

Bid No. 50-00147261 - Three (3) Year Contract to Provide Music Compact Discs for the Jefferson Parish Department of Libraries

Section 1.0 Specifications

Our eCommerce website (<https://www.midwesttape.com>) is the main point of purchase for all physical and digital audiovisual materials. The site brings together collections of today's trending and top-selling titles; pre-release collections; and collections featuring adult, young adult, and children's titles. Scrolling banner carousels are designed by Midwest Tape's collection development experts. Our website is continually updated throughout the business day. We welcome the evaluation committee's review of our user-friendly website with the following login combinations during the months of March and April:

March: Username: mwtguest2025
Password: KjxXtYSp!

April: Username: mwtguest2025
Password: U9SMbZjq!

Midwest Tape purchases from over 3,000 + music studios with over 125,000 + unique Music titles available. Our Purchasing and Marketing Department work daily to acquire new studios and titles, adding to our ever-growing database.

Previously called Customized Standing Orders (CSOs), myCARTS is a free service provided by Midwest Tape that is contract-free and saves the library time with collection development. Our team of specialists works with the library's staff to create a profile around the needs of the library, ensuring that selection lists include the most relevant titles. Selection lists are placed in a cart under the required user's login on our website and an email is sent to that user notifying them of the cart's availability. Selectors are in complete control of the ordering of that cart (as a whole) or can adjust quantities or add/remove titles from the cart as needed.

Previously called Customized Standing Orders (CSOs), our contract-free *myCARTS* program feature:

- Pre-publication title notification
- Customized and obligation-free carts uploaded to your account.
- Easy to manage carts with adjustable branch distributions and fund codes
- Flexible quantities based on box office gross, Billboard chart positions, and the New York Times Best Sellers list
- Free vendor records available
- Free of charge

With our myCARTS program, the library has complete control over this process. CD Music notifications occur 2 – 3 months prior to release date. This enables us to continually increase “on order” quantities with the studios and publisher.

Bid No. 50-00147261 - Three (3) Year Contract to Provide Music Compact Discs for the Jefferson Parish Department of Libraries

This program is significantly different than comparable programs from other distributors.

- Collection lists of suggested titles only
- No obligation to order
- Flexibility to adjust your specifications at any time
- Email updates sent to you every two weeks
- Vendor records of all myCARTS titles are available at no charge
- Selected titles are placed in shopping carts that are not ordered without your approval
- You can adjust quantities, create branch distribution, and add fund codes and more... before you submit an order. The library is complete control.
- Titles are offered in the cart in advance of the street date
- Choose the number of copies of each title by box office gross for movies, Billboard chart position for music or New York Times Best Selling list for Audio books
- No minimums
- No contracts

For our Music CD myCARTS program it features plans that offer something for everyone:

- Hit Makers and Must-Have Music - pre-street date titles from bestselling artists
- Chart Toppers, Country Chart Toppers, and Latin Chart Toppers; post-street date titles from today's Billboard charts
- Monthly Plans - Classical, Christian, Greatest Hits, K-Pop, Soundtracks, Stage Musicals, Adult Series and more...
- Seasonal Plans - Best Albums of the Year, Award Nominees and Winners, and Adult Holiday Music
- Children's monthly and seasonal plans including Children's Holiday, Latin, Parents' Choice and Children's Series titles

All suggestion lists are transmitted in shopping cart form with location and collection codes provided. We will work with your library team members to design the selection list profiles around these requirements. Each cart provided has the capability to have our free vendor records uploaded into the library's ILS acquisitions module and catalog.

Of the many carts/plans offered within the myCARTS program, there will be some instances where a title may be presented for a second time, but our website's duplicate checks will keep the user informed.

A single discount profile for our Music offering is provided to the Jefferson Parish Library and is indicated on the required Bid Pricing Form.

All shipments of Music on Compact Discs to the Jefferson Parish Library will be sent free from any shipping charges, regardless of order size.

