**RE: REQUEST FOR QUALIFICATIONS TO PROVIDE ROUTINE ENGINEERING SERVICES FOR  
WATER PROJECTS IN JEFFERSON PARISH (RESOLUTION NO. 144203)**

Dear Consultant Selection Committee,

G.E.C., Inc. (GEC) is pleased to present our proposal in response to Jefferson Parish's request for qualifications for the referenced services. Our proposal is compliant with the RFQ instructions and demonstrates our ability to successfully deliver professional services. GEC (EF.0001917) is licensed to perform and complete professional services in the State of Louisiana through the Louisiana Professional Engineering and Land Surveying Board.

**COMPANY HISTORY**

---

Established in 1986, GEC has more than 130 employees and a long history of experience with similar projects. GEC offers comprehensive, multidisciplinary project planning, design, and implementation services for public and private clients nationwide. The diverse resources of the company include design and construction engineering, economic analysis, environmental and ecological sciences, and GIS applications. We commit to producing high quality planning and design documents on time and within budget in keeping with the special needs of our clients so they can meet their objectives in a timely and efficient manner. Many of the GEC personnel assigned to this contract have more than 10 years of experience providing similar services.

GEC is committed to providing responsive engineering and technical solutions for our clients. As the proposed Professional-in-Charge for this assignment, I will work to provide innovative, safe, environmentally responsible, and transparent professional services. We appreciate the opportunity to present our qualifications to Jefferson Parish for this as-needed contract.

Sincerely,

A handwritten signature in blue ink that reads 'Many Heymann'.

Many Heymann, PE  
Vice President, G.E.C., Inc

## TEC PROFESSIONAL SERVICES QUESTIONNAIRE

### A. PROJECT NAME AND ADVERTISEMENT RESOLUTION NUMBER:

**Routine Engineering Services for Water Projects in Jefferson Parish**  
(Resolution No. 144203 | SOQ No. 24-013)

### B. FIRM NAME & ADDRESS WHERE PROJECT WORK WILL BE PERFORMED:

**G.E.C., Inc. (GEC)**  
3501 N. Causeway Blvd., Suite 210  
Metairie, Louisiana 70002

### C. NAME, TITLE AND CONTACT INFORMATION OF PRINCIPAL, AS DEFINED IN SECTION 2-926 OF THE JEFFERSON PARISH CODE OF ORDINANCES, WHO IS A REGISTERED, LICENSED ARCHITECT, PROFESSIONAL ENGINEER, OR SURVEYOR IN THE STATE OF LOUISIANA:

**Sherri LeBas, PE**, Senior Vice President  
P. (225) 612-3000 E. slebas@gecinc.com  
Louisiana Licensed Professional Civil Engineer No. 23844 (1990)

### D. NAME AND CONTACT INFORMATION OF EMPLOYEE WHO IS A REGISTERED AND LICENSED ARCHITECT, PROFESSIONAL ENGINEER, OR SURVEYOR IN THE STATE OF LOUISIANA IN THE APPLICABLE DISCIPLINE. A SUBCONTRACTOR MAY BE SUBSTITUTED HERE ONLY IF THE ADVERTISED PROJECT REQUIRES MORE THAN ONE DISCIPLINE.

**Many Heymann, PE**, Vice President  
P. (504) 838-6009 E. mheyman@gecinc.com  
Louisiana Licensed Professional Civil Engineer No. 35554 (2010)

### E. PLEASE PROVIDE THE NUMBER OF EMPLOYEES WHOSE PRIMARY FUNCTION CORRESPONDS WITH EACH CATEGORY:

PROFESSIONAL IN CHARGE OF PROJECT:

NAME & TITLE:

**MANY HEYMANN, PE**, Vice President of Operations

PROJECT ASSIGNMENT:

Professional-in-Charge

NAME OF FIRM WITH WHICH ASSOCIATED:

**G.E.C., INC.**

YEARS' EXPERIENCE WITH THIS FIRM:

1 (21 total)

EDUCATION: DEGREE(S)/YEAR/SPECIALIZATION:

B.S. / 2002 / Chemical Engineering

ACTIVE REGISTRATION: YEAR FIRST REGISTERED/DISCIPLINE:

2010 / Licensed Professional Civil and Environmental Engineer No. 35554

OTHER EXPERIENCE AND QUALIFICATIONS RELEVANT TO THE PROPOSED PROJECT:

Mr. Heymann has been a Civil Engineer for over 20 years and is responsible for the design and oversight of water distribution projects, roadway projects, drainage projects, sewer system projects, and construction projects. His experience includes the development of cost estimates, quantity calculations, drainage design, geometric design, erosion control, maintenance-of-traffic, grading plans, preparation of construction documents, and construction management.

### RELEVANT PROJECT EXPERIENCE

**WATER SYSTEM PIPELINE ASSESSMENT AND NEAR-TERM (5-YEAR) PLAN, N-Y ASSOCIATES:** Jefferson Parish, LA. Project Principal - Mr. Heymann was the Project Principal for the assessment of Jefferson Parish's existing water system to develop and provide a 5-year plan defining critical areas requiring replacement within the Parish's water system. The scope of work consists of evaluating and determining problem areas within the Parish's water system through interviews with Parish workers, GIS records, and existing water models received from the Parish. Once a full assessment has been completed, we developed a

prioritized list of probable water main failures, including transmission and distribution mains. Additional analysis was completed to provide Jefferson Parish with rough orders of magnitude associated with the construction cost to replace the assessed mains recommended for replacement and a written report documented the years in which mains should be replaced. (2021-2022)

**WATER STRATEGIC PLAN, CITY OF KENNER:** Kenner, LA. Project Principal - Mr. Heymann was the Project Principal for the water strategic plan for the City of Kenner's existing water system. The scope of work consisted of analyzing the City of Kenner's existing water system and providing goals, needs and methodology for upgrades to the City's existing water system by working with the City of Kenner to fully understand their current needs and what will be needed in the future. (2021-2022)

**IRIS AVENUE WATERLINE REPLACEMENT FROM RIVER ROAD TO JEFFERSON HIGHWAY:** Jefferson Parish, LA. Project Manager - Mr. Heymann was the Project Manager for design services for the replacement of 3,500 feet of 12" PVC-C-900 waterline and associated street repairs.

## TEC PROFESSIONAL SERVICES QUESTIONNAIRE

NAME & TITLE:

**MANY HEYMANN, PE, *Continued Resume***

OTHER EXPERIENCE AND QUALIFICATIONS RELEVANT TO THE PROPOSED PROJECT:

The project also included resident inspection services.

**DAVANT WATERLINE REPLACEMENT:** Plaquemines Parish, LA. Project Manager - Provided design services for the replacement of 7,900 feet of 8" Cast Iron/AC waterline with 12" PVC C900.

**BOURBON STREET REHABILITATION (PHASES 1 AND 2), CITY OF NEW ORLEANS:** New Orleans, LA. Project Director - Mr. Heymann provided design services and oversight for the repair and rehabilitation of eight (8) blocks of Bourbon Street including underground infrastructure from Canal Street to Dumaine St. Scope of work included coordinating and sequencing construction after engaging the City of New Orleans, Department of Public Works, Sewerage and Water Board of New Orleans, Entergy, AT&T and Cox. Because many of the existing utilities are well over 100 years old, the work for this project included upsizing the existing storm water collection system, replacing the existing water lines, repairing the existing sewer lines, replacing, and improving the existing low-pressure gas lines, replacing the existing underground electrical conduits, and replacing the existing roadway pavement, brick sidewalks and granite curbs. (2017-2021)

**ST. ANN STREET REHABILITATION (BOURBON STREET TO DAUPHINE STREET), CITY OF NEW ORLEANS:** New Orleans, LA. Project Director and Responsible Charge Engineer - Mr. Heymann provided project management and plan development services for the full reconstruction of St. Ann Street surface and subsurface infrastructure from Bourbon Street to Dauphine Street. The project required close coordination for an accelerated design as a result of the existing sewer system being in poor condition causing large subsurface voids beneath the existing roadway. The sequence of construction was also developed while engaging the City of New Orleans, Department of Public Works, the Sewerage and Water Board of New Orleans, AT&T, Entergy Gas and Electric, residents, business owners, utilities, and contractors. (2019-2021)

**CONTI STREET REHABILITATION (BOURBON STREET TO CHARTRES STREET), CITY OF NEW ORLEANS:** New Orleans, LA. Project Director and Responsible Charge Engineer - Mr. Heymann provided plan development services for the full reconstruction of Conti Street surface and subsurface infrastructure from Bourbon Street to Chartres Street. Services included engineering design, and construction administration. The project required the coordinating of the design and sequenced construction after engaging the City of New Orleans, Department of Public Works, the Sewerage and Water Board of New Orleans, AT&T, Entergy Gas and Electric, residents, business owners, utilities, and contractors. (2019-2023)

**OLD SPANISH TRAIL (NOTTINGHAM DR. TO SHERWOOD DR.), CITY OF NEW ORLEANS:** New Orleans, LA. Engineer - Mr. Heymann was responsible for the provided plan services for the reconstruction of Old Spanish Trail (Nottingham Dr. to Sherwood Dr.) surface and subsurface infrastructure from Nottingham Drive to Sherwood Drive. Scope of work also included bidding, construction administration and resident inspection. (2012-2022)

**MILNEBURG (GROUP A), RR130, CITY OF NEW ORLEANS:** New Orleans, LA. Engineer - Mr. Heymann was responsible for the design and surveying services for FEMA-eligible street repairs at the Milneburg neighborhood. Field surveys were conducted to identify locations and extents of damage that has occurred as a result of Hurricane Katrina and related cleanup operations. Data was provided detailing features to be reconstructed in order to obtain FEMA funds. The project scope of work includes conducting topographic and boundary surveys, developing preliminary design plans, final plans and specifications, and bid documents for use in the reconstruction of damaged roadways, curbs, utilities, and driveways. Responsibilities included coordinating with utility owners and providing construction administration services. (2017-2023)

# TEC PROFESSIONAL SERVICES QUESTIONNAIRE

KEY PERSON, SPECIALIST, OR INDIVIDUAL CONSULTANT:

NAME & TITLE:

**ELIZABETH GUIZA, PE**, Sr Manager of Engineering GNO

PROJECT ASSIGNMENT:

Civil Engineer

NAME OF FIRM WITH WHICH ASSOCIATED:

**G.E.C., INC.**

YEARS' EXPERIENCE WITH THIS FIRM:

1 (13 total)

EDUCATION: DEGREE(S)/YEAR/SPECIALIZATION:

B.S. / 2010 / Civil Engineering

ACTIVE REGISTRATION: YEAR FIRST REGISTERED/DISCIPLINE:

2015 / Louisiana Licensed Professional Civil Engineer No. 39531

OTHER EXPERIENCE AND QUALIFICATIONS RELEVANT TO THE PROPOSED PROJECT:

Ms. Guiza provides engineering support for a range of projects including water systems, sewer systems, civil/site developments, tunnel inspection, tunnel rehabilitation, gravity stormwater systems, and roadway construction. Ms. Guiza is experienced in the development of cost estimates, quantity calculations, drainage design, retention pond design, stormwater management plans, geometric design, erosion control, canal bank stabilization, maintenance-of-traffic, preparation of specifications, and construction management

## RELEVANT PROJECT EXPERIENCE

**H.010673 / US90Z, HARVEY CANAL TUNNEL REHABILITATION:** Jefferson Parish, Louisiana. Project Engineer - Ms. Guiza serves as Project Engineer responsible for the engineering and inspection services (CE&I) of the Harvey Canal Tunnel Rehabilitation Project. She manages inspection staff working to oversee the contractor's construction operations to ensure that all work is performed in accordance with the plans and specifications and using approved materials. For unforeseen conditions which may require field engineering, Ms. Guiza provides design services. (06/23-Present)

**NEW ORLEANS SEWERAGE AND WATER BOARD - FEMA WATERLINE REHABILITATION AT ST. ANTHONY**

**AND DILLARD NEIGHBORHOODS:** New Orleans, LA. Project Engineer - The project scope includes developing preliminary design plans, final plans and specifications, bid documents, and construction administration for the design of 30,000LF of waterlines in New Orleans. Ms. Guiza's responsibilities included horizontal and vertical layout of waterlines, providing an opinion of probable cost and construction administration.

**IRIS AVENUE WATERLINE REPLACEMENT FROM RIVER ROAD TO JEFFERSON HIGHWAY, JEFFERSON PARISH:** Jefferson Parish, LA. Engineering Intern - Project involved design services for the replacement of 3,500 feet of 12" PVC-C-900 waterline and associated street repairs. Ms. Guiza's responsibilities included horizontal and vertical layout of waterlines, providing an opinion of probable and construction administration.

**BOURBON STREET REHABILITATION, CITY OF NEW ORLEANS:** New Orleans, LA. Engineer - Because many of the existing utilities are well over 100 years old, the work for this project included upsizing the existing drain lines, replacing the existing water lines, repairing the existing sewer lines, replacing, and improving the existing low-pressure gas lines, replacing the existing underground electrical conduits, and replacing the existing pavement

**ELIZABETH GUIZA, PE, *Continued Resume***

OTHER EXPERIENCE AND QUALIFICATIONS RELEVANT TO THE PROPOSED PROJECT:

**FEMA STREET REPAIRS AT MILNEBURG, CITY OF NEW ORLEANS:** New Orleans, LA. Project Engineer - Engineer for professional engineering design and surveying services for FEMA-eligible street repairs. The project scopes of work included conducting topographic and boundary surveys, developing preliminary design plans, final plans and specifications, and bid documents for use in the reconstruction of damaged roadways, curbs, drainage, utilities, and driveways for approximately 18 linear miles of roadways. Ms. Guiza conducted detailed field assessments to identify locations and extents of damage that has occurred as a result of Hurricane Katrina. Ms. Guiza was responsible for compiling and organizing the data to present to our client along with recommendations for repair and reconstruction in order to obtain FEMA funds. Additional responsibilities include engineering design for all civil aspects including pavement design, coordination with utility owners, opinion of probable cost and providing construction administration services. (2017-2023)

**FEMA STREET REPAIRS AT LAKE TERRACE AND LAKE OAKS NEIGHBORHOODS, CITY OF NEW ORLEANS:** New Orleans, LA. Engineer Intern – Ms. Guiza was an Intern for professional engineering design and surveying services for FEMA-eligible street repairs. The project scopes of work include conducting topographic and boundary surveys, developing preliminary design plans, final plans and specifications, and bid documents for use in the reconstruction of damaged roadways, curbs, drainage, utilities, and driveways for approximately 8 linear miles of roadways. Ms. Guiza conducted detailed field assessments to identify locations and extents of damage that has occurred as a result of Hurricane Katrina. Ms. Guiza was responsible for compiling and organizing the data to present to our client along with recommendations for repair and reconstruction in order to obtain FEMA funds. Additional responsibilities included engineering design for all civil aspects including pavement design, coordination

with utility owners, opinion of probable cost and providing construction administration services. (2017-2019)

**VETERANS MEMORIAL BOULEVARD WIDENING, LADOTD 742-26-0079:** Kenner, LA. Engineer Intern - The project scope included design services to prepare plans and specifications for the widening of a two lane roadway to a four lane divided roadway. During preliminary design the widening was found to be not feasible. As a result, Veterans Boulevard became an improvement project; including mill and overlay of the existing roadway, reconstructed turnouts, waterline relocation and the replacement of a 20' x 28' bridge over Canal No. 17. The project included horizontal site layout, pavement design, waterline relocation design, and the design of signage, striping, detour and traffic control plans per MUTCD standards. (2012-2015)

**LA 23 / RIVER ROAD INTERSECTION IMPROVEMENTS:** Plaquemines Parish, Port Sulphur, LA. Project Manager - The project scope included topographic survey, geotechnical survey, preliminary design plans, final plans and specifications, bid documents, and construction administration for a new asphalt roadway segment of River Rd., a welcome monument, 60' flag pole, associated lighting and landscaping. Ms. Guiza's responsibilities include project management and engineering design for all civil aspects including horizontal layout of the site, site grading, drainage design, pavement design, cost estimate, required LADOTD and UASCE permitting, signage, striping and utility relocation. (2014-2016)

**BAYOU ST. JOHN (PARK ISLAND) BRIDGE, LADOTD - 713-36-0100, FAP NO. 0200S(391)M:** Orleans Parish, LA. Engineering Intern - Project involved Construction Engineering & Inspection services for this Off-System Bridge, which is a 3 slab span bridge with approach roadways, landscaping, water service, sanitary sewer and related work. This project included the jack and bore of a gravity sewer pipe under Bayou St. John. (2010-2011)

EDUCATION: DEGREE(S)/YEAR/SPECIALIZATION:

B.S. / 1963 / Civil Engineering

ACTIVE REGISTRATION: YEAR FIRST REGISTERED/DISCIPLINE:

1968 / Louisiana Licensed Professional Civil Engineer No. 11591

OTHER EXPERIENCE AND QUALIFICATIONS RELEVANT TO THE PROPOSED PROJECT:

Mr. Klier is a Senior Project Manager with more than 50 years' experience in engineering. He retired in 2004 from the East Baton Rouge City-Parish Department of Public Works (DPW) after 28 years of service. For 20 of those years he served in the Engineering Division where he held the following positions: Project Engineer; Assistant Chief Construction Engineer; Design Engineer; Assistant Chief Engineer; and Chief Engineer. The remaining eight years with DPW included serving as Acting Director of Public Works and Deputy Director of Public Works. Mr. Klier is very knowledgeable about the public bid law requirements, particularly Title 38 of the State of Louisiana Revised Statutes and the State of Louisiana Division of Administration Facility Planning and Control (FP&C) construction document and bidding requirements.

Mr. Klier has managed numerous public works projects involving multi-discipline A/E teams and federal and state agencies. He is a Life Member of the American Society of Civil Engineers (ASCE) and the American Public Works Association (APWA), and has received numerous awards and honors from these professional organizations. Mr. Klier was honored to receive the ASCE Louisiana Section highest award the "Wall of Fame" in 2013. He also represents the ASCE on the official Nominating Committee for the Southeast Louisiana Flood Protection Authority

(SLFPA) East and West Boards, and is the Chairman of the City of Walker, Louisiana Planning and Zoning Commission. He is also a member of the Capital Region Area Floodplain Task-Force (CRAFT) a multi-jurisdictional outreach public awareness program to reduce flooding adverse impacts.

Mr. Klier has worked closely with LADOTD involving designing and constructing sanitary sewer/septic tank effluent collection systems as part of the State highway roadway improvements. Some of these projects included:

- Perkins Road (LA 427) from Lee Drive to Essen Lane
- Old Hammond Highway (LA 426) from Sharp Road to Blvd. De Province
- I-12/Millerville Road Interchange
- Hooper Road (LA 408)/Joor Road (LA 946) Intersection Improvements
- Hooper Road (LA 408) from Mickens Road to Cypress Bayou

## RELEVANT PROJECT EXPERIENCE

**AVOYELLES PARISH PORT COMMISSION:** Simmesport, LA. Project Manager – This project involved the design and construction of Port Infrastructure improvements, namely the construction of a 400,000 gallon elevated water storage tank; water and sanitary sewer line extensions and the construction of a heavy-duty concrete roadway. Mr. Klier was responsible for the engineering design, preparation

OTHER EXPERIENCE AND QUALIFICATIONS RELEVANT TO THE PROPOSED PROJECT:

of the various project drawings, specifications, contract documents, permitting and the public bidding of these improvements. Additionally, Mr. Klier was responsible for the administration of the grants for these improvements from project award to grant closeout. (2015) (City-Parish Project No. 16-DR-CI-0003)

**LAKESHORE VILLAGES & OAK HARBOR EAST UTILITY WATER TREATMENT PLANT EXPANSION:** St.

Tammany Parish, LA. Project Engineer - Includes design of improvements to the Lakeshore Estates development, including adding 450,000 gallon/day (GPD) capacity to the existing 500,000 GPD wastewater treatment plant. The expansion project included a 450,000 GPD extended aeration treatment plant, tertiary filter system, chlorination system, yard piping, and site work. GEC's design of wastewater pumping system consists of ten pumping stations serving 2,950 homes, 600 apartments, and additional commercial development. Planned pump station capacities range from 100 to 480 GPM. (2019-Present)

