Any approved incidental work shall be invoiced separately from the monthly maintenance cost and can be submitted any time after the work is accepted as complete by Parkways. There is no guaranteed quantity of any incidental bid items to be used for this contract. All bid items shall include all associated costs related to the item such as labor, material, equipment, fuel, insurance and related incidentals.

## **LIQUIDATED DAMAGES**

Some scheduled maintenance items within the required specifications must be completed within a designated time frame. These schedules are important to the overall appearance of the Site. The Contractor shall be responsible for establishing the most efficient method of trash removal. Shredding of trash by mowers will not be permitted.

### **REPAIR / REPLACEMENT**

A list of common incidental repair items is included with this bid. All bidders shall price the incidental items on the bid form for the possibility of providing and installing the items during the life of the contract. There is no minimum or maximum quantity of each item that may be required during the contract. Each item, if required during the contract, will be invoiced in addition to the monthly invoice. There is no minimum or maximum quantity of each item that may be required during the contract. Each item, if required during the contract, will be invoiced in addition to the regular monthly invoice. All items will require prior approval from the Jefferson Parish Parkways Department before being purchased and/or installed.

With regard to chemical maintenance items, the incidental bid form includes a price per acre for both granular and liquid applications (labor), as well as pricing for the actual products. Rates are listed in per acre amounts. If any applications from the incidental list are required, the application price (labor) and the product price will be added together to get the total cost of the application. If more than one product will be applied at the same time, of the same constancy, only one application (labor) cost will be included in the total cost. **Incidental bid item pricing will be the basis for any changes (addition, subtraction or substitution) to the chemical application program due to weather conditions, infestation, storms or natural disasters.** All incidental item pricing shall include freight, taxes, tools and supplies required to properly install each item.

Any additional repair and/or replacement not included on the incidental line items sheet, including all associated labor, delivery charges and taxes, shall be approved by the Director of the Jefferson Parish Parkways Department prior to the work taking place. The Contractor shall provide a written proposal including a description of the proposed work and an itemized cost breakdown for approval prior to performing the work.

### **MAINTENANCE REPORTS**

A monthly maintenance report may be required by the Jefferson Parish Parkways Department to be kept and submitted with monthly invoices. These reports, if required, are records used for tracking and quality assurance purposes. The Contractor is required to notify Jefferson Parish within 24 hours

of any problems and/or restrictions that would prevent him from performing his duties. The Contractor shall provide his own form.

### **INSPECTIONS**

Frequent inspections of area of work performed shall be made by Jefferson Parish personnel to determine the acceptance of the work performed. In the event the work is considered unacceptable, the Contractor will be directed to immediately employ any and all methods or means to bring the area up to an acceptable level within three (3) calendar days of notice, without any extra cost to Jefferson Parish. The discovery of any fraudulent activities associated with this contract during the inspection process will be grounds for immediate contract termination without further compensation. In addition, such circumstances may initiate possible legal ramifications for the Contractor.

### **TRAFFIC CONTROL AND SIGNS**

The Contractor shall provide all necessary barricades, signs, lights and warning devices or any other item necessary in order to properly move traffic around or through his operations. Set up, removal and maintenance of all traffic control equipment shall be by the Contractor. Slow moving vehicle signs and flashing lights shall be installed on all moving equipment that will use the public rights-of-way for movement of equipment. In the event that a lane of traffic will need to be closed, the Contractor shall provide sufficient notification to the Jefferson Parish Traffic Engineer of necessity to close any portion of the roadway carrying vehicles or pedestrians. The Contractor will request final approval of such closings from the Department of Public Works, Traffic Engineering Division, at least ten (10) working days in advance.

The Contractor shall be responsible for providing safe and expedient movement of traffic through the work Site. The Contractor must have in place prior to work, a method of recording, responding and repairing legitimately broken glass, windshields or any other kind of damage experienced due to the work being performed.