Bid No. 50-00147261 - Three (3) Year Contract to Provide Music Compact Discs for the Jefferson Parish Department of Libraries

Section 2.0 Ordering

When ordering exclusively through our eCommerce site, our library partners utilize our website for their collection development processes. They can browse and select titles as needed, placing them into shopping carts. Once the selector chooses a title from the list of options, the Add to Cart box can be clicked to reveal a list of available carts and allows for the quantity to be adjusted as needed. The user can also create a new cart from this point quickly and easily. When ready to place the order, the user simply selects Place Order. The user's profile is linked to their account via our SAP-backed ordering system and the order is placed.

When applicable, users can adjust branch distributions and fund options to be applied to titles individually or to the entire cart—along with any title and/or cart instructions—based on custom library-based needs for processing specifications.

Taking this simple process one step further, Midwest Tape works with all major integrated library systems (ILS, such as Sierra, Horizon, Symphony, Polaris, Carl-X, Koha, and Evergreen) to streamline the creation of order records by adding free custom 9xx tags to free Midwest Tape downloadable vendor records. Midwest Tape offers electronic ordering and invoicing as an option with most ILS partners.

Using vendor records for the items in carts eliminates hand-creating orders in the library's system. Using information the library provides; we program the additional order record tags attached to the downloaded vendor records. These order record tags vary by ILS, but the tag itself is usually found in the 900s. This 9xx tag will carry whatever fund (budget), location, collection code, pricing information, and note fields the library requires.

- We support both EDIFACT (including enriched EDIFACT) and X12 formats for EDI (electronic data interchange).
- The option to place orders via EDI is most advantageous to libraries who wish to receive EDI invoices. Only items ordered electronically can be invoiced electronically.
- Electronic ordering and invoicing are available free of charge.

With EDI ordering, libraries can use whatever ordering method they normally use within their ILS. For most EDI customers, this consists of creating carts on the Midwest Tape website and then downloading free vendor order records complete with fund and location information for the titles they order. These records are imported into the ILS to create the order within the library's ILS.

Once the order exists in the library's ILS, it can then be sent to us using EDI. The order is transmitted electronically via FTP (File Transfer Protocol) and arrives on our server, which imports it into our system as an order. When the EDI order successfully imports into our system, the library receives an order acknowledgment verifying the ordered titles. Once the acknowledgment has been received, the library goes back to our website and deletes the original cart. This eliminates

Bid No. 50-00147261 - Three (3) Year Contract to Provide Music Compact Discs for the Jefferson Parish Department of Libraries

duplicate ordering. Please note that, while deleted carts are not available for reordering, they are still available for viewing on our website.

Once received in our system, we handle the order as usual, applying any additional services (such as processing) that the library has designated. We invoice the items as they ship. The library still receives a paper invoice in their package; libraries that request electronic invoicing, will also receive an electronic invoice via FTP shortly after shipping, which will be uploaded into the library's system.

The Midwest Tape website offers a swift, easy-to-use ordering process for our catalog of more than 330,000 audiovisual format titles. It is the most advanced service available, offering a wealth of title sourcing options, management modules, a unique collection generation tool, sophisticated duplicate-order prevention tools, and outstanding cart building tools. The site provides *free, unlimited logins* for your selectors and other designated staff. There are *no costs associated with the use of our website* (no annual fees and no hourly charges) or our collection development support.

Our website is the main resource for selection services. Your team can select titles, place them in carts, share the cart with other staff members for input, or send carts to central buyers. The site offers a variety of collections that feature not only today's new and upcoming releases, but also catalog titles, collections of relevant titles pertaining to social concerns, and topics of library or community interest. These features save your team members time when building your collection. On our homepage, the Quick Links section provides access to hot new releases, hit children's titles, a monthly calendar of upcoming releases, and our ever-popular Cat2Cart collection, which makes it easy to add titles featured in our monthly print catalog to a shopping cart. Scrolling carousel banners are updated continuously and feature collections such as award winners, specially priced items, holiday favorites, top selling titles, and digital weekly catalogs.

