **SECTION V — DEFINITIONS** is replaced by the following:

- D. "Covered pollution cost or expense"** means any cost or expense arising out of:
  - 1. Any request, demand, order or statutory or regulatory requirement that any "insured" or others test for, monitor, clean up, remove, contain, treat, detoxify or neutralize, or in any way respond to, or assess the effects of "pollutants"; or

2. Any claim or "suit" by or on behalf of a governmental authority for damages because of testing for, monitoring, cleaning up, removing, containing, treating, detoxifying or neutralizing, or in any way responding to or assessing the effects of "pollutants".

"Covered pollution cost or expense" does not include any cost or expense arising out of the actual, alleged or threatened discharge, dispersal, seepage, migration, release or escape of "pollutants".

- a. Before the "pollutants" or any property in which the "pollutants" are contained are moved from the place where they are accepted by the "insured" for movement into or onto the covered "auto"; or
- b. After the "pollutants" or any property in which the "pollutants" are contained are moved from the covered "auto" to the place where they are finally delivered, disposed of or abandoned by the "insured".

Paragraphs a. and b. above do not apply to "accidents" that occur away from premises owned by or rented to an "insured" with respect to "pollutants" not in or upon a covered "auto" if:

- (1) The "pollutants" or any property in which the "pollutants" are contained are upset, overturned or damaged as a result of the maintenance or use of a covered "auto"; and
- (2) The discharge, dispersal, seepage, migration, release or escape of the "pollutants" is caused directly by such upset, overturn or damage.

This Pollution Liability Coverage is subject to an Annual Aggregate Limit of Liability of \$100,000.

#### **E. NEWLY ACQUIRED OR FORMED ORGANIZATIONS**

Throughout this policy, the words you and your also refer to any organization you newly acquire or form, other than a partnership, joint venture or limited liability company, and over which you maintain ownership or majority interest, but only if there is no similar insurance available to that organization.

  - (3). \$1,500.
- b. An adjustment for depreciation and physical condition will be made in determining actual cash value at the time of the "loss".
- c. If a repair or replacement results in better than like kind or quality, we will not pay for the amount of betterment.

#### 4. Deductible

No deductible applies to this coverage.

- (1) Are your property or that of a family member, and
- (2) Are in a covered "auto" at the time of "loss".
  - (a). The most we will pay for "loss" is \$200. No Physical Damage Coverage deductible applies to this coverage.

This extension provides coverage only to a covered "auto".

#### **L. PHYSICAL DAMAGE DEDUCTIBLE — SINGLE DEDUCTIBLE AND GLASS REPAIR**

Paragraph D. Deductible in **SECTION III — PHYSICAL DAMAGE COVERAGE** is deleted and replaced by the following:

##### **D. Deductible**

For each covered "auto," our obligation to pay for, repair, return or replace damaged or stolen property will be reduced by the applicable deductible shown in the Declarations. Any Comprehensive Coverage deductible shown in the Declarations does not apply to "loss" caused by fire or lightning.

When two or more covered "autos" sustain "loss" in the same occurrence, the total of all the "loss" for all the involved covered "autos" will be reduced by a single deductible, which will be the largest of all the deductibles applying to all such covered "autos."

No deductible applies to glass damage if the glass is repaired rather than replaced.

#### **M. PERSONAL EFFECTS COVERAGE**

- 1. If you purchase Comprehensive Coverage on this policy for a stolen owned "auto", we will pay up to \$600 for "personal effects" stolen with the "auto".

- 2. "Personal effects" as used in this extension means tangible property that is worn or carried by the "insured". "Personal effects" does not include tools, jewelry, money, securities, radar or laser detectors, or tapes, records, discs or similar audio, visual or data electronic equipment.

#### **P. HIRED AUTO PHYSICAL DAMAGE**

If hired "autos" are covered "autos" for Liability Coverage and if Physical Damage Coverage of Comprehensive, Specified Causes of Loss, or Collision are provided under this Coverage Form for any "auto" you own, then the Physical Damage Coverage's provided are extended to "autos" you hire of like kind and use subject to the following limit:

The most we will pay for any one loss is the lesser of the following:

- 1. \$50,000 per accident,

2. Actual Cash Value, or

3. The cost of repair.

The deductible will be equal to the largest deductible applicable to any owned "auto" for that coverage. No deductible applies to "loss" caused by fire or lightning. This Hired Auto Physical Damage coverage is excess over any other collectible insurance. Paragraph **B.2. Concealment, Misrepresentation Or Fraud** in **SECTION IV — BUSINESS AUTO CONDITIONS** is amended by adding the following:

Any unintentional failure to disclose all exposures or hazards existing as of the effective date of the Business Auto Coverage Form or at any time during the policy period will not invalidate or adversely affect the coverage for such exposure or hazard. ### TO ANSWER VENDOR QUESTIONS AND CLARIFICATION OF LOCATIONS

#### Vendor Questions:

1. Should the cost of mulching two times per year for all landscaped beds be included in our unit pricing for smooth cut mowing or will all mulch pricing be captured in the sq. yd incidental unit pricing?

**Answer:** The unit pricing for 'ADDITIONAL SMOOTH CUT' shall not include any mulching.

2. The spec for curb edging does not give a frequency for the service. Will we be required to edge every mowing cycle? Please clarify the number of times we are required to edge all curbs.