### **WORK PERIODS**

No work shall be done between 6:00 p.m. and 7:00 a.m., or on Saturdays, Sundays, or legal holidays without permission from Jefferson Parish. However, emergency work may be done without prior permission. In the event that the Contractor wishes to work weekends, holidays or outside the allowed times of the local governing bodies, he must secure permission from Jefferson Parish, and provide at least 72 hours notification of his intentions. The Contractor must also be aware of any local event(s) that may affect his scheduled maintenance operations.

### **UTILITY SERVICE INTERRUPT**

In the event of interruption of public or private utility service or general damage to public or private properties as a result of accidental breakage or any other actions by the Contractor, he shall immediately notify the proper authority and/or property owner and shall fully cooperate with said

authority or owner until the service is restored to its previous capacity. All costs associated with the notification and repair shall be paid for by the Contractor.

#### **ONGOING CONTRACTS**

It is possible that other Contractors may be working within close proximity to the Site. The Contractor shall coordinate his work with any other Contractors working in or around the locations. Should a conflict occur, a Parish representative will make all final decisions.

#### **NUISANCE CONTROL**

The Contractor shall include in his bid the control of dust, noise and odors created by his operations. All controls shall be completed in order that nuisances are minimized and occur within the standards of all governing bodies.

#### **TRANSFERRING CONTRACTS**

Transfer of this contract shall not be allowed under any circumstances unless an amendment is passed by the Jefferson Parish council.

### **PART III LANDSCAPE MAINTENANCE PROGRAMS AND FREQUENCIES**

#### **GRASS CUTTING (MOWING)**

The entire Site (improved and unimproved areas) shall have the grass cut a minimum number of times. The frequency shall be: a minimum of one (1) cut per every seven (7) days or once every week during the period of March 1 through October 31, and one (1) time per every two (2) weeks or fourteen (14) calendar days during the period of November 1 through February 28 (29) for the entire contract period. The grass shall be cut to a height of between a minimum of 1" (one inch) and a maximum of 2" (two inches) exposure. It is the Contractor's responsibility to visit each location to determine the quantity of turf to be cut. A total of forty three (43) cuts is required in calendar year.

Cutting shall be performed to such a manner to leave the Site with a smooth, level cut on the grass, conforming to the existing grade. No gouging, scalping or similar actions shall be permitted. All trash and debris must be removed from the Site prior to grass cutting.

Grass cutting may be accomplished utilizing push mowing units or ride on mowing units depending on the areas to be cut and the proximity of objects to the cutting areas. In constricted areas where a push type mower can be used, the cutting of grass by use of a weed eater will be prohibited. Each mowing cycle shall be performed on Thursdays and/or Fridays, weather permitting. No work shall be performed on Saturdays or Sundays without prior approval from the Parkways Department.

This contract will require the Contractor to mow in close proximity to existing drainage canals. The Contractor will not be required to mow the sloped portions of the drainage canal, but shall be required to cut up to the point of transition of the canal slope. It shall be acceptable for the Contractor to use a mechanical weed eater to maintain this transition area. It shall also be permissible for the Contractor to use a tractor (75 hp or less) and an implement to mow this area.

Each mowing cycle shall be completed in no more than two consecutive days. Weather related and unforeseen circumstances preventing the Contractor from completing a mowing cycle within this time frame shall be immediately reported to Jefferson Parish. Failure to complete mowing operations within this time period, or with too many days between cycles, may result in a penalty (see LIQUIDATED DAMAGES).

### **WEED EATING**

The entire Site (improved and unimproved areas) shall have the grass areas around any and all existing fixed features including, but not limited to, signs, mow curbs (concrete bed edging), walls, light poles, fire hydrants, drains, manholes and utilities shall be cut using a mechanical trimmer. Spraying will not be allowed around any hard surface. These areas shall be cut to a 1" height and in a 24" diameter around all objects. Weed eating will not be allowed around any trees or plant material where damage may occur to the bark or the trunk of the plant or tree. Spraying shall only be allowed within a 12" diameter around properly mulched trees for the purpose of weed control. Weed eating shall occur at the same time and frequency as grass cutting.

