Enclosures

October 20, 2021

To Our Valued Customers,

We have exciting news to share about the future of USALCO and G2O Technologies. On Tuesday, 19 October 2021, USALCO and G2O Technologies entered into a definitive agreement to combine our companies into a single entity under the USALCO name.

Our merger unites two leaders in the specialty chemicals and water treatment coagulants industries. USALCO and G2O Technologies were built on shared core values – high-quality products, outstanding customer support, and world-class technical service – and we are committed to continuing to build on these values into the future. The combination expands the New USALCO's product portfolio with a broadened range of specialty PAC, ACH and related polymer blends and expands our geographic coverage throughout the United States. We truly believe this transaction will improve our ability to serve you, our valued customer, and other important stakeholders as well.

The planning and integration process is underway to unite our companies and this work will continue over the coming months. We will take a deliberative and thoughtful approach to our integration, retaining the best practices from each company through a process that is participative and transparent. Be assured, we will continue to communicate with you at key milestones throughout the process and we will provide you with ample notice of any changes that may occur.

In terms of your USALCO/G2O account, it will be business as usual for now – your account representatives will not change and will provide the same level of service that you have come to expect and deserve. Your account manager will reach out to you shortly to provide you with more information; however, we do not anticipate any changes to the ordering, fulfillment, or payment processes at this time.

We would like to thank you for trusting us with your supply requirements. The USALCO team will work exceptionally hard to ensure that your needs are met throughout the integration process and to deliver end results that improve our product offering and service to you. We look forward to continuing to serve you over the coming years.

Sincerely,

Dear Valued Customer,

Please be advised that there are some upcoming changes at USALCO that we want to bring to your attention. As you may recall, on November 2, 2021, we announced our merger with G2O Technologies LLC and our intention to continue operating under the USALCO name.

We have been working diligently to integrate our business systems across all 26 facilities, and we are pleased to inform you that we will begin migrating all our manufacturing facilities onto a single ERP system starting July 21, 2023. The go-live date has been pushed back since our previous communication, which will give our customers more time to make the necessary changes. The first facilities to be migrated will be Houston, TX, Port Allen, LA, and Mentor, OH.

In addition, after July 21, 2023, we will also begin issuing all documentation with USALCO branding. We will no longer be using G2O Technologies branding. We encourage you to update your internal systems to reflect our latest banking and contact information.

If you have any questions or concerns, please do not hesitate to contact your sales representative, or call our customer service department at 800-453-2586. We value your business and appreciate your continued support.

Sincerely,

4. First-aid measures

Description of first aid measures

General advice	Get medical attention immediately if symptoms occur. Show this safety data sheet to the doctor in attendance.
Inhalation	Remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, (trained personnel should) give oxygen. Call physician immediately. If not breathing, give artificial respiration. If breathing is difficult, (trained personnel should) give oxygen. Call a physician immediately.
Eye contact	Remove contact lenses, if worn. Immediately flush eyes for 5 to 10 minutes with plenty of water and keep eyelids open as much as possible. Washing within one minute is essential to achieve maximum effectiveness. Seek medical advice immediately.
Skin contact	Immediately flush skin with plenty of soap and water for at least 15 minutes. Remove contaminated clothing and shoes. Wash contaminated clothing before reuse. If skin irritation occurs: Get medical advice/attention.
Ingestion	Do not induce vomiting. Give large amounts of water followed by milk if available. If vomiting should occur spontaneously, keep airway clear. Get medical attention. Never give anything by mouth to an unconscious person.
Self-protection of the first aider	Ensure that medical personnel are aware of the material(s) involved, take precautions to protect themselves and prevent spread of contamination. Avoid direct contact with skin. Use barrier to give mouth-to-mouth resuscitation. Avoid contact with skin, eyes or clothing. Wear personal protective clothing (see section 8).

Most important symptoms and effects, both acute and delayed

Symptoms	Skin, eye and respiratory tract irritation. May cause redness and tearing of the eyes. Burning sensation. Itching. Rashes. Redness. Dermatitis. Difficulty in breathing. Coughing and/ or wheezing. Stomach pains.
-----------------	--

Indication of any immediate medical attention and special treatment needed

Note to physicians	Aluminum soluble salts may cause gastroenteritis if ingested. Treatment includes the use of demulcents. Note: Consideration should be given to the possibility that overexposure to materials other than this product may have occurred.

5. Fire-fighting measures

Suitable Extinguishing Media	Not combustible. Use appropriate extinguishing media for material that is supplying fuel. Use water spray to cool the surrounding area and maintain fire temperature below decomposition temperature.
Large Fire	CAUTION: Use of water spray when fighting fire may be inefficient.
Unsuitable extinguishing media	Do not scatter spilled material with high pressure water streams.
Specific hazards arising from the chemical	At temperatures above 650 °C (1202 °F) the product will decompose to give off sulfur trioxide, an oxidizing agent that will support combustion. Sulfur trioxide will react with water to yield sulfuric acid.
Explosion data	
Sensitivity to mechanical impact	None.
Sensitivity to static discharge	None.
Special protective equipment for fire-fighters	Use self-contained breathing apparatus in confined areas; avoid breathing mist or spray. Full protective clothing and approved self-contained breathing apparatus required for firefighting personnel. Cool containers with flooding quantities of water until well after fire is out.

6. Accidental release measures

Personal precautions, protective equipment and emergency procedures

Personal precautions Wear suitable protective clothing and gloves.

Other information Refer to protective measures listed in Sections 7 and 8.

Methods and material for containment and cleaning up

Methods for containment Prevent further leakage or spillage if safe to do so.

Methods for cleaning up Stop leaks. Use absorbent material to clean up spills. Place in labeled waste container for disposal. Provide adequate ventilation to spill area.

7. Handling and storage

Precautions for safe handling

Advice on safe handling Keep container closed when not in use. Avoid contact with skin, eyes or clothing. Wear chemical splash goggles, gloves, and protective clothing when handling. Wash thoroughly after handling. Avoid breathing vapors or mists. Use with adequate ventilation and employ respiratory protection where mist or spray may be generated. Do not take internally. FOR INDUSTRIAL USE ONLY.

Conditions for safe storage, including any incompatibilities

Storage Conditions Avoid storing at temperatures near or below freezing point. Keep material from coming into contact with common metals due to the corrosive nature of this product. Do not store below 40 °F (4 °C), product may congeal or stratify if cold. Store in a cool, dry place away from direct heat.