**Answer:** Part III: Every smooth cut cycle shall include chemical application (non-selective herbicide), edging, grass cutting (mowing), green debris removal, string trimming, sweeping/blowing and trash removal (see PART II, DEFINITIONS).

3. Kawanee Ave Pedestrian Bridge – What level of service is to be expected on the pedestrian bridge? Are we to maintain the ROW on either side of the bridge on Kawanee?

**Answer:** Yes, maintenance of the ROW area on each side of the pedestrian bridge.

4. Teuton St Pedestrian Bridge – What level of service is to be expected on the pedestrian bridge?

**Answer:** Yes, maintenance of the ROW area on each side of the pedestrian bridge.

5. Manhattan Blvd (8<sup>th</sup> St ROW) Can you please clarify the ROW to be maintained and the location of the lot?

**Answer:** 50' wide ROW area to be maintained from Manhattan Blvd to the wooded area headed west.

6. Attachment C Flat Rough Canal – Does this include both sides of the canal next to Jefferson lot and Monticello Ave? Do we stop cutting at Earhart Expy or continue north to the RxR tracks?

**Answer:** The word 'CANAL' is misaligned on Attachment C. The location description should read: Vacant Property between 121 Jefferson Hwy and 17<sup>th</sup> St Canal. Property spans from Jefferson Hwy to Elevated Earhart Expy. Cutting will stop at the elevated Earhart Expy, not the railroad tracks.

7. Must the rough mowing and roadside slope mowing be maintained at the current spec as stated of 1 ½ " to 2" in height as compared to the smooth mowing that follows the same specs.

**Answer:** The rough mowing and roadside slope mowing may be maintained to a finished cut height between 2" and 3".

**Clarifications:**

1. For clarification, the Earhart Expy drainage ponds (Attachment A) shall be mowed to the water's edge.

For clarification, the property boundaries for the Hopehaven Property (Attachment B) shall be the Shaw High School fence line on the west side, the Shaw High School driveway on the north side, Barataria Blvd on the east side and Wichers Dr (extended to the Shaw Highschool fence line) on the south side. Within this boundary, the land around the most southern building (approximately 1 acre) will be cut by others and is not included in this contract.
3. Attachment F: There is a misspelled street name. MacArthus Ave should be MacArthur Ave.

### **LIQUIDATED DAMAGES**

Liquidated damages may be assessed for missed and/or unsatisfactory work. Liquidated damages may be assessed as outlined below:

#### **Unapproved Schedule Changes**

Scheduling of work is an important part of this contract. Parkways Department personnel will rely on the Contractor's work schedule in order to efficiently check on the quality of work and to schedule in-house tasks in the same vicinities as the mowing operations (see SCHEDULE). Liquidated damages of two hundred fifty dollars and zero cents (\$250.00) per calendar day may be assessed for any unapproved schedule changes and/or missed assignments. Agreed upon weather delays shall not warrant liquidated damages.

#### **Incomplete Work**

Scheduling of work is an important part of this contract. The Contractor will be required to present a monthly schedule of his proposed operations, including all work locations, to the Parkways Department for approval. Once the schedule is approved, the Contractor must abide by this schedule of work. In the event that the schedule must be altered, it shall be the Contractor's responsibility to have any changes approved by the Parkways Department.

Jefferson Parish personnel will perform daily inspections of mowing operations in accordance with the Contractor's work schedule. In the event that a scheduled location should be incomplete, when it is inspected by the Parkways Department, liquidated damages of two hundred fifty dollars and zero cents (\$250.00) per calendar day may be assessed.

#### **Failure to Remove Debris / Trash**

In the event that any debris or trash is left at any location overnight, liquidated damages of one hundred dollars and zero cents (\$100.00) may be assessed per location, per night. This debris may include, but not be limited to, trash bags, green debris, trash and/or equipment.

## BID SPECIFICATIONS FOR BID # 50-00132843

If the Parkways Department notices the Contractor utilizing a right-of-way trash receptacle(s) as part of his required trash removal, liquidated damages of one hundred dollars and zero cents (\$100.00) may be assessed per location.

### Unsatisfactory Work / Failure to Make Corrections

Jefferson Parish personnel will perform daily inspections of mowing operations to ensure that the Contractor is abiding by the maintenance specifications and providing quality work. In the event that a location, or portion of a location, contains unacceptable work, the Contractor will be notified in writing by the Parkways Department and shall have twenty four (24) hours after the written notice to complete the work in accordance with the contract's specifications. Jefferson Parish personnel will re-inspect the area(s) twenty four (24) hours after notice is given. If the work is still unacceptable, liquidated damages of two hundred fifty dollars and zero cents (\$250.00) may be assessed, per location.

Typical work descriptions include center median, right-of-way, cul-de-sac and lot.

The Contractor shall note the following guidelines related to grass cutting operations:

- When right-of-way maintenance is specified, the Contractor shall include all parish and/or private servitudes within the roadway right-of-way, including, but not limited to, drainage structures and canals, gas line rights-of-way and electrical service rights-of-way.

#### **BID PRICING**

Bid pricing shall be provided as a per cycle unit price for each type of mowing cycle (see SMOOTH CUT, FLATS CUT and ROADSIDE CUT).