### **AS-NEEDED WEED CONTROL**

This contract includes a detailed pre-emergent chemical application program (improved and unimproved areas) to limit visible weed growth. However, as-needed post emergent weed control will also be the responsibility of the Contractor to ensure no weeds are visible in bed area, tree mulch rings, curbs & gutters, concrete islands, paver areas and the like. Weed control is to include eradication of grassy weeds such as torpedo grass, broad leaves, and nutsedge. Products such as Round-Up, Fusilade II, Image and Certainty may be used in post-emergent applications. Weed control and spraying shall be performed by a licensed and qualified applicator in such a manner as to leave clean lines around all areas that will be affected. Spraying around trees will be a 12" diameter from trunk of tree and be covered by mulch. Spraying around other obstructions such as signs, fire hydrants, light poles and the like will not be allowed. Precautions should be taken to avoid chemical drift by not spraying when wind is in excess of 5 mph. Weeds in all cracks and joints in all paved surfaces including streets, curbs & gutters, parking areas, paver areas and walkways shall only be removed by spraying. Spraying will not be allowed where a hard surface meets the edge of lawn. Spot spraying of weeds inside of beds areas will be allowed as long as proper precaution is taken when applying the non-selective herbicide. Any damage to the plant material as a result of spot

spraying may lead to disallowance of future applications by the Contractor. Chemical weed control shall occur at the same time and frequency as grass cutting.

### **AS-NEEDED HAND WEED REMOVAL**

For improved areas, this activity will be limited primarily to garden and planted bed areas. Garden beds are to be weed free at all times. Hand weeding shall not be required in turf areas and shall be used in conjunction with post emergent weed control to ensure no visible weeds at all times.

### **EDGING**

The entire Site (improved and unimproved areas) shall be edged with a mechanical (stick) edger where grass areas meet surface paving whether it be concrete, asphalt, brick or some other paving type. The grass shall be edged and not sprayed. Herbicides may not be used to control grass growth where grass and a paved surface meet. Edging equipment shall be such that a clean, sharp line along the hard surface/grass interface shall remain upon completion of edging. A minimum depth of 1" (one inch) shall remain along and below the top of hard surface paving upon completion of edging in order to retard the continued growth of the grass. Edging needs to be done with stick edger or walk behind edger with a metal or equivalent blade only. Mechanical weed eaters shall not be used for edging. Edging shall occur at the same time and frequency as grass cutting.

### **SWEEPING**

The entire Site (improved and unimproved areas) shall be swept in order to keep grass, leaves, smoking paraphernalia butts and other debris and trash from collecting and building up. The Contractor will be required to sweep the areas affected by the work, and all areas included within the boundaries of the Site conducted under the maintenance contract including all turf, bed, concrete curbs & gutters, pavers areas and mow curbs. The sweeping shall be performed immediately after each edging and grass cutting operation. The Contractor shall not be allowed to blow grass clippings, dirt and debris into the street, canals or drain inlets.

Unless the Contractor scatters green debris across the travel lanes, sweeping shall only be required to take place along the curb & gutter of the center median areas of the Veterans Boulevard. **This includes any concrete and/paver islands located within intersections and turning lanes.** The Contractor shall not be allowed to blow any clippings into the roadway. However, it shall still be the responsibility of the Contractor to sweep any grass clippings or debris located within the roadway's travel lanes. Sweeping shall occur at the same time and frequency as grass cutting.

**The Contractor shall determine the best method for sweeping.** A mechanical sweeper truck is encouraged but is not required.