**SEWER SYSTEM REHABILITATION PROJECT:** Covington, Louisiana. Project Engineer - GEC serves as the Consulting Engineer for the St. Tammany Parish Sewerage District No. 1 (District). The District services approximately 50 residential and 10 commercial customers in Covington, Louisiana. The original sewer system was installed in the 1950s and, as such, the system was in need of rehabilitation. As originally constructed, the lift stations were installed in series from the eastern end of the system to the treatment plant on the western end of the system. GEC designed a new lift station and 5,600 linear feet (LF) of 6" diameter sewer force main. GEC's repair work included point repairs and replacement of 6", 8", and 10" sewer mains, replacement of sewer laterals, and repair of sewer manholes and cleanouts. (2020)

**SANITARY SEWER SYSTEM UPGRADES, SOUTH FORCE MAIN AND GRAVITY SYSTEMS, PUMP STATION 58A, SGC-C-PS58A (STARING LANE – OVERFLOW PS):** Baton

Rouge, LA. Lead Project Civil Engineer – Mr. Klier was the Lead Project Civil Engineer for the new 120 MGD wastewater submersible pumping station on Essen Lane near Ward's Creek. He was responsible for the design of the overall project as well as design of the site plans, yard and force main piping, specifications, and special provisions. Mr. Klier's responsibilities also included coordinating the design of Pump Station 58 between in-house structural and electrical team members and other members of the design team. (2009-2014) (City-Parish 09-PS-US-001)

**SANITARY SEWER SYSTEM UPGRADES, SOUTH FORCE MAIN AND GRAVITY SYSTEMS, BOOSTER PUMP STATION 514 REPLACEMENT (SFL-C-0002 PERKINS/**

**OLD PERKINS SERVICE AREA):** Baton Rouge, LA. Lead Civil Engineer – Mr. Klier was the Lead Civil Engineer for the new 77 MGD wastewater submersible pumping station located near the intersection of Perkins Road and Old Perkins Road. He was responsible for assisting in the design of the overall project as well as the design of site plans, yard and force main piping, and preparing project specifications and special provisions. Mr. Klier's responsibilities also included coordinating the design of Pump Station 514 between in-house structural and electrical team members and other members of the design team. (2009-2015) (City-Parish Project No. 09-PS-MS-0034)

**SANITARY SEWER SYSTEM UPGRADES, NORTH STN FORCE MAIN SANITARY SYSTEM, HIGHWAY 61 - PLANK ROAD MULTIPLE PUMP STATION REPLACEMENT:**

Baton Rouge, LA. Project Manager - Project involved evaluation of 8 wastewater pump stations ranging in size from 350 GPM to 9,000 GPM for replacement. Mr. Klier was responsible for managing project design & hydraulic design, and the preparation of the project drawings, specifications and contract documents for bidding. He was also responsible for coordinating the design with Baton Rouge's Sanitary Sewer Overflow Program Manager office and the Baton Rouge DPW Wastewater Division office. (2011-2018) (City-Parish 11-PS-MS-0035)

## TEC PROFESSIONAL SERVICES QUESTIONNAIRE

KEY PERSON, SPECIALIST, OR INDIVIDUAL CONSULTANT:

NAME & TITLE:

**JEROME LOHMANN, PE, Roadway Engineer**

PROJECT ASSIGNMENT:

Civil Engineer

NAME OF FIRM WITH WHICH ASSOCIATED:

YEARS' EXPERIENCE WITH THIS FIRM:

8 (40 total)

EDUCATION: DEGREE(S)/YEAR/SPECIALIZATION:

B.S. / 1981 / Civil Engineering

ACTIVE REGISTRATION: YEAR FIRST REGISTERED/DISCIPLINE:

1992 / Louisiana Licensed Professional Civil Engineer No. 24673

OTHER EXPERIENCE AND QUALIFICATIONS RELEVANT TO THE PROPOSED PROJECT:

Mr. Lohmann has over 38 years of diversified engineering, surveying, and construction experience to his credit. He began his career working for an engineering/construction company in 1969. Since that time, he has gained progressive experience, an Associate degree in Applied Science (Surveying), and B.S. in Civil Engineering. His career has included extensive experience in the area of surveying (right-of-way, boundary, topographic, hydrographic, construction, route/location, etc.), sanitary sewer design, water supply systems, highway and transportation systems, drainage design, etc. Mr. Lohmann has served as Project Manager/Design Engineer on various LADOTD Projects. He has been responsible for the design and management of projects ranging in magnitude from Off- System Bridge Replacement Projects to a major interchange on I-49.

### RELEVANT PROJECT EXPERIENCE

**METAIRIE ROAD DRAINAGE EVALUATION (CAUSEWAY BLVD. TO FOCIS ST.):** Jefferson Parish, LA. Project Manager - Mr. Lohmann managed this project, which included an examination of the existing drainage system and recommending improvements to reduce flooding. He oversaw development of preliminary drainage assessments, SWMM modeling, selecting alternatives, modeling and assessing selected alternatives, and preparing a final report. (01/19-09/19)

**WEST TAMMANY HILLS DRAINAGE:** Covington, LA. Project Manager - Mr. Lohmann is overseeing development of a drainage report, along with plans for the installation of subsurface drainage for the residential area north of the Crestwood Subdivision in Covington. Mr. Lohmann's road design services include pavement structural design for rehabilitated and/ or reconstructed sections and preliminary and final roadway design and plan development. He will also work with the Parish to finalize plans and specifications into the Parish frontend documents and format for bidding, address request for information (RFIs) during the bidding process, attend and document pre-bid meeting, review and tabulate bids, and make recommendation on acceptance of bids as required. (09/19-Present)

**SHARP ROAD:** Mandeville, LA. Project Manager - Mr. Lohmann is managing the preparation of preliminary and final construction plans for roadway improvements, subsurface drainage installation, and sidewalk construction. (12/21-Present)

**LA SAFE-AIRLINE AND MAIN COMPLETE STREETS:** LaPlace, LA. Project Manager - Mr. Lohmann is managing the development of typical sections and preliminary layout for the project, which consists of a 10' shared

## TEC PROFESSIONAL SERVICES QUESTIONNAIRE

NAME & TITLE:

**JEROME LOHMANN, PE, *Continued Resume***

OTHER EXPERIENCE AND QUALIFICATIONS RELEVANT TO THE PROPOSED PROJECT:

use path, 5' sidewalk along the north side of US 90, bike lanes on shoulders, and softening of the median. Existing ditches will have pipes added and be reshaped to provide detention ponds to reduce time of concentration. Along Main St., the design will provide parallel parking utilizing decorative brick and permeable base to reduce time of concentration. Mr. Lohmann oversaw the calculation of preliminary quantities and development of a preliminary estimated construction cost. He proposed the conceptual design to the Parish and received approval. He also oversaw development of the fee for all costs from surveying to construction. (09/19-present)

**CHEVELLE DRIVE AND SARASOTA DRIVE BRIDGE REPLACEMENTS:** East Baton Rouge Parish, LA. Project Manager - Mr. Lohmann was Project Manager performing a Design Study including hydraulics, environmental, and geotechnical considerations, overseeing topographic survey and right-of-way (ROW) mapping as required; and developing preliminary and final construction plans and cost estimates. The project included the replacement of the existing Chevelle Drive Bridge over the West Fork of the North Branch of Ward Creek and the existing Sarasota Drive bridge over Engineers Depot Canal. (04/19-12/21) (Bridge Recall No(s). 800541 and 800561; City Parish Project No. 18-BRUS-0016)

**I-10 SERVICE ROAD BRIDGE REPLACEMENTS:** Slidell, LA. Project Manager - Mr. Lohmann managed the GEC design staff for the replacement of two-slab span bridges and approximately 1.1 miles of milling and overlay. He oversaw design of the vertical alignment, proposed length of the bridges, placement of the new bridges, and guardrail design. Mr. Lohmann also oversaw the design of the new roadway approaches to the new bridge, calculation of quantities, and construction cost estimating for the project. (11/18-02/21)

**CAMP COUSHATTA ROAD IMPROVEMENTS:** Allen Parish, LA. Project Manager - Mr. Lohmann managed the design of a new road for the Coushatta Tribe of Louisiana,

including the new alignment and drainage structures/systems. The road consisted of two eleven foot lanes, with 3 foot outside aggregate shoulders, and ditches on both sides. A subsurface drainage system was designed that tied into an existing subsurface system. Two reinforced concrete box culverts were designed to facilitate the flow of local canals through the new roadway, and one of the canals was realigned. (09/17-12/18)

**BLUEBONNET BLVD. (PERKINS TO PICARDY):** Baton Rouge, LA. Project Manager - GEC is designing the widening of Bluebonnet Blvd. to include an additional lane in each direction. Mr. Lohmann is Project Manager, overseeing design of a six-lane, curb and gutter roadway with subsurface drainage, bridge replacement, green infrastructure and pedestrian facilities. GEC's design is in accordance with MOVEBR Design Guidelines and Consultant Services Manual. Mr. Lohmann supervised a study of the existing bridge over Dawson Creek to determine whether the bridge should be widened or replaced in accordance with Part 1, Chapter 6 of the LADOTD BDEM. This study started with an NBIS bridge inspection to determine Condition Ratings for the bridge superstructure, substructure, and piles. A Bridge Load Rating was then carried out based on the AASHTO Manual of Bridge Evaluation and the LADOTD BDEM. Based on the load rating, GEC recommended that the existing bridge be replaced. (09/20-Present) (City-Parish Project No. 19-CPHC-0034)

**US 11 IMPROVEMENTS AT SCHNEIDER CANAL:** St. Tammany Parish, LA. Project Manager: Mr. Lohmann designed approximately 2,700' of divided two lane and multi lane roadway to raise the roadway over the levee on Schneider Canal. (2016)

**OLD HAMMOND HIGHWAY (US 61 TO BLVD. DE PROVINCE), ROUTE LA 426:** Baton Rouge, LA. Project Engineer - Mr. Lohmann was responsible for roadway design consisting of four travel lanes and one continuous turn lane with curb and gutter and subsurface drainage.

## TEC PROFESSIONAL SERVICES QUESTIONNAIRE

KEY PERSON, SPECIALIST, OR INDIVIDUAL CONSULTANT:

NAME & TITLE:

**CHRIS NIPPER, PE**, Road Design Engineer

PROJECT ASSIGNMENT:

Civil Engineer

NAME OF FIRM WITH WHICH ASSOCIATED:

**G.E.C., INC.**

YEARS' EXPERIENCE WITH THIS FIRM:

7 (9 total)

EDUCATION: DEGREE(S)/YEAR/SPECIALIZATION:

B.S. / 2014 / Civil Engineering

ACTIVE REGISTRATION: YEAR FIRST REGISTERED/DISCIPLINE:

2019 / Louisiana Licensed Professional Civil Engineer No. 43281

OTHER EXPERIENCE AND QUALIFICATIONS RELEVANT TO THE PROPOSED PROJECT:

Mr. Nipper has 6 years of experience with civil design projects, including roadway widening and realignment, including those requiring drainage systems. In addition, he has designed projects requiring milling and overlay. He has experience performing hydraulic analyses and preparing associated hydraulics reports for bridge and roadway design projects. Prior to joining GEC, Mr. Nipper worked with LADOTD for over two years, affording him knowledge of their standards and guidelines required for roadway projects. He is also very familiar with AASHTO standards and guidelines.

### RELEVANT PROJECT EXPERIENCE

**US HWY 190 DRAINAGE CROSSING:** Livingston Parish, LA Road Design Engineer – This project involved the design of a concrete box culvert cross drain. This cross drain was being added alongside an existing box culvert in order to assist with drainage to alleviate backwater flooding. Mr. Nipper calculated the quantities and developed the construction plan documents. Mr. Nipper also assisted in the drainage analysis and design of the concrete box culvert. (06/20-10/20)

**WEST TAMMANY HILLS DRAINAGE:** Covington, LA. Project Engineer - Mr. Nipper has assisted in the delineation of drainage maps and hydraulic calculations. He was involved in the design of the subsurface drainage

systems and the roadway rehabilitation design. He also assisted in the development of the construction plans and associated quantities. (09/19-Present)

**CAMP COUSHATTA ROAD IMPROVEMENTS:** Allen Parish, LA. Designer - This project involved the design of a new road for the Coshatta Tribe of Louisiana. Mr. Nipper was the designer of the road, drainage structures/systems, and all associated quantities, and the creator of the construction plan set. The road consisted of two eleven foot lanes, with 3 foot outside aggregate shoulders, and ditches on both sides. A subsurface drainage system was designed that tied into an existing subsurface system. Two reinforced concrete box culverts were designed to facilitate the flow of local canals through the new roadway, and one of the canals was realigned. The quantities and estimated costs associated with the road and drainage systems were also calculated by Mr. Nipper. (09/17-12/18)

**LA SAFE AIRLINE AND MAIN COMPLETE STREETS:** LaPlace, LA. Road Design Engineer - Mr. Nipper provided the vertical and horizontal alignments for the project, as well as the design for Main St. He provided the hydraulic analysis needed to convert existing open ditches along the project into subsurface drainage systems to capture and slow runoff. Mr. Nipper also provided the estimated quantities and cost estimate. (09/19-Present)

# TEC PROFESSIONAL SERVICES QUESTIONNAIRE

KEY PERSON, SPECIALIST, OR INDIVIDUAL CONSULTANT:

NAME & TITLE:

**MICHAEL CHIASSON, PE**, Senior Electrical Engineer

PROJECT ASSIGNMENT:

Electrical Engineer

NAME OF FIRM WITH WHICH ASSOCIATED:

**G.E.C., INC.**

YEARS' EXPERIENCE WITH THIS FIRM:

14 (47 total)

EDUCATION: DEGREE(S)/YEAR/SPECIALIZATION:

B.S. / 1973 / Electrical Engineering

ACTIVE REGISTRATION: YEAR FIRST REGISTERED/DISCIPLINE:

1979 / Louisiana Licensed Professional Electrical Engineer No. 17978

OTHER EXPERIENCE AND QUALIFICATIONS RELEVANT TO THE PROPOSED PROJECT:

Mr. Chiasson has over 36 years of experience in the design and development of process control and related systems. At GEC Mr. Chiasson has completed designs for several waste water lift stations and drainage pumping stations. At Dow Chemical, he was responsible for the preparation of plans and specifications (design and development) of process control engineering projects, from plans and specifications to final construction inspection. Other duties include reverse engineering the manufactured systems to understand how to modify the instruments for computer control and data collection. Calculations, field inspections, data collection, and report preparation were also parts of these projects. Mr. Chiasson is experienced with modeling, digital data filtering and simulation of control systems using tools in Excel and other 1st and 2nd order modeling techniques. He is also well versed in Fortran, Visual Basic, Microsoft Word, and Microsoft Excel.

## RELEVANT PROJECT EXPERIENCE

**LAKESHORE VILLAGES & OAK HARBOR EAST UTILITY WATER TREATMENT PLANT EXPANSION:** St. Tammany Parish, LA. Electrical Engineer: Includes design of improvements to the Lakeshore Estates development, including adding 450,000 gallon/day (GPD) capacity to the existing 500,000 GPD wastewater treatment plant. The expansion project included a 450,000 GPD

extended aeration treatment plant, tertiary filter system, chlorination system, yard piping, and site work. GEC's design of wastewater pumping system consists of ten pumping stations serving 2,950 homes, 600 apartments, and additional commercial development. Planned pump station capacities range from 100 to 480 GPM. (2019-Present)

**DRAINAGE PUMP STATION UPGRADES:** Jefferson Parish, LA. Electrical Engineer - The Cousins 1, 2, & 3, Harvey, Whitney, Bayou Segnette, and Elmwood Pumping Stations projects involved automating both diesel and electric powered pumps to remove drainage water to prevent neighborhood flooding. The automation included sufficient remote controls so that pumps could be operated from either inside the pump station or from a "safe house" location. The requirement meant adding additional instrumentation to diesel and electric pumps so that the pumps could be started, stopped or RPM variance as needed. Project included adding instrumentation to monitor both the inlet and outlet water levels near pumping stations. The project also included adding generator capacity to assure pumping stations could run regardless of Utility power. (2009-2012)

**STORMPROOFING FOR COUSINS AND ELMWOOD PUMP STATIONS:** Jefferson Parish, LA. Project Engineer:

## TEC PROFESSIONAL SERVICES QUESTIONNAIRE

NAME & TITLE:

**MICHAEL CHIASSON, PE, *Continued Resume***

OTHER EXPERIENCE AND QUALIFICATIONS RELEVANT TO THE PROPOSED PROJECT:

The project includes preparation of electrical plans and specifications for installation of redundant emergency generators, automation of five diesel engine driven pumps and ancillary systems, installation of a CCTV camera system and various improvements to electrical systems to provide protection from flood and wind damage. SCADA automation design included control of fuel systems, vacuum priming systems, compressed air systems, trash raking systems as well as sensors for monitoring pressure, RPM, fluid level, temperature, and motor current. Monitoring and control interface will be via HMI touch screen panels in each pump station and in the site safehouse.

**SANITARY SEWER SYSTEM UPGRADES, SOUTH FORCE MAIN AND GRAVITY SYSTEMS, PUMP STATION 58A:**

Baton Rouge, LA. Electrical Engineer of Record - This project included preparation of electrical, instrumentation, and controls plans and specifications for installation of six 4,170 GPM pumps in the dry weather pump station and six 12,500 GPM pumps in the wet weather pump station. Pumps will be additively started and speed ramped up to maintain the lift station water level. Pumps will rotate through a use profile to keep any one pump from constantly being overused. Pump speed for each submersible pump is controlled by variable frequency drives as dictated by the station PLC control system. The station PLC control system will select single or parallel generator operation based on the pumping demand to optimize generator loading. Testing criteria to validate construction meets specification requirements was included in this project. (2010-2014) (City-Parish 09-PS-US-001)

**BOOSTER PUMP STATION 514 REPLACEMENT:** Baton Rouge, LA. Electrical Engineer of Record - This project included preparation of electrical, instrumentation, and controls plans and specifications for installation of a new 80MGD submersible pump station and control building. The design includes six (6) 500 horsepower and two (2) 165 horsepower submersible pumps to handle wet and

dry weather flow. Pumps will be additively started and speed ramped up to maintain the lift station water level. Pumps will rotate through a use profile to keep any one pump from constantly being overused. Pump speed for each submersible pump is controlled by variable frequency drives as dictated by the station PLC control system. The pump station design also included an automatic transfer controller and provisions for parallel 1600kW generators (furnished under separate contract and installed in this project). The station PLC control system will select single or parallel generator operation based on the pumping demand to optimize generator loading. Testing criteria to validate construction meets specification requirements was included. (2015) (City-Parish 09-PS-MS-0034)

**SANITARY SEWER SYSTEM UPGRADES, NORTH STN FORCE MAIN SANITARY SYSTEM, HIGHWAY 61 - PLANK ROAD MULTIPLE PUMP STATION REPLACEMENT:**

Baton Rouge, LA. Senior Control Engineer - Mr. Chiasson was responsible for the control system for the motors and for the sensors around the building. (2018) (City- Parish Project No. 11-PS-MS-0035)

**CLEARY AND W. NAPOLEON LIFT STATION RENOVATION:**

Jefferson, LA. Electrical Engineer of Record - Mr. Chiasson designed and developed the electrical plans and specifications for the upgrading of existing equipment to two 67 HP dry well pumps operating on variable frequency drives, SCADA interface, and controls. (2017)

**OAK HARBOR EAST UTILITY – LAKESHORE ESTATES 300K WWTP EXPANSION:**

Slidell, LA. Controls Engineer - Mr. Chiasson assisted in design of the power distribution system for a 300,000 gallon per day WWTP system including generator standby power system, area lighting, and construction support. (2018-2019)

**OAK HARBOR EAST UTILITY – LAKESHORE ESTATES 450K WWTP EXPANSION:**

Slidell, LA. Controls Engineer - Mr. Chiasson is assisting with design of the power distribution system for a 450,000 gallon per day WWTP system. (2019-Present)

## TEC PROFESSIONAL SERVICES QUESTIONNAIRE

KEY PERSON, SPECIALIST, OR INDIVIDUAL CONSULTANT:

NAME & TITLE:

**BRIAN BUCKEL, PE**, Senior Vice President, Construction

PROJECT ASSIGNMENT:

Construction Administration

NAME OF FIRM WITH WHICH ASSOCIATED:

**G.E.C., INC.**

YEARS' EXPERIENCE WITH THIS FIRM:

11 (42 total)

EDUCATION: DEGREE(S)/YEAR/SPECIALIZATION:

B.S. / 1981 / Civil Engineering

ACTIVE REGISTRATION: YEAR FIRST REGISTERED/DISCIPLINE:

1985 / Louisiana Licensed Professional Civil Engineer No. 21816

OTHER EXPERIENCE AND QUALIFICATIONS RELEVANT TO THE PROPOSED PROJECT:

Mr. Buckel joined GEC after 31 years of service with LADOTD where he served as chief construction engineer from 2006 to 2012, managing the Construction Section as well as policy setting of construction projects. Additionally, he served as district construction engineer for seven years, managing the seven parishes under District 02. Mr. Buckel served as an area engineer throughout the state of Louisiana for a seven years and was a project engineer in the New Orleans area for several years. As Chief Construction Engineer, he directed policy implementation, testing, and inspection of all asphalt pavement construction state wide. Building on his asphalt mix and laydown experience as project engineer and District Construction Engineer, he led the state into significant asphalt pavement innovations such as Superpave and warm mix. He also oversees construction inspection for all City of Baton Rouge street improvements projects for GEC's contract.

