We would like to thank you for the opportunity to bid on the pest control services for Natchitoches Parish School Board. We are aware that we probably will not be the cheapest bid and in past years this has eliminated us from this process. We would like to let you know that we do take care of all Red River Parish Schools and Bienville Parish Schools. We also take care of quite a few private schools as well. We are confident that these schools will give you a good recommendation of us. The Louisiana Department of Agriculture regulates when we can do service and how we need to do them. We have all the capabilities to meet their requirements and exceed your expectations. We have a wide range of treatment products and tools available to us. We are proud of the services we provide and below will be an outline of the treatment that you would receive at each building.

- All cafeterias will be treated every month.
 - o This includes treating the interior and the maintenance of the fly spray units.
- The interior of the rest of the buildings will be treated every other month.
 - o This includes all buildings on the campus.
- The exterior of the building will be treated every other month (opposite month of the inside treatment month). This is very important because most of the pest that we deal with come from outside.
 - o We will put a minimum of 10 rodent stations on each campus. These rodent stations will contain a rodenticide, and this will help to prevent rodents from getting into the school.
 - o We will also treat the grounds near the buildings with a granular insecticide that kills and repels many pests.
 - o We will treat within 50 feet of the building for fire ants also.

******I would like to include that you would get free callbacks as well. Anytime you have a problem, we will send someone out right away to take care of that problem.

I would like to let you know that we do offer other services that may be beneficial as well.

- We have a once a year fire ant treatment that comes with a one-year guarantee. This may be beneficial to you at playgrounds, sports fields, etc...
- We have a mosquito rig just like the one the parish uses. This may benefit you to be done before outdoor sporting events to protect the athletes and the fans. We offer a residual mosquito treatment that is done monthly as well.

****** All of these can be done at any time, whether we win the bid for pest control services or not.

Thank You for your time and consideration!

Michael Jordan
Branch Manager