All collected clippings and debris shall be bagged and removed from the site. **Blowing debris back onto the maintained median shall not be allowed.**

## **MULCH PLACEMENT**

The Site (improved and unimproved areas) shall receive baled pine straw mulch in order to keep a minimum 4" thick layer in all garden beds (except for annual color beds) and around all trees. Mulching shall be refreshed every six (6) months. It is the Contractor's responsibility to visit each location to determine the quantity of mulch required. The first mulch application shall take place the first week of November once the maintenance contract starts. The second application shall take place the first week of May. Only mulch free of debris and trash shall be permitted. The Contractor must remove any rope or ties from the baled straw mulch and dispose of off-site. Whole bale pine straw shall be placed around each tree at a minimum 4" thick, and with a minimum of a 36" diameter ring from the trunk of the tree. The pine straw shall be set down level and not in a pyramidal fashion around base of tree. The mulch shall be pulled away from all trees in accordance with standard horticultural practices. Mulch must also be pulled away from all light fixtures and electrical components within a mulched area. The Contractor shall not cover any electrical components or other utilities with mulch.

The Contractor shall complete each mulch application in no more than seven (7) consecutive days. Failure to complete mulch installation within this time period may result in a penalty (see LIQUIDATED DAMAGES).

All mulch installation shall take place under the direct supervision of a licensed horticulturalist.

## **ANNUAL COLOR REPLACEMENT**

Annual color has been incorporated in improved areas within the project Site (planting size: 6" pots). It is the Contractor's responsibility to visit each location to determine how many annuals are required per location (a total quantity of annuals is located within these specifications). The Contractor shall be required to take a soil sample up to one (1) time per year (locations shall be determined by Jefferson Parish). Soil amendments, if required, will be specified by the Jefferson Parish horticulturalist, and furnished and installed by the Contractor. The costs associated with the soil amendments, not included on the incidental items chart, will be billed under associated costs.

The existing annuals shall be removed and replaced during the first week of the following months: April, July, and December. The soil amendments must be in place prior to the December annual color replacement. As part of this contract, it will be the Contractor's responsibility to locate, deliver, and install the annuals in the correct locations. Jefferson Parish will select the type of annual and flower color(s) prior to the order being placed. All annuals used during a replacement shall be of the same variety and color. The Contractor is responsible for all insect control, disease control and fertilization of annuals. The programs for each of these should be approved by the Horticulturist prior to planting.

The Contractor shall be responsible for the turn-key planting of annuals. The Contractor is responsible for the proper watering of the annuals from the planting stage until they are changed out.

The Contractor shall complete the annual color replacement in no more than three (3) consecutive days. Failure to complete annual color installation within this time period may result in a penalty (see LIQUIDATED DAMAGES). In the event that soil amendments are required, this timeline may be extended. The Contractor shall be responsible for ensuring that the irrigation system is operating properly before, at the time of and after annual color installation. The Contractor shall be required to replace any annual color harmed as a result of faults in the irrigation system or from a lack of disease, fungus or insect control.

Cut pine straw (bag) mulch shall be installed at a minimum depth of 4" immediately after annual color installation. Mulching shall be completed within the same three (3) consecutive day planting time as the annual planting.

All annual color installation shall take place under the direct supervision of a licensed horticulturalist.

#### **DEAD PLANT REPLACEMENT**

Improved locations shall require periodic replacement of plants, not including trees, located within the maintenance Site and is required to be performed by the Contractor. The timely replacement is critical to the overall look of the improvement Site. The Contractor must replace any plant discovered to be dead, or nearly dead, during the following grass cutting/maintenance visit. The prolonged existence of dead plant material will not be allowed. The replacement plants size shall match surrounding plant material of the same species. Do not discard the dead shrub/shrubs without contacting Ronald Johnson with the Parkways Department for a site inspection. Any dead, or dying, trees shall be reported via e-mail to Bernie Wisnowski with the Parkways Department. All shrub replacement costs will be as per the incidental list provided by the contractor. Plant replacement costs shall be submitted with the monthly invoice. The Contractor must receive approval from Jefferson Parish prior to replacement.

