## Safety

### Risk Management

Platinum knows that complying with all safety standards when using, storing, and disposing of all cleaning chemicals is not only the law, but also the right thing to do. Embracing this as a company, we have implemented programs that effectively ensure that all employees, staff, and customers are not only informed about any hazardous cleaning solutions, but also about the procedures for handling, use, control, and disposal of them. Facets of our programs include specific training and refresher training throughout the year regarding container labeling, safety data sheets, and equipment inspection and maintenance.

### Container Labeling

All containers received for use will be clearly labeled as to the contents, noting the appropriate

hazard warning, and listing the name and address of the manufacturer. All secondary containers (i.e. spray bottles, gallon jugs, etc.) are labeled with either an extra copy of the original manufacturer's label or with labels that include the identification and the appropriate hazard warning.

### Safety Data Sheets (SDS)

Copies of SDS for all chemicals in use will be kept on site. SDS will be available to all employees during each work shift. Copies of all SDS are furnished to the client's safety department.

### Accident Prevention

The safety of everyone in your building is one of our top priorities. In the rare instance that an accident or other work-related incident should occur, the following procedures are immediately implemented:

- Any claim is reported to our insurance carrier within 24 hours.
- Claim progress is monitored to ensure efficient completion.
- Investigations are conducted with the added focus of preventing a repeat of the incident.
- Employees needing medical attention are assisted to ensure speedy recovery.
- Any follow-up treatments needed are arranged near the employee's home.
- All efforts are made to bring the employee back to work as soon as possible.
- Light duty options are implemented when appropriate.