### RELEVANT PROJECT EXPERIENCE

**COVINGTON COUNTRY CLUB SEWER REHAB:** Covington, LA. Construction Manager - GEC serves as the Consulting Engineer for the St. Tammany Parish Sewerage District No. 1 (District). The project was located in Covington Country Club Estates and consisted of CCTV existing sewer lines, performing CCIP lining in several lines, sewer point repairs, smoke testing, manhole rehabilitation, installation of two

sewer force mains and the installation of a new sewer lift station. GEC completed the design and Mr. Buckel provided construction observation of the work. (2021)

**ST. BERNARD PARISH, GRAVITY SEWER PROJECT, AREA A:** St. Bernard Parish, LA. Mr. Buckel provided construction management, constructability reviews, and resident inspection services management for this FEMA-funded project involving cleaning, CCTV inspection, and construction repairs (350,000 LF of existing gravity sewers damaged by Hurricane Katrina). Cost: \$32M (2016)

**SANITARY SEWER SYSTEM UPGRADES, SOUTH FORCE MAIN AND GRAVITY SYSTEMS, PUMP STATION 58A, SGC-C-PS58A (STARING LANE – OVERFLOW PS):** Baton Rouge, LA. Construction Engineer - Mr. Buckel provided construction management, constructability reviews, and resident inspection services management for this project, commonly known as "PS 58A." Project included the replacement of the existing undersized 50-year-old wastewater pump station with a new 83,300 GPM wastewater submersible pumping station on Essen Lane near Ward's Creek. GEC also designed and prepared electrical plans and specifications for the installation of a new submersible lift station and control building. (2012-2014) (City-Parish Project No. 09-PS-US-001)

## TEC PROFESSIONAL SERVICES QUESTIONNAIRE

KEY PERSON, SPECIALIST, OR INDIVIDUAL CONSULTANT:

NAME & TITLE:

**CARY BOURGEOIS, PE**, Senior Vice President

PROJECT ASSIGNMENT:

QA/QC

NAME OF FIRM WITH WHICH ASSOCIATED:

**G.E.C., INC.**

YEARS' EXPERIENCE WITH THIS FIRM:

39 (39 total)

EDUCATION: DEGREE(S)/YEAR/SPECIALIZATION:

B.S. / 1983 / Civil Engineering

ACTIVE REGISTRATION: YEAR FIRST REGISTERED/DISCIPLINE:

1983 / Louisiana Licensed Professional Civil Engineer No. 23414

OTHER EXPERIENCE AND QUALIFICATIONS RELEVANT TO THE PROPOSED PROJECT:

Mr. Bourgeois is GEC's Senior Vice President, currently involved in supervising activities and performing design services on several large-scale projects. Mr. Bourgeois oversees all GEC engineering design projects and will provide QA/QC on this project as needed.

### RELEVANT PROJECT EXPERIENCE

**LAKESHORE VILLAGES & OAK HARBOR EAST UTILITY WATER TREATMENT PLANT EXPANSION:** St. Tammany Parish, LA. Principal-In-Charge: Includes design of improvements to the Lakeshore Estates development, including adding 450,000 gallon/day (GPD) capacity to the existing 500,000 GPD wastewater treatment plant. The expansion project included a 450,000 GPD extended aeration treatment plant, tertiary filter system, chlorination system, yard piping, and site work. GEC's design of wastewater pumping system consists of ten pumping stations serving 2,950 homes, 600 apartments, and additional commercial development. Planned pump station capacities range from 100 to 480 GPM. (2019-Present)

**TERRACE STREET DRAINAGE PUMP STATION RENOVATIONS:** Baton Rouge, Louisiana. Principal-In-Charge: Project included hydrologic and hydraulic analyses of the upper reaches of the Corporation Canal Watershed

and an evaluation of the existing pumping equipment and canal control intake structure. This project involved the replacement of the existing four (4) 84,000 GPM pumps with new vertical turbine pumps and replacing the existing diesel engine drivers with 1,250 HP horizontal electric motors. The project also included replacing the adjusting Corporation Canal intake weir structure with a permanent concrete weir control structure.

**PALMISANO BLVD. DRAINAGE IMPROVEMENTS:** Chalmette, LA. Principal-In-Charge: This project included 4,300 linear feet of 10'x6' and 8'x4' box culverts, a 25 CFS drainage pumping station and a four-lane concrete bridge over the Twenty-Arpent Canal. Our work included surveying, H&H study, preliminary design, final design, bidding, and construction phase services. (2017)

**PREPARATION OF DESIGN REPORT AND PLANS AND SPECIFICATIONS FOR THE FRONTING PROTECTION AT DUNCAN PUMPING STATION:** Jefferson Parish, Louisiana. Principal-In-Charge - The Duncan Canal Pump Station is located in Jefferson Parish on the drainage basin's East Bank of the Mississippi River. The project is to provide fronting protection across the entire width of the pumping discharge area. The designs consist of a combination of gate monolith and T-wall monoliths. Also

## TEC PROFESSIONAL SERVICES QUESTIONNAIRE

NAME & TITLE:

**CARY BOURGEOIS, PE, *Continued Resume***

OTHER EXPERIENCE AND QUALIFICATIONS RELEVANT TO THE PROPOSED PROJECT:

included are positive cutoff gates such as sluice gates or butterfly valves, where required. (2015)

**ST. TAMMANY PARISH SEWER DISTRICT NO. 1, SEWER SYSTEM REHABILITATION PROJECT:** Covington, LA. Principal-in-Charge - GEC serves as the Consulting Engineer for the St. Tammany Parish Sewerage District No. 1 (District). The district services approximately 450 residential and 10 commercial customers in Covington, Louisiana. The original sewer system was installed in the 1950s and, as such, the system was in need of rehabilitation. As originally constructed, the lift stations were installed in series from the eastern end of the system to the treatment plant on the western end of the system. GEC designed a new lift station and 5,600 linear feet (LF) of 6" diameter sewer force main. GEC's repair work included point repairs and replacement of 6", 8", and 10" sewer mains, replacement of sewer laterals, and repair of sewer manholes and cleanouts. The project went to bid and was awarded with alternatives for cured-in-place pipe lining. GEC prepared design plans and specifications administered the bid opening and permitting, and will perform construction observation. Mr. Bourgeois has been instrumental in the QA/QC process. (10/2019-Present)

**SANITARY SEWER SYSTEM UPGRADES, SOUTH FORCE MAIN AND GRAVITY SYSTEMS, BOOSTER PUMP STATION 514 REPLACEMENT:** Baton Rouge, LA. Principal-in-Charge: GEC designed and prepared structural, electrical, instrumentation and controls plans and specifications for the installation of a new 80MGD submersible pump station and control building. The pump station design included six 500 horsepower and two 165 horsepower submersible pumps to handle wet and dry weather flow, respectively. Pumps were additively started and speed ramped up to maintain the lift station water level and will rotate through a use profile to equalize pump runtime. In addition to pump rotation, automatic VFD speed control and addition and removal of pumps are utilized to handle varying wastewater flow demands

based on control by the station PLC and input from the bubbler level system. A relay-based emergency control system was included in the design to assume control in the event of a PLC failure. The station control system was designed to meet SSO program standards to allow seamless integration with the future parish wide SCADA system. The electrical distribution system features 480 volts, 4000 ampere, 3-phase, 3-wire switchboard with automatic transfer controller and provisions for parallel operation of three 1000kW generators (furnished under separate contract and installed in this project). For optimal generator operation, a load-based generator controller was included to manage the selected number of generators based on pumping demand. The main switchboard features a main-tie-main circuit breaker arrangement, which split the pump station loads on both sides of the tie-breaker. When properly coordinated, this arrangement will prevent a fault on either side of the tie-breaker from de-energizing all pumps. (2013)

**GREATER NEW ORLEANS EXPRESSWAY COMMISSION (GNOEC), LAKE PONTCHARTRAIN CAUSEWAY, CONSULTING ENGINEER:** Metairie, LA. Overall Project Manager - GEC has served as Consulting Engineer for GNOEC since 1991 performing Trust Indenture Services in accordance with the GNOEC General Bond Resolution. Mr. Bourgeois has been associated with the project since the selection of GEC as Consulting Engineer and has served as Project Manager for over 15 years. In this time GEC has designed and implemented over \$125,000,000 in improvements to the GNOEC system. (1991-Present)

## TEC PROFESSIONAL SERVICES QUESTIONNAIRE

KEY PERSON, SPECIALIST, OR INDIVIDUAL CONSULTANT:

NAME & TITLE:

**SHERRI LEBAS, PE, Senior Vice President**

ACTIVE REGISTRATION: YEAR FIRST REGISTERED/DISCIPLINE:

1990 / Louisiana Licensed Professional Civil Engineer No. 23844

OTHER EXPERIENCE AND QUALIFICATIONS RELEVANT TO THE PROPOSED PROJECT:

Ms. LeBas has managed numerous Louisiana State projects and programs over her 35-year career from hands on day to day management to leading the 4,200 LADOTD staff members in the delivery of the \$1.8 Billion annual budget for capital improvements and operations while Secretary of the LADOTD. She is driven by her goal to provide our citizens with excellent and safe infrastructure improvements that require problem solving, innovative solutions, and best practices by leading and engaging in teamwork and collaboration. She enjoys working with stakeholders and citizens by informing, explaining and working to find common ground.

While at the Division of Administration, Facility Planning and Control, she served as Project Manager for numerous diverse capital outlay projects throughout the state ranging from municipal utilities to roadways and from livestock arenas to the planetariums managing contracts, schedules and cash flow. She served as the LADOTD Assistant Program Manager for the \$5.2 Billion Transportation Infrastructure Model for Economic Development (TIMED) program. As LADOTD Assistant Secretary for Policy, she managed the \$1.2 Billion State Surplus program and while LADOTD Deputy Secretary, she managed the \$430 million American Recovery Reinvestment Act program (ARRA).

### RELEVANT PROJECT EXPERIENCE

**I-10 & I-12 COLLEGE DRIVE FLYOVER RAMP DESIGN-BUILD:** Baton Rouge, Louisiana. Assistant Quality Design Manager- Ms. LeBas is providing quality design review for the GEC/Boh Bros. team. GEC is responsible for engineering and design quality control services as necessary to complete the design and construction for the I-10 & I-12 College Dr Flyover Ramp Design-Build Project. (08/20-Present)

**I-10: LA 415 TO ESSEN LANE ON I-10 AND I-12:** Baton Rouge, Louisiana. Assistant Project Manager - Ms. LeBas serves as Assistant Project Manager for the project, overseeing GEC's engineering services, including right-of-way corridor preservation milestone plan preparation for the corridor from the College Drive east ramp terminals to the I-10/I-12 interchange area. Ms. LeBas is assisting the Prime with project transition and data transfer, document control, meetings and coordination, project tracking, initial financial plan, Project Management Plan (PMP), and Project Implementation Plan (PIP). (09/20-Present)

**ROAD TRANSFER PROGRAM MANAGEMENT:** Statewide, LA. Principal-in-Charge - Ms. LeBas serves as a resource to GEC's Program Manager of the Louisiana Department of Transportation and Development

## TEC PROFESSIONAL SERVICES QUESTIONNAIRE

NAME & TITLE:

**SHERRI LEBAS, PE, *Continued Resume***

OTHER EXPERIENCE AND QUALIFICATIONS RELEVANT TO THE PROPOSED PROJECT:

(LADOTD) Road Transfer Program. Ms. LeBas provides feedback, is the direct link for communication and service between GEC's Project Manager who is stationed at LADOTD Headquarters and GEC's staff, and attends bi-monthly status meetings with the LADOTD Road Transfer Team. (2016-Present)

### **WORK DONE PRIOR TO JOINING GEC**

**THE TRANSPORTATION MODEL FOR ECONOMIC DEVELOPMENT (TIMED) PROGRAM:** Statewide, LA. Assistant to the TIMED Program Manager, LADOTD Road Design Section: Ms. LeBas served as the Assistant TIMED Program Manager for the \$5.2 Billion Program. She was responsible for the financials working with the LADOTD Administration, LADOTD staff and the consultant LTM team. This included reviewing the program changes, change orders, and total program costs from design through construction. In addition, Ms. LeBas worked with the LADOTD TIMED Program Manager in the coordination with the LTM team for plan delivery and construction schedule. (07/95-01/98)

**I-49 SHREVEPORT URBAN INTERSTATE (INNER LOOP EXPRESSWAY (LA 3132) TO THE I-49/I-20 INTERCHANGE):** Caddo Parish, LA. Project Manager LADOTD Road Design: Ms. LeBas served as Project Manager responsible for scope, schedule & budget, plans, specifications, & estimate (PS&E) of new interstate (I-49) through Shreveport Urban area from Inner Loop Expressway (LA 3132) to I-49/I-20 Interchange which at this time was largest roadway program at LADOTD. During construction, she worked closely with District Construction Engineers to resolve issues. Sherri was responsible for developing scope & fee, negotiating contracts for final design plans, scheduling and tracking plan submittals. Ms. LeBas was responsible for checking roadway design plans & coordinating plan reviews with other LADOTD sections. Sherri prepared the summary of estimated quantities and worked on any special specifications required. Ms. LeBas designed & developed sequence of construction for

I-49/I-20 Interchange which included new concept to LA to use concrete barriers to separate lanes of interstate traffic during construction. She met with property owners within the corridor to discuss driveway access, modifications and concerns. (07/88-08/97)

**I-49 SHREVEPORT URBAN INTERSTATE (INDUSTRIAL LOOP (LA 526) TO THE I-49/I-20 INTERCHANGE):** Caddo Parish, LA. Design Engineer in Training, LADOTD Road Design Section: Ms. LeBas reviewed the design aspects of the roadway including drainage, typical sections, horizontal and vertical alignments, superelevation, embankment widening for guardrails, cross sections, quantity calculations, summary of estimated quantities in accordance with the LADOTD standard specifications, traffic sequencing, and construction cost estimate for the consultant designed plans to ensure compliance with LADOTD standards and plan formatting and AASHTO standards. (03/86-07/88)

**STATE OF LOUISIANA NON-STATE ENTITY CAPITAL OUTLAY PROGRAM:** Program Manager - Ms. LeBas served as Program Manager at the Division of Administration (DOA)/Facility Planning & Control (FP&C) for the non-state entity projects that receive funding through the State of Louisiana. She was responsible for the development of the Cooperative Endeavor Agreements between the State and the local entity, working with local entities in the delivery of their projects in accordance with the State's guidelines, each project's cash flow and communicating and working with local and state officials during the entire process, from funding through construction. While at DOA/FP&C, she co-authored the Non-State Entity Capital Outlay Administrative Guidelines which are still used today for the management of the projects. At any one time 75 to 100 active projects were in production with a wide range of scope including but not limited to waterlines, sewer lines, pump stations, roadways, livestock arenas, renovation of theaters, renovation of historical buildings, park roadways and amenities and port facilities. (01/98-09/03)

PROJECT NO. 4

PROJECT NAME, LOCATION AND OWNER'S CONTACT INFORMATION:

NATURE OF FIRM'S RESPONSIBILITY:

**WATERLINE REPLACEMENT PROGRAM, 50" WATERLINE**

New Orleans, Louisiana

*Client: Sewerage and Water Board, of New Orleans, 8800 S. Claiborne Avenue; New Orleans, LA 70118, (504) 865-0652, Khalid Saleh, (504) 529-2837*

Hurricane Katrina's flood waters severely damaged the New Orleans potable water distribution system along with other infrastructure. The Sewerage and Water Board of New Orleans selected GEC to provide engineering design services associated with the replacement of waterline that was 50" in diameter and had a total length of 825 linear feet. Design services included preliminary design calculations and reports, preliminary plans, final plans, specifications, bidding assistance, construction engineering, and resident inspection services. The design included necessary street excavation and repair/restoration as necessary to accommodate the water line construction. The project was funded by FEMA. All design was reviewed by FEMA, the Sewerage and Water Board of New Orleans, and the City of New Orleans Dept. of Public Works. Construction is scheduled to be complete by December 2022.

PROJECT NO. 5

PROJECT NAME, LOCATION AND OWNER'S CONTACT INFORMATION:

NATURE OF FIRM'S RESPONSIBILITY:

**WATER MAIN EXTENSIONS AND ELEVATED WATER STORAGE TANK FOR THE PORT OF AVOYELLES**

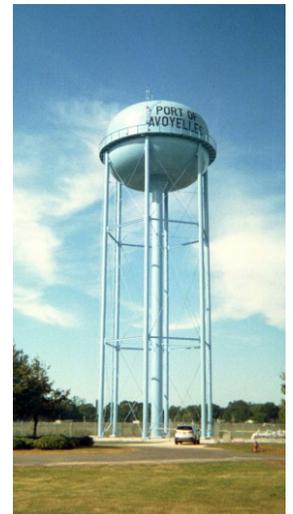

Simmesport, Louisiana

*Client: Avoyelles Parish Port Commission, Barry Ray Laiche, P.O. Box 126, Simmesport, LA 71369, (318) 253-4435, blaiche@barrylaiche.com*

This Project consisted of two separate contracts for the construction of pressure pipe water mains and an elevated water storage tank for the Port of Avoyelles.

CONTRACT NO. 1: This project involved the design and construction of some 460 linear feet of 8" C 900 polyvinyl chloride pressure pipe water main along the west right-of-way of Louisiana Highway 105. The project also included the installation of fire hydrants; gate vales; connection to the Town of Simmesport water system; and other appurtenances. The project included the design and preparation of all drawings, technical specifications and contract documents in conformity with the U.S. Department of Commerce Economic Development Administration (EDA) requirements for approval and Title 38 of the State of Louisiana Revised Statutes for Public Bidding, such as advertising; receiving bids; recommending award to the lowest responsible bidder; preparing all contract documents for execution, etc. Other tasks included obtaining all required U.S. Army Corps of Engineers; Levee Board; and State of Louisiana Department of Health Permit approvals; and project construction inspection and management.

CONTRACT NO. 2: GEC completed the design and construction management and inspection of a 145 foot high, 50 Ft. diameter, Torus 400,000 gallon elevated water storage tank on the land side of the right descending bank of the Atchafalaya River Levee. Major engineering design factors were the tank's foundation design to support various dead and live load combinations based upon the site's alluvium sub-strata geotechnical soil conditions, and the balancing of water pressures with the Town of Simmesport existing elevated water storage tank and water wells via use of a hydrostatic altitude valve assembly. GEC provided design and preparation of all drawings, technical specifications and contract documents in conformity with the U.S. Department of Commerce Economic Development Administration (EDA) requirements for approval and Title 38 of the State of Louisiana Revised Statutes for Public Bidding, such as advertising, receiving bids, recommending award to the lowest responsible bidder, preparing all contract documents for execution, etc. Other tasks included obtaining all required U.S. Army Corps of Engineers, Levee Board, State of Louisiana Department of Health, and Federal Aviation Administration (FAA) permit approvals, along with providing project construction inspection and management.