When pricing the incidental cost of dead plant replacement, the Contractor shall include all material, freight, labor, soil, mulch and incidentals into the unit price.

#### **CONCRETE PAVERS (MATERIAL ONLY)**

Some improved areas contain decorative concrete pavers. Concrete Paver unit pricing shall include individual concrete paver units, freight to the site (Veterans Boulevard CPZ limits of work) and taxes. No labor for installation shall be included in the unit price. Concrete Pavers shall only be required if broken existing pavers are discovered during Concrete Paver Repair/Leveling.

Concrete Paver Specifications:

Manufacturer: Pavestone  
29095 Krentel Road  
Lacombe, Louisiana 70445  
(985) 882-9111  
Product: Holland Stone (Heritage Series)  
Paver Thickness: 60mm  
Paver Color: Old Town Blend

**CONCRETE PAVER REPAIR / LEVELING**

Some improved areas contain decorative concrete pavers. All concrete paver repairs shall occur at the Owner's request. Repair shall be considered on areas that have settled naturally, or due to damage. When an area is determined to be in need of repair, the Owner and the Contractor shall meet at the requested location to determine the quantity of paver repaired required. Once this quantity is agreed upon, and the Contractor receives a written request from the Owner, the repairs may begin. All paver work shall be by an Interlocking Concrete Paving Institute (ICPI) certified installer. The Contractor shall submit his installer's qualifications to the Owner for approval prior to any repair work taking place.

All paver repairs shall occur during a continuous site visit by the Contractor. There shall be no stockpiling of pavers, equipment or materials on site unless the Contractor is present. No incomplete portion of the paver median shall be left unattended by the Contractor at any time. The Contractor shall implement proper lane closures, as required, when working on the median.

To properly repair damaged concrete paver areas, the Contractor shall remove the existing paver units and salvage them for re-use. The Contractor shall then remove as much leveling sand (mason sand) as required to expose the existing compacted #610 limestone base. The #610 limestone base shall be a minimum 8" in thickness and be installed over a geotextile fabric. The Contractor shall compact this layer of #610 limestone to raise the damaged area(s) to the proper grade. The proper grade shall be flush with the surrounding existing pavers and promote positive drainage toward the roadway. Once the #610 limestone is installed, and compacted, the Contractor shall install an approximately 1" thick layer of mason sand. The mason sand shall be free of any debris. The mason sand shall be compacted and the salvaged brick pavers shall be reinstalled in the same pattern in which they were removed. Finally, the Contractor shall install polymeric joint sand (color: tan) into the joints. Polymeric joint sand shall be installed as per the manufacturer's specifications.

All Pavers are 60mm Holland Stone (Heritage Series) pavers manufactured by Pavestone. The pavers are laid in a herringbone pattern with soldier course borders running along the existing roadway curbs. In the event damage has occur to the concrete pavers, and they are unable to be salvaged, the Contractor provide matching concrete pavers as per the unit pricing provided on the Incidental Material list.

## **TREE STAKES AND TIES**

Where applicable along the entire Site, the Contractor shall monitor all tree stakes and ties for the duration of the contract. Stakes found to be loose shall be adjusted so as to make them secure. Tree ties shall be secure and well-fitting without binding. Removal of existing tree stakes and ties may be required at the discretion of Jefferson Parish.

## **AUTOMATIC IRRIGATION**

As an integral part of the improvements within most improved areas, and for the long term success and survivability of the planted areas, automatic irrigation systems have been installed in most garden bed and turf areas. Monitoring of the systems and performing the necessary repairs to the systems is required by the Contractor. These tasks include, but may not be limited to, replacement of heads, broken water lines and valves; adjustment of the controller, heads, valves and zone water durations and frequencies. All irrigation repair costs will be as per the incidental list provided by the Contractor and **all repairs shall be performed within two (2) workings days** of the issue being discovered by the Contractor and/or Jefferson Parish. In the event of minor repairs that can take place at the same time of the inspection, the Contractor may contact the Parkways Department representative for immediate approval via e-mail. Irrigation repair costs shall be submitted as a separate invoice from the monthly billing. The Contractor must receive approval from Jefferson Parish prior to any repairs.

