BID FORM
Non Public Works

All Public Work Projects are required to use the Louisiana Uniform Public Work Bid Form

All prices must be held firm unless an escalation provision is requested in this bid. Jefferson Parish will allow one escalation during the term of the contract, which may not exceed the U.S. Bureau of Labor Statistics National Index for all Urban Consumers, unadjusted 12 month figure. The most recently published figure issued at the time an adjustment is requested will be used. A request must be made in writing by the vendor, and the escalation will only be applied to purchases made after the request is made.

Are you requesting an escalation provision?

YES ☒ NO ☐

MAXIMUM ESCALATION PERCENTAGE REQUESTED 5 %

INITIAL BID PRICES WILL REMAIN FIRM THROUGH THE DATE OF JULY 01, 2025

For the purposes of comparison of bids when an escalation provision is requested, Jefferson Parish will apply the maximum escalation percentage quoted by the bidder to the period to which it is applied in the bid. The initial price and the escalation will be used to calculate the total bid price. It will be assumed, for comparison of prices only, that an equal amount of material or labor is purchased each month throughout the entire contract.

TRUCKS BUILT JUST RIGHT FOR YOUR EVERY NEED.

From torque, payload and application options to our highly advanced and versatile Diamond Logic® electrical system, MY Series trucks expand the ability to get big things done. When someone's stranded, something is broken, needs to be hooked up, cut down or cleaned out, these trucks churn with productivity. Choose from two proven Cummins engines, three cab sizes and a 4x2 or 6x4 axle configuration. Then select the exact specifications to suit your job. The MY Series can conform to your needs.

DRIVERFIRST™ — THINK OF IT AS A 360-HP CORNER OFFICE.

Welcome to the ultimate seat of power. Inside the MV™ Series is a command center designed around the driver. Comfort. Visibility. Safety. Room for a third front passenger without knocking their knees. Plus, the stalk shifter allows for shifting and application of the Jacobs brake without taking your eyes off the road ahead. It comes from talking to real drivers. Listening to their needs. And designing a truck around their priorities — a philosophy we call DriverFirst.

This driver-centric approach starts with a cavernous cab and with meticulous attention to every detail. There's a powerful HVAC system to keep you cool while on the job. Controls and switches are easy to find, reach and operate, even when wearing gloves. A redesigned hood enhances visibility. Door-mounted mirrors are positioned to see more while turning your head less to reduce fatigue. Even the air horn banyard is placed exactly where drivers told us it should be.

ADVANTAGES YOU CAN SEE CLEARLY.

Upline is much more than simply being able to work – it also requires giving drivers the tools they need to be seriously productive. It's why the MY™ Series instrument cluster is tested, refined and then tested again to ensure optimal readability, usability and positioning. It's also why color, illumination, legibility and even gauge size is designed to deliver optimal viewing in varying light conditions.

THE GOAL? IMMEDIATE RECOGNITION, LESS DISTRACTION, AND MORE DRIVER ALERTNESS AND CONFIDENCE.

CUMMINS® / B6.7

Every aspect of the B6.7 has been engineered for reliability, durability and fuel efficiency to deliver the lowest cost of ownership for your fleet. Add industry-leading service from International Cummins, plus a three-year, unlimited mileage engine warranty, and it's easy to see why the B6.7 is the best-selling engine in the medium-duty truck market.

CUMMINS® / L9

The Cummins L9 has established a solid reputation as a dependable engine for medium duty applications. Its rugged design and proven performance, combined with its proven powertrain operation. This Turbocharged (TGT), means the L9 has the highest power density of any engine in its class. In addition, replaceable wet sleeves help make the L9 easier and less expensive to rebuild, plus heavy-duty roller followers, bypass oil filtration and targeted piston cooling all contribute to longer service life.