#### **CYCLE**

A cycle shall refer to all tasks associated with a complete grass cutting operation (see SMOOTH CUT, FLATS CUT and ROADSIDE CUT). This contract specifies a minimum number of cycles per year, per type of cut. The number of cycles may be increased at the discretion of the Jefferson Parish Parkways Department. Any cycles in excess of the specified minimum number of cycles, per type of cut, will be paid based on the unit price provided by the Contractor on his bid form.

The contract's pricing shall be bid at a per cycle price for each type of grass cutting (see PART III, MAINTENANCE AND FREQUENCIES). The specified number of cycles for each type of cut is the minimum amount of cycles to be performed per each twelve (12) month period. At the discretion of the Parkways Department, additional cycles may be added to one or more types of grass cutting. Additional cycles shall be compensated based on the unit price per cycle provided on the bid form.

#### **CHEMICAL APPLICATIONS (EQUIPMENT)**

The Contractor shall determine the type, and quantity, of equipment required for chemical applications. Equipment may include, but not be limited to, backpack pump sprayers, street legal UTV's, trucks and/or trailers.

Tank size(s) shall be determined by the Contractor. However, the tank(s) used for this contract must only be used for this contract. In an effort to combat cross-contamination, when not in use by the Contractor, a minimum of the tank(s), hose(s) and sprayer(s) shall be stored at a Jefferson Parish Parkways Department facility.

#### **CHEMICAL APPLICATIONS (PRE-EMERGENT HERBICIDES)**

With approval from the Parkways Department, the Contractor may apply pre-emergent herbicides (Pendulum, Barricade, Esplanade or approved equal) to assist in weed control. Pre-emergent herbicide application is not a requirement of this contract, but the Contractor may apply pre-emergent herbicide up to two (2) times per year in accordance with the manufacturer's label.

Pre-emergent herbicide applications may take place along gutter bottoms, roadway joints and large hardscape areas. Pre-emergent herbicides shall not be applied in turf areas, landscape beds or under tree rings. Unauthorized pre-emergent application may result in termination of the contract.

All pre-emergent herbicide applications taking place along curbs, gutters and other hardscape areas can be applied with a higher pressure adjustable gun such as a JD-9 with a wand. The Contractor will be responsible for limiting chemical drift and is advised not to spray while winds are in excess of 5 miles per hour. The Contractor shall be responsible to any damage resulting from his spraying operations.

All chemical applications shall be performed by, or under the direct supervision of, a licensed professional.

#### **CHEMICAL APPLICATIONS (NON-SELECTIVE HERBICIDES)**

Chemical applications shall be applied on an as needed basis so that no weeds are visible within tree rings, landscape beds or within hardscape areas such as curbs, gutters, sidewalks and roadways. Chemical applications will typically consist of non-selective herbicide spraying (RoundUp or approved

## BID SPECIFICATIONS FOR BID # 50-00132843

equal) applied in accordance with the manufacturer's label (specifications). Spraying shall take place within the required mowing areas as well as all hardscape areas adjacent to the designated cutting areas. This includes all curbs, gutters, concrete traffic devices, drainage structures and sidewalks. Curb and gutter spraying shall extend a minimum of 18" into the roadway beyond the curb.

Weeds shall be sprayed as soon as they are discovered during each mowing cycle. In the event that weeds reach a height of 4" or greater, the Contractor shall be required to spray them and then return forty eight (48) hours later and physically remove them.

All non-selective herbicide applications within turf and/or landscape areas (including tree rings) must be made utilizing a low/medium pressure wand with an adjustable patterned nozzle. All non-selective herbicide applications taking place along curbs, gutters and other hardscape areas can be applied with a higher pressure adjustable gun such as a JD-9. The Contractor will be responsible for limiting chemical drift and is advised not to spray while winds are in excess of 5 miles per hour. The Contractor shall be responsible to any damage resulting from his spraying operations.

Under certain circumstances, and with approval from the Parkways Department, the Contractor may utilize RoundUp QuickPRO (or approved equal) for weed control. RoundUp QuickPRO would be approved in situations where weather may have interfered with normal non-selective herbicide applications and weed growth is excessive. RoundUp QuickPRO cannot be used under the drip line of trees. The Contractor may not mix his own equivalent to RoundUp QuickPRO. All applications shall abide by the manufacturer's label.

With approval from the Parkways Department, the Contractor may apply an aquatic non-selective herbicide such as RoundUp Custom (or approved equal) in and around ditch areas to assist in roadside ditch and slope cutting operations. The Contractor shall be responsible for obtaining the proper licensure and following all regulations related to aquatic spraying. Aquatic spraying is not mandatory for this contract and will not exclude unlicensed aquatic application Contractors from bidding. However, only Contractors licensed for aquatic spraying will be allowed to apply aquatic herbicide products. All applications shall abide by the manufacturer's label.

All chemical applications shall be performed by, or under the direct supervision of, a licensed professional.

### **COOPERATION**

It is possible that other Jefferson Parish employees and/or contractors may be working within close proximity to grass cutting locations. The Contractor shall coordinate his work with any other work taking place in the vicinity of his grass cutting locations in relation to scheduling and limits of work. Should a conflict occur, a Jefferson Parish Representative will make the final decision as to each contractor's limit of work.

