PRODUCT DESCRIPTION

The door on the McCain Pedestrian Signal Housing is equipped with door-hinge hardware that is removable, reversible, or permanently attached.

The door is attached with stainless steel detent-type clevis or roll pins and eye bolt/wing nut assemblies. Two equally spaced mounting lugs, integrally cast into the sides of the 12" and the top and bottom of the 16", allow the doors to hinge from either direction. When clevis pins are used, the door and eye bolt assemblies can be removed and rotated without the use of any tools.

All interior mounting locations on the 16" housing are symmetrically positioned, allowing the rotation of components when using the bi-directional McCain Clamshell Mount to mount to the right or left side.