PROJECT NO. 6

PROJECT NAME, LOCATION AND OWNER'S CONTACT INFORMATION:

NATURE OF FIRM'S RESPONSIBILITY:

**FLEUR DE LIS BLVD. RECONSTRUCTION (INTERSTATE HWY. 610 TO OLD HAMMOND HIGHWAY), PHASES I-III**  
New Orleans, Louisiana

*Client: City of New Orleans, Alan Weber, 1300 Perdido Street, New Orleans, LA, (504) 658-8000, aweber@cityofno.com*

The original Fleur de Lis Drive, constructed in two phases in the 1950s and 1960s, had undergone significant differential settlement from the weak near surface soils in the region, due to additional, improved drainage elsewhere in the region. The City of New Orleans conducted studies to determine if patching and overlay would remedy these issues for this divided, urban arterial roadway; however, studies revealed that the roadway was in such poor condition that only a reconstruction project would provide a long term solution.

The City selected GEC to design this major, 8,350 linear feet (1.57 miles) reconstruction project, separated into three phases due to funding constraints. The majority of construction was federally funded. Because the corridor was bounded by residential development, significant attention was given to pedestrian access during construction.

GEC prepared a master drainage collection system analysis prior to design, which was submitted to and approved by LADOTD and the New Orleans Dept. of Public Works. The drainage analysis resulted in the complete reconstruction of over 17,000 linear feet of reinforced concrete subsurface drain lines ranging in size from 12 inch diameter to 36 inch diameter. The new drainage system included 2,140 LF of 12", 11,000 LF of 15", 311 LF of 18", 156 LF of 21", 1,060 LF of 24", 140 LF of 27", 2,020 LF of 30", 200 LF of 36", and 180 LF of 36" diameter pipe. GEC's design also included complete reconstruction of the sewer collection system and water mains. All plans and specifications were submitted to and approved by the Louisiana Department of Transportation and Development (LADOTD), the Federal Highway Administration (FHWA), the Sewerage and Water Board of New Orleans (S&WB), and City of New Orleans Department of Public Works. All design was in accordance with AASHTO, FHWA, and LADOTD requirements.

PROJECT NO. 7

PROJECT NAME, LOCATION AND OWNER'S CONTACT INFORMATION:

NATURE OF FIRM'S RESPONSIBILITY:

**INFRASTRUCTURE REPAIR PROGRAM, AREA 10, 6TH STREET SOUTH (SXSS)**  
Biloxi, Mississippi

*Client: City of Biloxi, 140 Lameuse St., Biloxi, MS 39533, Walt. A. Rode, Program Manager, Infrastructure Repair Program, 228.224.8494, wrode@biloxi.ms.us*

On August 29, 2005, Hurricane Katrina damaged a significant amount of the infrastructure in the City of Biloxi. In response to the damage, FEMA granted repair funds to the City. In 2010, the City, through a competitive selection process, selected GEC to provide professional services for the repair of pavement and related sewer, water, and drainage systems. The project also includes the design and construction of a new wastewater pumping station to consolidate existing damaged pump stations.

GEC designed the Area 10, 6th Street South portion of the Biloxi Infrastructure Repair Program for storm drainage systems improvements and design, water distribution system improvements, sewage collection system improvements, pump station design, and road improvements design. The water distribution system design consists of 12,225 linear feet of 6", 8", 12", and 16" diameter water mains including fire hydrants and valves. The project consists of civil engineering for an area entailing roughly 175 acres with more than 5 miles of roadway, utilities, and drainage improvements including subsurface sewer and drain pipes, and one 8,000 GPM \$2.4M sewer pumping station. Construction of the lift station was completed in 2016.

GEC services include: attending meetings, researching and obtaining field information, topographic survey, drainage analysis, determining additional R/W requirements, compiling an engineer's estimate, and construction administration duties. Deliverables include: detailed plans and specifications for conceptual design, preliminary design, final design, and construction phase documents. Plans include: summary of quantities, typical sections, general notes and details, removal plans, water and sewer plan and profile sheets, pavement and drainage plan and profile sheets, cross sections, drainage analysis, design calculations, traffic control plans, pavement marking plans, intersection details, and SWPPP and details. The program is funded by the Federal Emergency Management Agency (FEMA) and must be in compliance with FEMA's Public Assistance Guide (FEMA 322).

## TEC PROFESSIONAL SERVICES QUESTIONNAIRE

**L. WORK BY FIRM OR JOINT-VENTURE MEMBERS WHICH BEST ILLUSTRATES CURRENT QUALIFICATIONS RELEVANT TO THIS PROJECT. PLEASE INCLUDE ANY AND ALL WORK PERFORMED FOR JEFFERSON PARISH. PLEASE ATTACH ADDITIONAL PAGES IF NECESSARY.**

PROJECT NO. 8

PROJECT NAME, LOCATION AND OWNER'S CONTACT INFORMATION:

NATURE OF FIRM'S RESPONSIBILITY:

**COLUMBIA PARC CITY STREETS AND CLINIC/ GYM PARKING**

New Orleans, Louisiana

*Client: City of New Orleans, Xavier A. Chavez, 1300 Perdido Street, New Orleans, LA 70112, (504) 228-0374 (Columbia Residential, Christina Davis)*

In the late 1990s, the City of New Orleans began planning the redevelopment of the St. Bernard neighborhood public housing complex, which was constructed in the 1940s and in a non-repairable state. An opportunity arose shortly after Hurricane Katrina when a private developer was chosen to construct and manage the redevelopment that would help revitalize the neighborhood.

GEC was chosen to provide professional services including planning, design, and construction administration for the demolition and reconstruction of approximately 12,350 linear feet of existing city streets for the new housing which would become known as the Columbia Parc housing revitalization. The new housing included 426 new modern residential units to replace the dilapidated units. GEC's design conformed to the City of New Orleans standard street cross section and included new ADA-accessible intersections. The project was constructed in three phases.

The \$12M infrastructure improvements, consisting of new landscaping, green infrastructure, sewer and water systems, street paving, and street lighting, were designed in accordance with requirements of the City and Sewerage and Water Board of New Orleans. Plans and specifications were submitted to and approved by the City of New Orleans Dept. of Public Works and NOSWB.

In 2017, GEC performed civil and landscape architectural services related to a new clinic and gym at Columbia Parc. GEC prepared a stormwater analysis in accordance with recently implemented City codes to address stormwater management and drainage design. GEC's design included over 38,450 square yards (7,500 cubic yards) impervious portland cement concrete roadways, driveways, aisles, and parking spaces. Approximately 12,800 cubic yards of crushed stone was required for the pavement base course.

The new utilities included approximately 10,500 linear feet of 8" and 12" diameter water mains, 8,600 linear feet of 8" diameter sewer mains, and 6,800 linear feet of 15", 18", 21", and 24" diameter concrete drain pipe. The sewer and water systems were designed and constructed in accordance with requirements of the Sewerage and Water Board of New Orleans. Plans and specifications were submitted to and approved by the City of New Orleans Department of Public Works and the Sewerage and Water Board of New Orleans.

To comply with the new stormwater codes, drain inlets from the parking lot lead to bioretention basins featuring plantings focused on native trees, grasses, sedges, and rushes. The new bioswales provide habitat, biodiversity, beauty, and a significant increase of on-site stormwater retention relative to conventional drainage systems. The landscape design also included street trees and parking island plantings.

GEC's professional services included construction phase administration including review of

PROJECT NAME, LOCATION AND OWNER'S CONTACT INFORMATION:

**JORDAN ROAD WATER TRANSMISSION LINE**  
Jackson County,  
Mississippi

*Client: Jackson County Utility Authority, Tommy Fairfield, Jr., 1225 Jackson Avenue, Pascagoula, MS 39567, (228) 762-0119*

NATURE OF FIRM'S RESPONSIBILITY:

GEC provided planning and design services for a water transmission main in Jackson County. The 12" diameter water main was 4,000 linear feet in length. The design included fire hydrants and air relief valves. GEC assisted the JCUD in acquiring easements on private property for construction of the water main. GEC also provided preliminary and final plans, assisted in obtaining approvals from the Mississippi Dept. of Environmental Quality and Mississippi State Dept. of Health, assisted in securing construction bids, and provided construction phase engineering services including routine site inspections.

**LAKESHORE VILLAGES  
WATER WELL AND  
WATER LINES**

St. Tammany Parish,  
Louisiana

*Client: D.R. Horton, Inc.,  
Pete Williams, 5844 Old  
Pasco Road, Suite 100,  
Wesley Chapel, FL 33544,  
(813) 625-4082*

NATURE OF FIRM'S RESPONSIBILITY:

GEC designed an additional water well and additional water distribution lines to serve a growing 1,200 acre development located on the north side of Lake Pontchartrain in St. Tammany Parish, approximately 26 miles northeast from New Orleans. A large national residential builder is rapidly building houses on the property. The property is protected from flooding by a six (6) mile long earthen levee. The design and construction of the levee system was reviewed and approved by FEMA in 2006.

The additional water well and on-site storage serves a population of 7,500 residents. GEC planned and modeled the water supply system and prepared design plans and specifications for the well and distribution piping. Approximately 9,000 linear feet of 8" and 12" water mains were constructed to serve the community. The water well and distribution system plans were reviewed and approved by the Louisiana Department of Health and Hospitals and St. Tammany Parish Dept. of Environmental Quality.

The original water and sewerage systems were also designed by GEC.

## Routine Engineering for Water Projects

### STATEMENT OF QUALIFICATIONS

**G.E.C., Inc. (GEC) appreciates the opportunity to offer Jefferson Parish a highly capable and experienced professional team to provide routine engineering consulting services for water projects.**

Since 1986, GEC has grown into a firm offering project management and comprehensive, multidisciplinary project planning, design, and implementation services for public and private clients nationwide. The diverse resources of the company include project management, design and construction engineering, economic analysis, environmental and ecological sciences, and GIS applications. We are committed to providing engineering services to Jefferson Parish on time and within budget to effectively accomplish the goals of this project.