### **DAMAGE TO FACILITIES**

The Contractor shall take exceptional precaution when performing cutting operations near utility and drainage structures in order to eliminate the possibility of damage. The slope cutting areas covered under these specifications include numerous obstructions such as CMP (Corrugated Metal Pipe), RCP (Reinforced Concrete Pipe), PVC (Polyvinyl Chloride Pipe) and other types of drainage outfall culverts and structures. In the event that damage occurs to any utility facility, the Contractor shall immediately notify a Jefferson Parish representative. In addition, the Contractor shall note in the comments section of the daily maintenance report the time, location, person notified, type of damage and circumstances of the damage. All costs associated with the repair and/or replacement of the damaged structure shall be borne by the Contractor. The Contractor shall take exceptional precaution when performing cutting operations near these structures in order to eliminate the possibility of damage.

The Contractor must have in place prior to work, a method of recording, responding and repairing legitimately broken glass, windshields or any other kind of damage experienced due to the work being performed. Jefferson Parish will direct any damage claims directly to the Contractor for investigation and remediation.

## BID SPECIFICATIONS FOR BID # 50-00132843

### **EDGING**

Edging shall be accomplished utilizing mechanical stick edgers with steel blades. Edging shall occur along concrete curbs, sidewalks and other areas where hardscape meets turf. Discs, herbicides and/or string trimmers may not be used to control grass growth where grass and a paved surface meet. At the completion of edging, no grass should be visible over a hard surface. Edging equipment shall be such that a clean, sharp line along the hard surface/grass interface shall remain upon completion of edging. A minimum depth of 1" (one inch) shall remain along and below the top of hard surface paving upon completion of edging in order to slow the continued growth of the grass. All dirt and grass clippings shall then be blown off of the curb and swept (see SWEEPING/BLOWING).

### **EQUIPMENT REQUIREMENTS**

The bid shall include all equipment, operators, fuel, maintenance and transportation. All equipment shall be in a good state of operation and shall be maintained to work and perform the tasks it was designed for in an expedient time frame. Continual breakdown, repairs or work stoppage due to equipment failure will not be permitted and may be subject to liquidated damages (see LIQUIDATED DAMAGES). There will be a minimum equipment list provided by Jefferson Parish as Attachment "E", designated specifically for this contract. The Contractor must provide Jefferson Parish with copies of registration certificates and/or lease agreements or documentation verifying an open line of credit for equipment specified in the minimum equipment list (see ATTACHMENT "E").

All street legal vehicles used for this contract shall include the Contractor's company name and/or logo clearly displayed. All field employees shall wear high visibility clothing that clearly displays the company name and/or logo.

### **EQUIPMENT STORAGE**

Parking of grass cutting equipment and associated trucks and/or service vehicles during non-working hours (except during the mid-day meal period) shall take place at Parish designated and approved areas only. It is the intent of this section to eliminate the parking and storage of equipment near public rights-of-way, buildings and private facilities. The Parish will make areas available for parking equipment after working hours, weekends and holidays in relatively close proximity to the work areas. In the event that the Contractor does not wish to utilize the areas provided by the Parish, the Contractor must move and store equipment as directed by the Parish representative. Regardless of the areas designated by the Parish and used by the Contractor, the Parish assumes no liability for the contractor's equipment. Any losses due to occurrences, such as theft, malicious damage, breakage, fire or general loss, will be assumed by the Contractor.

The Jefferson Parish Parkways Department shall provide the Contractor with (24) hour access to each of its equipment yards. The east bank yard is located at 200 Shrewsbury Road, Jefferson, Louisiana 70121. The west bank yard is located at 1901 Ames Boulevard, Marrero, Louisiana 70072. The Contractor will be allowed to store equipment, dump debris from the street sweeper and perform minor wash-down of equipment. Additionally, the Contractor shall be allowed to utilize the hose spigots located within the yards to fill up spray and street sweeper tanks. The Contractor must provide and utilize his own hose. The Contractor shall not be allowed to rinse or clean any chemical tanks on Jefferson Parish property.

### **GRASS CUTTING (MOWING)**

Grass cutting shall be accomplished using mechanical mowers in order to leave a smooth, level, cut on the grass following the existing grade. No gouging, scalping or similar actions shall be permitted. All trash and debris must be removed prior to grass cutting. It is the Contractor's responsibility to determine the condition of the site and work around any obstacles. Jefferson Parish shall not be responsible for any debris or hazards that may be encountered during mowing operations. The Contractor shall mow around any hazards and then alert a Parkways Department representative.

The Contractor shall determine the size and style of machine to be used. Different types of machines may be required based on the type and size of each area to be cut. Additionally, the Contractor shall use his judgement on the stability of the ground when mowing. The Contractor shall not be allowed to leave

## BID SPECIFICATIONS FOR BID # 50-00132843

ruts within wet areas. Any ruts or holes caused by mowing operations within wet areas shall be repaired by the Contractor.

This contract will require the Contractor to mow in close proximity to existing drainage canals and shall include mowing up to the point of transition of the canal slope. It shall be acceptable for the Contractor to use a mechanical weed eater to maintain this transition area. It shall also be permissible for the Contractor to use a tractor (75 hp or less) and an implement to mow this area.