To be included in the monthly billing price, the Contractor shall make up to twenty (20) as-needed complete site visits for controller adjustment and/or backflow preventer shutoff/turn-on as directed by Jefferson Parish. These site visits shall include every irrigation location within the work limits. When requested by Jefferson Parish, the Contractor shall have an irrigation technician adjust the irrigation controllers at each location to account for weather changes. This may include, but not be limited to, watering frequencies and durations and system shut downs or startups. When a site visit is requested by the Parkways Department, the Contractor shall have seventy-two (72) hours to make the visit. As-needed irrigation system adjustments due to chemical applications and/or annual color replacement shall not be a part of the required twenty (20) complete site visits. The site visits may be requested at any time during the length of the contract and are not schedule or calendar determined.

As requested by the Parkways Department, the Contractor shall be responsible for making a complete walk-through/test of each irrigation system within the work limits. Pricing for the walk-through/test shall be priced per visit as a part of the Incidental Material list. These tests will be used to determine repairs and upgrades of the existing systems. The Contractor shall create a report of the system for each site detailing the following information:

- Date/Time of test;
- Irrigation technician performing the test;

- Weather conditions;
- Note the controller settings for that day;
- As needed, or requested by Jefferson Parish, adjust controller settings for each site;
- Note any malfunctioning components of the system;
- Recommend repairs for any discovered malfunctions.

Sprinkler head adjustment (aiming) is not considered incidental work or part of the as-requested site inspections and controller adjustments, and shall not be charged as such. Head adjustments shall be made, when noticed by Jefferson Parish or the Contractor, at each site(s) maintenance (mowing) visit.

Prior to making repairs, or requesting to make a repair, the Contractor shall take pictures and or videos of all issues requiring a repair. In addition, the Contractor shall take additional pictures and or videos of all completed repairs for documentation.

All irrigation work shall be under the direct supervision of a licensed irrigator.

### **SETTLEMENT**

Monitor the Site (improved and unimproved areas) under this contract for settlement. Areas that require fill due to settling and erosion must be filled with a fill material that supports the weed free growth of grass and supports positive drainage. The fill material will be free of debris and must be graded to a smooth and level surface conforming to the surrounding grade. The fill materials shall be put in place within 72 hours of notification. All fill costs will be as per the incidental list provided by the Contractor. Fill costs shall be submitted as a separate invoice from the monthly billing. The Contractor must receive approval from Jefferson Parish prior to any fill work.

### **DRAINAGE**

Monitor all aspects of the landscape drainage system (improved sites only) located within the maintenance sites including French drains pipe, solid drain pipe, catch basins, grates and swales. Clean and discard any blockages as necessary. Clogged or broken drain lines, or defects in catch basins are to be reported to the Jefferson Parish Parkways Department as soon as they are discovered.

There are three (3) locations with pervious catch basins that are tied into the irrigation main line as a means to pump water from the catch basins. These catch basins shall be monitored by the Contractor at each site visit for clogs and improper function such as being stuck in the on or off position. These catch basins are controlled by the irrigation main line; thus, the irrigation controller operates the main line and these pumps. The catch basins are scheduled to pump water for a few hours around

midnight at selected days of the week. If the Contractor notices the catch basins pumping water during the day light hours, a malfunction is taking place and the water shall be shut off at the irrigation backflow until further diagnosis can be made.

Locations: Veterans Boulevard near Massachusetts Avenue, Veterans Boulevard near Lisa Drive and Veterans Boulevard near Downs Boulevard.

