UNPREDICTABLE MARKET CHANGE

In the event of an unpredictable change in the market that affects the then current contract price, the Vendor may submit justification for a price adjustment. The Purchasing Agent will review the justification and determine applicable price adjustment. Upon return to normal market conditions, the price will be adjusted to the price established by the original contract terms.

The Purchasing Agent will be the final authority on any price adjustment due to unpredictable market change.

PRICE ADJUSTMENT

Price increases may only be requested by the Vendor within 30-days prior to the annual anniversary date of the contract. Failure to do so may result in the denial of any increase requested.

Price increases will be applied to the unit pricing or lump sum pricing in the Contract as a percentage increase. The increased rate will be based upon mutual consent of the Vendor and the Purchasing Agent, however, the Purchasing Agent will evaluate the Vendor's performance, services and records documentation to determine the appropriateness of the increase requested.

VEGETATION MANAGEMENT SPECIALIST, INC.

PO BOX 213

DUSON LA 70529

VEGETATION MANAGEMENT SPECIALIST INC.

As an alternative to the proposed bid VMSI is also submitting a cost per round per ward for herbicide application. We believe that this will save the Parish money as they will only pay for what they need and not any overages that have to be considered when adhering to a lump sum price. Generally VMSI performs 3-4 applications depending on the weather that year.

Price list per application round:

Ward 1 - \$3,430.00

Ward 2 - \$11,800.00

Ward 3 - \$7,045.00

Ward 4 - \$5,390.00

Ward 5 - \$6,545.00

VEGETATION MANAGEMENT SPECIALIST INC.

VMSI proposes to implement an innovative Vegetation Management Program for road shoulder spraying. The purpose of this new program is to more effectively control invasive and noxious plant species. Herbicide use will occur on this vegetation while having no impact on vegetation outside of the targeted zones. Invasive species and noxious weeds are a common sight alongside roadways and this multi faceted program will help alleviate these unwanted weeds.

VMSI will use a combination of Glyphosate, 2-4D, Plateau, Method and Esplanade herbicides at different intervals throughout the year in order to achieve the above mentioned program.