Section 3.0 Shipping and Billing Procedures

To ensure your library receives street-dated materials in advance, our warehouse program takes into consideration the shipping time it takes from our single warehouse location in Holland, Ohio, to Jefferson Parish. Shipping is free of charge for all orders placed by your library. UPS tracking information can be provided via email following shipment. To confirm the library's desire for this service we ask that they contact our Customer Service team to set up for the next agreement term.

All materials are checked four times in the packaging and shipping process to ensure order accuracy. Material is checked by the staff pulling orders from inventory; Material is checked again for order accuracy by the processing tables which prepare the orders according to the account specification; Material is scanned with a bar code reading system to ensure a match to the packing slip at the Postproduction stage as it prepares to be packaged and finally, the material is visually

Bid No. 50-00147261 - Three (3) Year Contract to Provide Music Compact Discs for the Jefferson Parish Department of Libraries

inspected by the shippers as they pack the boxes.

Should the library discover a damaged or defective item, we will rectify the situation immediately with a no-charge replacement. It is best to contact your library's assigned Processing Support Specialist, Trey Jones, to ensure prompt resolution to the issue. He can be contacted 8:30 a.m. to 5:00 p.m. EST at 800-875-2785. The library's product will be corrected, or the new product will be issued promptly. Following the library's satisfaction that the issue has been resolved, our staff will determine what could have caused the problem initially and put measures to ensure it does not occur again.

Midwest Tape does not ship partial orders of titles. When a title is ordered, all copies of that title will be shipped. The only exception to this would be if the library placed subsequent order of the title on a separate purchase order number.

It takes approximately 7 - 10 business days, from the time of order of in-stock materials, to process and ship your library's order.

Midwest Tape uses new boxes for each shipment. Our system is designed to provide the most accurately sized box for the contents to best protect the material in transit, to keep it organized to facilitate receiving, and to minimize the number of materials required. Recycled packing paper is used to pack the material and corner protectors are used to secure the product in place. If multiple box shipments are being provided to the library, each box is marked appropriately to alert the library's receiving department as to how many boxes to expect within a shipment.

Each shipment will contain both a packing slip and the required multiple copies of the invoice. Any box containing the invoice or packing slip can be marked as such. If the library specifies accounts for services such as MARC Records orders, Rush Orders, Non-Processed, Processed product, those boxes are marked appropriately and can be tagged with special labels to provide the expediting of materials for the library.

Our invoices have all pertinent data requested by the library such as title, ISBN (where applicable), order date, list price, net price, and invoice date.

Invoices are provided to the library in several methods:

- An original invoice can be provided in the shipping carton with the box clearly identified noting the document enclosed. Additional copies (2 or more) of this invoice can be provided at the time of shipment if required by the library.
- Invoices can also be emailed at the time the product is invoiced at Midwest Tape if needed. This invoice is provided just prior to the items being manifested through our UPS system. This allows the library early notification of the shipment to prepare library staff. (We have determined that shipments to Jefferson Parish Library take approximately 2 – 3 business days from the time they leave our single warehouse in Holland, Ohio.)

Bid No. 50-00147261 - Three (3) Year Contract to Provide Music Compact Discs for the Jefferson Parish Department of Libraries

- Electronic invoicing services are available for our SirsiDynix Symphony ILS customers, if desired. Our staff would be happy to provide the free set up and support needed to provide this valuable service.
- Invoices can also be accessed on our website should the need arise to reprint a copy of an invoice.

Section 4.0 Discount

The firm discount profile has been indicated on the Bid Pricing Form as requested.

The Jefferson Parish Library incurs no freight charges for any order placed with Midwest Tape.