### **GREEN DEBRIS REMOVAL**

Any waste such as grass clippings, branches, dirt or any other organic rubbish located at any area to be maintained will be considered green debris. Green debris may be existing to a location, or be generated by the Contractor's operations. Green debris, as described, shall be removed by the Contractor during each maintenance cycle as a part of the grass cutting performance. Any green debris left at a project site once the Contractor completes his operations, without notifying the Parkways Department, may be subject to liquidated damages (see LIQUIDATED DAMAGES). Green debris removal is inclusive to each grass cutting bid item.

Green debris, not generated by the Contractor, considered too large to remove by hand or which requires specialized equipment to remove shall be reported to the Parkways Department for removal.

### **INSPECTIONS**

Using the daily maintenance reports and spray logs submitted by the Contractor, inspections of areas of work performed shall be made by Jefferson Parish personnel to determine the acceptance of the work performed. In the event the work is considered unacceptable, the contractor will be directed to immediately employ any and all methods or means to bring the area up to an acceptable level within twenty-four hours (24) of notice, without any extra cost to Jefferson Parish (see LIQUIDATED DAMAGES).

The Contractor shall be required accompany a Parkways Department representative two (2) days per month to inspect various sites to discuss the quality of work. One inspection shall be on the Westbank and one inspection shall be on the Eastbank. Each inspection shall take no more than four (4) hours. Site quantities and locations may vary for each inspection. The schedule and frequency of these inspections shall be agreed upon each month by the Contractor and the Parkways Department.

### **MAINTENANCE REPORTS**

**Contractor shall complete a daily maintenance report for each day work is performed.** Reports shall be e-mailed daily, no later than 10:00 a.m. next business day to the Parkways Department. These reports shall be used as the record for tracking the quantity and quality of work being performed. In addition, the daily maintenance report shall be utilized to record anything which might impede the contractor in performing the scope of work. The contractor is required to notify Jefferson Parish immediately within 24 hours of any problems and/or restrictions that would prevent him from performing his duties. Contractor may elect to use own report format, if approved by Jefferson Parish. If these reports are not sent on a daily basis this could delay payment of invoices.

### **MANICURED LOT (PROPERTY)**

A manicured lot is a vacant piece of property that is being maintained (by the Owner) on a regular basis. A manicured lot may be completely cleared, or partially cleared, but must have a portion of the lot in which the grass appears to be cut (by others) on a regular basis. No right-of-way maintenance is required adjacent to manicured lots.

### **NON-MANICURED LOT (PROPERTY)**

A non-manicured lot is a vacant piece of property that is not being maintained (by the Owner) on a regular basis. A non-manicured lot is completely wooded and/or overgrown to the point that typical grass cutting methods could be performed on the property. It shall be the responsibility of the Contractor to maintain the right-of-way adjacent to non-manicured properties along all mowing routes.

## BID SPECIFICATIONS FOR BID # 50-00132843

For example, the center median of Lapalco Boulevard is required to be on the smooth cut schedule. Additionally, there are non-manicured (wooded) properties in the 3600 block of Lapalco. The right-of-way area of these wooded lots shall be maintained at the same time (and frequency) as the center median.

### **NUISANCE CONTROL**

The Contractor shall include in his bid the control of dust, noise and odors created by his work operations. All controls shall be completed in order that nuisances are minimized and occur within the standards of all governing bodies. All equipment shall be maintained properly in order to perform in accordance with the manufacturer's original specifications. This shall include, but not be limited to, mufflers and exhaust, fluid leaks, deck openings, wheels, tires and blades. If the Parkways Department observes any of the Contractor's equipment not performing properly, that equipment shall be immediately removed from the work site until it is properly repaired.

### **PINE STRAW MULCH PLACEMENT**

Pine straw mulch (bales) shall be placed around each tree and landscape bed area for all smooth cutting locations. Pine straw shall be placed at a minimum of four inches (4") thick in a circular fashion around most trees and shall follow the bed lines of landscaped areas. The Contractor shall be responsible for reviewing site locations to get a quantity of trees and landscape beds. The Contractor shall also note mulch areas that are not typical in size such as the center median of Transcontinental Drive between Airline Drive and W Metairie Avenue. The quantity of mulch required for each tree shall be based on the chart below. The Contractor shall note that his initial mulch installation will be a greater amount than what is currently installed in most areas. Pine straw mulch shall be placed level and not in a pyramidal fashion around the base of the tree. Mulch shall be pulled away from the trunk of the tree keeping the tree's root flare exposed. Pine straw mulch shall be refreshed two (2) times per year (May 1 and November 1) to maintain the minimum four inch (4") thickness. Pine straw mulch shall also be placed four inches (4") thick in all garden beds and refreshed at the same time as tree mulch. Only whole pine straw free of debris shall be permitted. The Contractor shall not leave any bale string or ties on site (or buried in the placed mulch). Pine straw placement is inclusive to the smooth cutting bid item. Cost for pine straw placement is to be included in the smooth cutting bid item. The Contractor shall have twelve (12) calendar days to install all of the required mulch from the first day of May and November. Incomplete mulching (after 12 calendar days) may result in a penalty (see LIQUIDATED DAMAGES).

Minimum Tree Ring Dimensions:

Tree Diameter	(Minimum) Mulch Ring Dimensions
6" and under	18" radius from outside of the trunk
7" – 24"	30" radius from outside of the trunk
25" – 36"	48" radius from outside of the trunk
37" and above	60" radius from outside of the trunk

\* Tree diameter shall be measured on the main trunk 4.5' above grade using a tree diameter tape.

### **QUANTITIES**

There are no provided quantities (or acreage) calculated by the Parkways Department for the bidding of this contract. It shall be the responsibility of each bidder to study the provided locations and determine any quantities needed to provide the bid pricing. During the contract period, any added or deleted work will be quantified and agreed upon by both the Parkways Department and the Contractor.

### **SAFETY PRECAUTIONS**

The Contractor shall be responsible for ensuring that his operations are performed in a safe manner. This includes, but is not limited to, pedestrian and vehicular access, equipment operation and employee and site safety. All work shall conform to the latest guidelines of OSHA, Louisiana DOTD, Jefferson Parish and any other applicable agency.

## BID SPECIFICATIONS FOR BID # 50-00132843

The Contractor shall maintain a professional work zone at all times. The use of drugs or alcohol is prohibited while working on parish property.

Confrontation with citizens and/or Jefferson Parish personnel will not be tolerated.

Soliciting and/or performing private work while working on Jefferson Parish property is prohibited. Failure to maintain a professional work zone, or fraudulent activities, may result in termination of the contract and possible legal ramifications.

### **SPRAY LOGS**

**Contractor shall complete a spray log for each day that any chemical application takes place.**

Spray logs shall be e-mailed daily, no later than 10:00 a.m. next business day to the Parkways Department. These spray logs shall be used as the record for tracking the locations, quantity and quality of chemical applications. The Contractor shall utilize the Louisiana Department of Agriculture and Forestry Commercial Pesticide Applicator Record Keeping Form to log all herbicide spraying applications. A sample copy of this form is included in this bid package.

### **STRING TRIMMING (WEED EATING)**

String trimming shall be accomplished utilizing mechanical string trimmers with a commercial grade line. String trimming shall occur around landscape beds, tree rings, signs, poles, hydrants and other objects within turf areas. Herbicides shall not be used as a method of keeping grass from growing around objects within turf areas. String trimming shall leave the grass at approximately 1" in height. Caution needs to be taken so that string trimming does throw rocks or debris into traffic and that trimming not leave areas with bare dirt. The Contractor shall ensure that string trimmers do not damage trees and/or landscape beds.

### **SUBCONTRACTORS**

All mowing operations and related work must be performed by the Contractor. No subcontractors shall be allowed to perform these services.

However, the Contractor may utilize a subcontractor for his chemical applications. The use of a subcontractor shall not relieve the Contractor the responsibility of ensuring the work meets the requirements of this contract. Additionally, the Parkways Department will not communicate directly with any subcontractors. All correspondence will be with the Contractor.

### **SWEEPING/BLOWING**

After cutting, the turf and paved areas adjacent to the turf areas being cut shall be free of grass, leaves, cigarette butts and any other type of debris. This shall be accomplished using a combination of blowers and street sweepers. Debris shall not be blown from the paved to the turf areas. Code 1961 17-3 Ordinance No. 2120 2-14-01 Sec. 27-71 (A) states: "It shall be unlawful to dump or place material of any kind into parish catch basins, in a canal/ditch, on the banks of a drainage canal/ditch or in drainage servitude without a permit." The Contractor shall not blow grass clippings into roadways and/or drainage catch basins. In order to keep grass, leaves, smoking paraphernalia butts and other debris from collection and building up along the curb of streets, the Contractor will be **REQUIRED** to sweep the areas affected by grass cutting and edging. Sweeping shall occur along the entire route of grass cutting. For example, when cutting the center median of Causeway Blvd., the Contractor shall also sweep all concrete curbs and barriers located within the center median area of each street intersecting Causeway Blvd. The contractor shall use a street legal mechanical or vacuum type street sweeper with a minimum three (3) cubic yard capacity debris hopper. This equipment must be approved by the Jefferson Parish Parkways Department. Street sweeping and blowing shall be performed immediately after each edging and cutting operation. Blowers may be used to blow grass clippings off of walkways and other hard surfaces. Blowers will not be allowed to blow grass clippings, dirt and debris into drain inlets. Blowers may be used to blow grass clippings and debris directly into the path of the sweeper. If the sweeper is not visibly present, the Contractor shall not be allowed to blow clippings into the roadway. The street sweeper shall ensure all clippings and debris are removed from the roadway.

## BID SPECIFICATIONS FOR BID # 50-00132843

The Contractor shall be allowed to utilize both of the Parkways Department's maintenance yards for dumping the sweeper debris and as needed storage of the equipment.

Smooth cut mowing operations shall not take place without a street sweeper present (see LIQUIDATED DAMAGES).

### **TRAFFIC CONTROL**

The Contractor shall provide all necessary barricades, signs, lights and warning devices or any other item necessary in order to properly move traffic around or through his operations. Set up, removal and maintenance of all traffic control equipment shall be the Contractor's responsibility. Slow moving vehicle signs and flashing lights shall be installed on all moving equipment that will use the public rights-of-way for transportation of equipment. The Contractor shall be responsible for providing safe and expedient movement of traffic through the work areas. The Louisiana State Manual for uniform traffic control should be followed.

### **TRASH REMOVAL**

Any non-organic or manmade debris that is not part of or obstructs the area to be maintained by the Contractor is considered to be trash and must be removed prior to any grass cutting operations during each maintenance cycle. The Contractor shall be responsible for establishing the most efficient method of trash removal. Shredding of trash by mowers will not be permitted and may be subject to liquidated (see LIQUIDATED DAMAGES). Under no circumstances shall any collected trash (trash bags, piles, etc.) be left at a project site without the Contractor present.

Trash considered too large to be removed by hand or which requires specialized equipment to remove, shall be reported to the Parkways Department for removal.

The Contractor shall not utilize any right-of-way trash receptacle for his required trash removal. Utilizing right-of-way trash receptacles may result in liquidated damages (see LIQUIDATED DAMAGES).

### **TRANSFERRING CONTRACT**

Transfer of this contract shall not be allowed under any circumstances unless prior written approval has been received from Jefferson Parish.

### **TREE TRIMMING**

Canopy trees within the smooth cutting areas shall be trimmed, as needed, to a clear trunk height between 5' – 6' above grade to allow for proper clearance for mowing operations. Tree trimming shall also account for 'sucker' growth at the base of trees. Sucker growth shall be considered any growth extending from the main trunk of the tree and within 5' of ground level. All tree trimming operations shall be under direct supervision of a Louisiana licensed landscape horticulturalist. The Contractor shall utilize hand saws and loppers only. No gas or electric powered mechanical equipment shall be used to trim trees.

Trees such as full magnolias and hollies do not require trimming. No tree trimming is required within any defined landscape bed.

The Contractor shall notify the Parkways Department prior to trimming any trees. The Parkways Department must approve all locations, and sometimes individual trees, that may or may not be pruned by the Contractor.

Should the Contractor observe a heavily damaged, or dead, tree by no fault of his performance, he shall note this in the comments section of the daily maintenance report and report the tree to the Parkways Department. Tree trimming shall occur on an as-needed basis, but should be factored in to the inclusive unit price for each type of mowing cycle.

### **UTILITY SERVICE INTERRUPT**

In the event of an interruption of public or private utility service or general damage to public or private properties as a result of accidental breakage or any other actions by the Contractor, the Contractor shall immediately notify the proper authority and/or property owner and shall fully cooperate with said authority

## BID SPECIFICATIONS FOR BID # 50-00132843

or owner until the service is restored to its previous capacity. The Contractor shall be responsible for any costs associated with utility interruptions.

### **VACANT PROPERTIES**

This contract shall require right-of-way maintenance for some vacant properties (see MANICURED LOTS and NON-MANICURED LOTS). The roadside right(s)-of-way of non-manicured properties located along required mowing routes shall maintained at the same frequency as the specified mowing for that route.

The Contractor shall not be required to maintain the right(s)-of-way of manicured vacant properties. Right-of-way maintenance for manicured properties will be the responsibility of the property owner.

### **WORK COMPLIANCE**

The proposed work must comply with OSHA (Occupational Safety and Health Administration), DOTD (Department of Transportation), Jefferson Parish any other applicable agency's requirements and regulations regarding this variety of work.

### **WORK PERIODS**

The Contractor shall be allowed to work any and all days of the week from dawn until dusk. The Contractor must also be aware of any holiday, local event, construction work or any existing traffic patterns that may affect scheduled maintenance operations. The Contractor may be required to alter his work schedule accordingly. Any required modification to the work schedule will not be grounds for any additional cost to the Parkways Department.

## **PART III TURF MAINTENANCE AND FREQUENCIES**

### **SMOOTH CUT**

Smooth cut mowing shall occur on medians, rights-of-way and drainage canal transition areas utilizing ride-on and/or push type manicure mowers. Smooth cut mowing shall occur a minimum of: one (1) cut every twenty eight (28) days or once per every four (4) weeks, from December 1<sup>st</sup> through February 28<sup>th</sup> (29). One (1) cut every fourteen (14) days or once every two (2) weeks for March, April, October and November. One (1) cut every ten (10) days or once every one and one-half (1 ½) weeks from May thru September. The aforementioned frequency of cutting represents twenty six (26) cuts per twelve (12) month period. The grass shall be cut to a height of between a minimum of one and one-half inches (1-1/2") and a maximum of two inches (2") exposure.

Areas adjacent to the canal slopes (canal transition areas) shall be maintained as a part of smooth cut mowing. Canal transition areas do not require the Contractor to cut grass on the canal slopes, but shall require the Contractor to cut up to the line of transition from the top of the canal to the slope. The Contractor shall utilize a lawn mower to cut the majority of these transition areas. It shall be acceptable for the Contractor to use mechanical string trimmers in locations that are not wide enough for a mower, and to ensure a level line from the transition to the slope. It shall also be permissible, but not required, for the Contractor to use a tractor (75 hp or less) and an implementation to mow this area. No scalping or spraying of this transition area will be allowed.

Certain canal areas, such as the canal in the center median of W Napoleon, have bulkheads constructed of concrete or steel sheet pilings. The areas have a minor slope from the roadway to the bulkhead. These sloped areas shall be considered transition areas and must be maintained as smooth cut areas. Every smooth cut cycle shall include chemical application (non-selective herbicide), edging, grass cutting (mowing), green debris removal, string trimming, sweeping/blowing and trash removal (see PART II, DEFINITIONS).