Our staff includes licensed professional engineers with national prominence to provide professional engineering services. GEC supports municipalities and local governments in the planning, design, and rehabilitation of infrastructure and other public facilities systems vital to enhance the quality of life of residents of Jefferson Parish.

***We have thoroughly reviewed the solicitation and feel confident GEC has the broad experience and full array of personnel necessary to complete all services described in the Request for Qualifications.***

### FIRM OVERVIEW

GEC has maintained an office in Jefferson Parish in Metairie since 2008.

Through the acquisition of Krebs, LaSalle, LeMieux Consultants, Inc. (KLL) in 2011, GEC has had a presence in Jefferson Parish since 1967.

Established in 1986 in Baton Rouge, GEC has over 130 employees providing civil, electrical, construction, environmental, and coastal engineering, planning, inspection, and more.

### O. TO THE BEST OF MY KNOWLEDGE, THE FOREGOING IS AN ACCURATE STATEMENT OF FACTS.

SIGNATURE:  PRINT NAME:     Sherri LeBas, PE    

TITLE:     Senior Vice President     DATE:     June 21, 2024

## Minimum Requirements for Selection

### ROUTINE ENGINEERING SERVICES

**GEC has the local, state and regional experience to meet the needs of the Parish for task orders arising from this as-needed contract. Our firm meets all minimum requirements for selection as demonstrated by our numbered responses below.**

THE PERSON OR FIRM SUBMITTING A STATEMENT OF QUALIFICATIONS SHALL HAVE THE FOLLOWING MINIMUM QUALIFICATIONS:

1. ONE PRINCIPAL WHO IS A PROFESSIONAL ENGINEER WHO SHALL BE REGISTERED AS SUCH IN LOUISIANA
  
2. A PROFESSIONAL IN CHARGE OF THE PROJECT WHO IS A PROFESSIONAL ENGINEER WHO SHALL BE REGISTERED AS SUCH IN LOUISIANA WITH A MINIMUM OF FIVE (5) YEARS EXPERIENCE IN THE DISCIPLINES INVOLVED
  
3. ONE EMPLOYEE WHO IS A PROFESSIONAL ENGINEER REGISTERED AS SUCH IN LOUISIANA IN THE FIELD OR FIELDS OF EXPERTISE REQUIRED FOR THE PROJECT (A SUB-CONSULTANT MAY MEET THE REQUIREMENT ONLY IF THE ADVERTISED PROJECT INVOLVES MORE THAN ONE DISCIPLINE.)

Sherri LeBas joined GEC after 30.5 years in state service in Louisiana. Her work experience includes the Louisiana Department of Transportation and Development (LADOTD) as well as the Louisiana State Division of Administration, Facility Planning and Control. Ms. LeBas spent the last 6 years of her state career as Secretary of LADOTD from 2010 to 2016 and understands the components of the successful delivery of projects including the management of the preconstruction phases and identification of funding sources and timing of the cash flow required. Currently, Ms. LeBas is Assistant Project Manager for the I-10 Widening CMAR Project in Baton Rouge. She is a licensed Civil and Environmental Professional Engineer in Louisiana.

Many Heymann leads GEC’s Greater New Orleans Area Operations as Vice President. He has more than 20 years of experience and has been responsible for the design and oversight of drainage projects, water distribution projects, sewer system projects, storm water collection systems, roadway projects, and construction projects. His experience includes the development of cost estimates, quantity calculations, drainage design, geometric design, erosion control, maintenance-of-traffic, grading plans, preparation of construction documents, and construction management.

# Professional Qualifications

ROUTINE ENGINEERING SERVICES

## EVALUATION CRITERIA

1) PROFESSIONAL TRAINING AND EXPERIENCE IN RELATION TO THE TYPE OF WORK REQUIRED FOR THE ROUTINE ENGINEERING SERVICES - 35 POINTS

GEC staff includes dozens of professionals experienced in the planning, design and rehabilitation of water distribution infrastructure. GEC provided design services for the replacement of waterlines in the St. Bernard, Bayou St. John, and Fairgrounds areas of the City of New Orleans. These projects involved design of various waterlines ranging in size from 4 to 16 in. GEC staff also completed the design of 21,000 linear feet of water lines ranging in size from 8"-16" diameter on Fleur de Lis Drive in New Orleans. GEC offers Jefferson Parish a broad range of experience to design water improvement projects. Our staff has provided professional services with technical requirements similar to those listed in the solicitation and is eager to provide similar services for this as-needed contract. GEC has a well-documented reputation for quality and timely completion of water analysis and design services for Jefferson Parish and other entities for 38 years.

## EVALUATION CRITERIA

2) SIZE OF FIRM, CONSIDERING THE NUMBER OF PROFESSIONAL AND SUPPORT PERSONNEL REQUIRED TO PERFORM THE TYPE OF ROUTINE ENGINEERING TASKS – 10 POINTS

GEC currently has ample staff available to work either full or part time on this project assigned by Jefferson Parish, from our Metairie office on Causeway Blvd. As shown in Section E of this proposal, our staff of over 100 includes professionals and support personnel. Many have advanced degrees with over 25 years of experience with water design throughout Louisiana.

3) CAPACITY FOR TIMELY COMPLETION OF NEWLY ASSIGNED WORK, CONSIDERING THE FACTORS OF TYPE OF ROUTINE ENGINEERING TASK, CURRENT UNFINISHED WORKLOAD, AND PERSON OR FIRM'S AVAILABLE PROFESSIONAL AND SUPPORT PERSONNEL - 20 POINTS

For over 35 years, GEC has had an exemplary reputation for on-schedule work. Our large staff of professionals (both here and elsewhere in the region) gives us the flexibility needed to meet challenging deadlines. In selecting GEC, Jefferson Parish opts for a firm with a proven record of delivering projects on schedule.

GEC consistently completes project tasks in a time commensurate with a task's complexity. As part of the Louisiana TIMED Management (LTM) Joint Venture, GEC was a key contributor in accelerating the turnkey delivery of more than 260 miles of new highway construction from a 30-year schedule to 10 years, and then further accelerating the 10-year schedule to 8 years. Our staff utilizes various methods to manage multiple large projects simultaneously and meet deadlines under an aggressive schedule. Some of the various ways we perform this task include using a team approach, coordinating tasks between offices, relying on our knowledge of Local, State and Federal Regulations, employing staff that is proficient in multiple fields and following a company-wide a Quality Control/Quality Assurance plan.

GEC employs over 30 Louisiana licensed professional engineers with a support staff of technicians and administrative professionals, all of whom are readily available to meet the needs of this project.

Under Mr. Bourgeois' guidance, GEC has provided an array of engineering services to us. Throughout my tenure, GEC's services have been prompt, thorough, accomplished our goals, and within budget."

*Greater New Orleans Expressway Commission,  
Carlton Dufrechou*

## EVALUATION CRITERIA

### 4) PAST PERFORMANCE BY PERSON OR FIRM ON PARISH CONTRACTS - 10 POINTS

GEC has managed hundreds of projects for Jefferson Parish with an excellent track record of previous work with the Parish. Our staff maintains valued working relationships with Parish staff, affording us the opportunity to provide ongoing services to the Parish.

#### SAMPLING OF PARISH PROJECTS COMPLETED BY GEC

- Modifications to F6-13 (Cleary & West Napoleon) Lift Station Improvements and New Effluent Force Main
- Nicolle Blvd. Bike Path
- West Napoleon Avenue (Houma Blvd. to Harvard Ave.)
- West Napoleon/Causeway Blvd. Intersection Improvements
- Causeway Blvd. Overlay (Bore Street to West Napoleon Avenue)
- North Causeway Blvd. Overlay (17th Street to 6th Street)
- Jefferson Parish Submerged Roads Repairs (Council District 5)
- Clearview Parkway Capacity Improvements (Jefferson Highway to I-10)
- Airline Highway Lighting
- Clearview Parkway Capacity Improvements
- Westbound Veterans Blvd. Resurfacing
- Metairie Road Drainage Evaluation

### 5) LOCATION OF THE PRINCIPAL OFFICE - 15 POINTS

GEC has maintained a permanent office in Jefferson Parish since 2008. Our office is located at 3501 N. Causeway Blvd. in Metairie, Louisiana, allowing us access to all of Jefferson Parish. Any staff utilized outside of our Metairie office will coordinate directly with Metairie staff as has been done on several previous projects.

GEC's network infrastructure incorporates a decentralized wide area network spanning multiple offices and support for employees telecommuting or working in remote locations. All sites are interconnected using secured tunnels that are encrypted and deploy the most current technologies for deep packet inspection methods which scan and filter malicious packets.

All network nodes are monitored and can be accessed remotely to provide end user support when necessary. The integrity of the network is secured against the latest threats including malware and ransomware utilizing a multi-layered security strategy alongside multi-backup and off-site storage for critical data and applications. This ensures no delay in communication between office locations so that all employees can coordinate seamlessly on projects.

## EVALUATION CRITERIA

6) ADVERSARIAL LEGAL  
PROCEEDINGS BETWEEN THE  
PARISH AND THE PERSON OR FIRM  
PERFORMING PROFESSIONAL  
SERVICES - 15 POINTS

There are no current nor any prior adversarial legal proceedings between Jefferson Parish and GEC. In addition, GEC has never had a claim against it by Jefferson Parish or any other client for unsatisfactory work. GEC has never been disqualified or disbarred by any public agency from public contracts. There are neither past nor pending litigation or claims that would affect GEC's performance of this contract.

7) PRIOR SUCCESSFUL  
COMPLETION OF PROJECTS OF THE  
TYPE AND NATURE OF ROUTINE  
ENGINEERING SERVICES, AS  
DEFINED, FOR WHICH FIRM HAS  
PROVIDED VERIFIABLE REFERENCES  
- 15 POINTS

GEC has an excellent record of performance of engineering services contracts for various State, Local and Federal agencies. Our performances have produced professional consulting services on time and within budget without delays or controversy. We maintain an excellent reputation, and have performed similar work for Jefferson Parish in addition to many local agencies. We encourage the selection committee to contact references for all projects listed in Section L.

---

*We appreciate the Selection Committee's review of our extensive qualifications and look forward to the opportunity to work with Jefferson Parish on this as-needed contract.*