### **TREE AND PALM TRIMMING**

Trees within both the improved and unimproved areas of the Site shall be fully trimmed in accordance with standard arboriculture practices twice per year (February and August). The February trimming shall include pruning to 'shape' the trees, lift canopies for maintenance operations and clear any possible sight obstructions. Trimming shall result in a natural, balanced canopy of all trees. There shall be no 'topping' of crape myrtle trees. The August trimming shall reinforce the shaping completed in February, as well as remove any dead wood, lift canopies for maintenance operations and clear any sight obstructions. Should the Contractor observe a heavily damaged or dead tree, by no fault of his performance, he shall immediately report the tree to Jefferson Parish Parkways Department. Field input from the Jefferson Parish arborist and horticulturist will assist with any questions the Contractor may have regarding tree trimming.

With every mowing cycle, the Contractor shall trim trees with dead and or low hanging branches that obstruct the area in which maintenance work is performed to a minimum height of five feet (5') above ground level, where applicable. The Contractor shall monitor and trim any trees obstructing any traffic signals or signage. Any growth extending six inches (6") beyond the main trunk of the tree, and within five feet (5') of the ground level, is considered to be sucker growth that must be removed during every mowing cycle.

Palms within the improved area of the Site shall be fully trimmed in accordance with standard arboriculture practices twice per year (May and August). All seed pods are to be removed from the palm trees before they fall to the ground (usually around May each year). All tools used for pruning palms shall be sterilized between the pruning of each tree to prevent the possible spread of disease. Use recommended sterilization practices from LSU Plant Diagnostic Center. Field input from the Jefferson Parish arborist and horticulturist will assist with any questions the Contractor may have regarding palm trimming.

With every mowing cycle, the Contractor shall remove all dead or broken fronds from all palms soon as it is noticed or when the Contractor is notified by Jefferson Parish. This includes damage caused by wind and or cold (excluding named storms).

Emergency tree and or palm trimming may be required due to named storm damage. Emergency trimming due to named storm damage shall be considered an additional service not included in this contract. The Contractor shall assess all damage and prepare a proposal for removal to Jefferson Parish for approval. Work shall not be performed without prior approval from Jefferson Parish.

All tree and palm trimming shall take place under the direct supervision of a licensed arborist.

**SHRUB PRUNING**

Shrubs within the improved areas of the Site shall be properly pruned in accordance with standard practices. It is the intent of the design for the shrubs to have a massing effect. This shall be achieved by regular pruning and shaping of the shrubs so that they are natural in shape, but with no “stray” branches. In addition, the Contractor shall ensure that shrub growth does not extend pass any curbs, sidewalks or garden bed borders. Typical pruning heights shall be as per the below chart. Shrubs shall be pruned after blooming each season to promote new growth. This may entail removing an entire limb, branch or frond, and may require removal of a part of a limb, branch or frond. Shrub pruning due to excessive wind and or cold (excluding named storms) may be required, and is considered part of this contract. Shrub pruning around decorative lights shall be monitored on a weekly basis. **The Contractor shall keep all decorative lighting fixtures and enclosures fully exposed from plant growth for service and aiming at all times.** Field input from the Jefferson Parish horticulturist will assist with any questions the Contractor may have regarding shrub pruning. Pruning shall occur on an as-needed basis, but no less than four (4) times per year.

Emergency shrub pruning may be required due to named storm damage. Emergency pruning due to named storm damage shall be considered an additional service not included in this contract. The Contractor shall assess all damage and prepare a proposal for removal to Jefferson Parish for approval. Work shall not be performed without prior approval from Jefferson Parish.

## **STANDARD INSURANCE REQUIREMENTS FOR BIDDING PURPOSES**

All required insurance under this bid shall conform to Jefferson Parish Resolution No. 113646 or No. 113647, as applicable. Contractors may not commence any work under any ensuing contract unless and until all required insurance and associated evidentiary requirements thereto have been met, along with any additional specifications contained in the **Invitation to Bid**. Except as where otherwise precluded by law, the Parish Attorney or his designee, with the concurrence of the Director of Risk Management or his designee, may agree on a case-by-case basis, to deviate from Jefferson Parish's standard insurance requirements, as provided in this Section. Vendors requesting deviation therefrom shall submit such requests in writing, along with compelling substantiation, to the Purchasing Department prior to the bid's due date. Any changes to the insurance requirements will be reflected in the bid specifications and addenda. Prior to contract execution and at all times thereafter during the term of such contract, contractors must provide and continuously maintain all coverages as required by the foregoing Resolutions, and the contract documents. Failure to do so shall be grounds for suspension, discontinuation or termination of the contract.

---

For bidding purposes, bidders must submit with bid submission a current (valid) insurance certificate evidencing the required coverages. Failure to comply will cause bid to be rejected. The current insurance certificate will be used for proof of insurance at time of evaluation. Thereafter, and prior to contract execution, the low bidder will be required to provide final insurance certificates to the Parish which shall name **the Jefferson Parish, its Districts Departments and Agencies under the direction of the Parish President and the Parish Council** as additional insureds regarding negligence by the contractor for the Commercial General Liability and the Comprehensive Automobile Liability policies. Additionally, said certificates should reflect the name of the Parish Department receiving goods and services and reference the respective Jefferson Parish bid number.

**All Public Work Projects are required to use the Louisiana Uniform Public Work Bid Form**

All prices must be held firm unless an escalation provision is requested in this bid. Jefferson Parish will allow one escalation during the term of the contract, which may not exceed the U.S. Bureau of Labor Statistics National Index for all Urban Consumers, unadjusted 12 month figure. The most recently published figure issued at the time an adjustment is requested will be used. A request must be made in writing by the vendor, and the escalation will only be applied to purchases made after the request is made.

Are you requesting an escalation provision?

YES \_\_\_\_\_ NO \_\_\_\_\_

MAXIMUM ESCALATION PERCENTAGE REQUESTED \_\_\_\_\_%

INITIAL BID PRICES WILL REMAIN FIRM THROUGH THE DATE OF \_\_\_\_\_.

The initial price and the escalation will be used to calculate the total bid price. It will be assumed, for comparison of prices only, that an equal amount of material or labor is purchased each month throughout the entire contract.

## **PERIOD OF AGREEMENT**

The term of the contract shall be for two (2) years.

## **INVOICING**

Bid pricing shall be provided on a monthly basis for the maintenance work outlined in these specifications. The Contractor shall submit an invoice once per month based on the unit pricing, for a total of twenty four (24) equal payments for the life of the contract. Any approved incidental work shall be invoiced separately from the monthly maintenance cost and can be submitted any time after the work is accepted as complete by Parkways. If the Contractor takes nine (9) calendar days to complete the task, he may be penalized up to \$400.00 for the delayed completion.

## **PART I QUALIFICATIONS**

The following are standards, tests, and recommended methods that shall apply to this work:

- Occupational Safety and Health Administration (OSHA)
- Louisiana Department of Agriculture & Forestry (LDAF)

The frequency shall be: a minimum of one (1) cut per every seven (7) days or once every week during the period of March 1 through October 31, and one (1) time per every two (2) weeks or fourteen (14) calendar days during the period of November 1 through February 28 (29) for the entire contract period. The grass shall be cut to a height of between a minimum of 1" (one inch) and a maximum of 2" (two inches) exposure. It is the Contractor's responsibility to visit each location to determine the quantity of turf to be cut. A total of forty three (43) cuts is required in calendar year.

Cutting shall be performed to such a manner to leave the Site with a smooth, level cut on the grass, conforming to the existing grade. No gouging, scalping or similar actions shall be permitted. All trash and debris must be removed from the Site prior to grass cutting.

Grass cutting may be accomplished utilizing push mowing units or ride on mowing units depending on the areas to be cut and the proximity of objects to the cutting areas.