### **FLAT ROUGH**

Flat rough mowing shall occur in large unobstructed areas of rights-of-way and on Jefferson Parish owned vacant lots and shall utilize a tractor with a cutting attachment. Flat rough mowing shall occur a minimum of: one (1) cut per month or (30) days from January 1<sup>st</sup> through March 30<sup>th</sup> and October 1<sup>st</sup> through December 31<sup>st</sup>. Two (2) cuts per month or one (1) cut per every two (2) weeks or fourteen (14) days during April 1<sup>st</sup> through September 30<sup>th</sup>. The aforementioned frequency of cutting represents

## BID SPECIFICATIONS FOR BID # 50-00132843

eighteen (18) cuts per twelve (12) month periods. The grass shall be cut to a height of between a minimum of one and one-half inches (1-1/2") and a maximum of two inches (2") exposure.

Every flat rough mowing cycle shall include chemical application (non-selective herbicide), grass cutting (mowing), green debris removal, string trimming, sweeping/blowing and trash removal (see PART II, DEFINITIONS).

### **ROADSIDE DITCH AND SLOPE MOWING**

Roadside ditch and slope mowing shall occur in select locations and shall utilize a tractor (100 hp or less) equipped with a minimum 28' reach boom mower. Roadside ditch and slope mowing shall occur a minimum of: one (1) cut per month or (30) days from January 1<sup>st</sup> through May 30<sup>th</sup> and September 1<sup>st</sup> through December 31<sup>st</sup>. Two (2) cuts per month or one (1) cut per every two (2) weeks or fourteen (14) days from June 1<sup>st</sup> through August 31<sup>st</sup>. The aforementioned frequency of cutting represents fifteen (15) cuts per twelve (12) month period. The grass shall be cut to a height of between a minimum of one and one-half inches (1-1/2") and a maximum of two inches (2") exposure.

Every roadside ditch and slope mowing cycle shall include chemical application (non-selective herbicide), grass cutting (mowing), green debris removal, string trimming, sweeping/blowing and trash removal (see PART II, DEFINITIONS). If desired by the Contractor, and approved by the Parkways Department, roadside ditch and slope mowing cycles may include bottom spraying of aquatic non-selection herbicide (see CHEMICAL APPLICATIONS, NON-SELECTIVE HERBICIDE).

### **WEATHER AND MOWING CONDITIONS**

The Contractor shall determine his activities and schedule based on the weather. Performing mowing operations during, or immediately after, weather events does not relieve the contractor of performing in accordance with these specifications. At no time will it be acceptable for the Contractor to leave any turf area with an uneven surface or to leave excessive (visible) thatch. Any divots, ruts or holes must be repaired by the Contractor.

## **PART IV INCIDENTAL AND ADDITIONAL BID ITEMS**

### **GENERAL**

This bid will require the Contractor to price certain related incidental tasks that may or may not be performed during the term of this contract. Unit pricing for these incidental and additional items shall be turnkey and include all material, labor and the like to perform each task in accordance with these specifications.

### **ADDITIONAL MAINTENANCE AREAS**

The base contract requires that the Contractor maintain a list of designated areas for each cycle and type of cut. In addition, the Contractor shall provide a per acre price for the Parkways Department to utilize when adding, or subtracting, area(s) to maintain. Additional maintenance area pricing shall include all of the requirements of the different types of cuts (see PART III, MAINTENANCE AND FREQUENCIES). There is not a minimum or maximum of additional, or subtracted, area(s). The quantity of acreage shall be agreed upon by both the Contractor and the Parkways Department. All acreage quantities shall be rounded up to the nearest tenth (0.10) of an acre to prorate pricing, as needed.

### **INCIDENTAL CURB AND ROADWAY SPRAYING**

The base contract requires that the Contractor spray non-selective herbicide along all hardscape areas adjacent to all mowing locations. Incidental curb and roadway spraying shall be for areas designated outside of required mowing locations. Incidental curb and roadway spraying shall be priced per mile and shall include both sides of the roadway in that per mile price. For example, when the Contractor is maintaining the center median of a roadway, he is required by the contract to spray the curb and gutter of that median, but not the curb and gutter on the outside of the travel lanes. The incidental curb and roadway spraying would cover these outside locations.

## BID SPECIFICATIONS FOR BID # 50-00132843

In some instances, the incidental curb and roadway spraying may require the Contractor to spray the curb and gutter of one side of the roadway and then spray the center line of the roadway. In any instance, the per mile price allows for the spraying of two sides of the roadway.

Incidental curb and roadway spraying shall only occur when requested by the Parkways Department. There is no minimum or maximum quantity of incidental curb and roadway spraying designated for this contract. All incidental curb and roadway spraying will require the Contractor to apply both a pre-emergent herbicide and a non-selective herbicide (mixed together) for each application (see PART II, DEFINITIONS).

### **INCIDENTAL PINE STRAW MULCH PLACEMENT**

The base contract requires that the Contractor apply pine straw mulch (bales) twice per twelve (12) month period. Incidental pine straw mulch placement shall refer to any requested mulch placement in addition to the required mulching and shall abide by the same specifications (see PINE STRAW MULCH PLACEMENT). Incidental pine straw mulch may be requested by the Parkways Department to account for new trees and/or landscape bed plantings, to repair damage or to enhance various locations. Incidental pine straw mulch placement shall be priced per square yard (at 4" thick). Incidental pine straw mulch placement shall only occur when requested by the Parkways Department. There is no minimum or maximum quantity of incidental pine straw mulch placement designated for this contract.