Section 5.0 Bid Award

Midwest Tape understands that the Parish desires to base the award on total price.

The library has free access to our website, free customized selection lists, free vendor level records, free ILS integration, free customer support, free industry news and updates along with hassle-free product returns providing true value to your library.

Section 6.0 Cataloging

Midwest Tape offers a variety of cataloging services ranging from free vendor records to fully customized cataloging. We provide MARC records through a unique relationship with OCLC that has lasted for over a decade and supports the creation of efficient cataloging workflows and sharing of data. Midwest Tape has originated nearly all new DVD records for the past five years and provided these different levels of cataloging services to more than 2,500 individual libraries. We delivered over a million order records and over 374,000 OCLC MARC records in just the past year.

Jefferson Parish Library will work directly with Midwest Tape for all levels of cataloging services, including the transmission of records, billing of MARC services, set up services, and resolution to any cataloging error. OCLC provides support and enhancement of information.

Our content team continually monitors studio and publisher websites for upcoming releases and/or re-releases of popular materials. They also use their industry knowledge to follow trends and monitor award winners, predicted sales trends, overall popularity, and more. Our data entry team (including three MLS librarians with specialization in audiovisual materials) creates what are called Level K records directly in WorldCat (when no current record exists). OCLC then completes the final enhancement of the record, including the assignment of a unique OCLC number to each title. We have developed an exclusive website linking our data entry team directly to the team at OCLC. This specialized website allows title information—including the front, spine, and back scanned artwork images—to quickly and easily be added to the record.

Bid No. 50-00147261 - Three (3) Year Contract to Provide Music Compact Discs for the Jefferson Parish Department of Libraries

There are several levels of MARC records available to the library from Midwest Tape:

Vendor MARC records (free of charge): Records can be downloaded directly from our website at the time of order with specialized 9xx order tag programming available for more efficient loading. (Please see Attachment A for a free Vendor MARC record sample.)

Full MARC records (\$1.40 per title): The mostly commonly used record level for audiovisual materials, full MARC records are a valuable add-on to the Midwest Tape-created Level K record and are completed by OCLC. These records save time and money; however, they are not tailored to local cataloging practices. Many libraries apply their own local cataloging practices when they receive this record. (Please see Attachment B for a full MARC record sample.)

Please note that all levels of records are charged per title, not per item. The only additional per-item charge for our cataloging services is the linking of barcode information into 949 (or other ILS-designated tag) at an additional cost of \$0.30 per item tag.

All levels of MARC records can be transmitted via FTP or other agreed upon method. FTP transmission is our most popular method, as an email notification is sent once the files are ready on the dedicated FTP site. All files are delivered before the product shipment.

Section 7.0 Processing

Midwest Tape can provide the required processing services for the Jefferson Parish Library. We offer digital processing called VIP (Variable Integrated Processing) (see Attachment C). The benefits include perfect label placement every time, deters theft, and it saves the library the expense of creating labels and the labor costs associated with the processing.

Hand-application of vendor supplied RFID disc overlays and tags can be provided and the cost is noted on the Bid Pricing Form.

Midwest Tape can offer a Full Level OCLC MARC Record for \$1.40 per title. Any additional per item charge, in terms of cataloging, are item tag linking service in the 949 tag (or other designated tag location) at the cost of only \$0.30.

Midwest Tape has enjoyed an excellent partnership with the Jefferson Parish Library for many years and has striven throughout this time to provide the library with a high level of products and services to best meet their needs.

Our discounts are competitive, but it is our value-added services and programs that create unprecedented value for our customers. We would be pleased to provide this value to your Library.

Bid No. 50-00147261 - Three (3) Year Contract to Provide Music
Compact Discs for the Jefferson Parish Department of Libraries

We look forward to an opportunity to fully explain any areas of our response, our audiovisual offering and our value-added services in depth to the library or evaluation committee.

The following team stands ready to provide you with support in any aspect of our response:
