

**PROPOSAL**

DATE: 12/07/2011

To: Board of Waterworks Commissioners  
Lafourche Parish Water District No. 1  
5753 Highway 308  
Post Office Box 399  
Lockport, LA 70374

Gentlemen:

In compliance with your request for this proposal, the undersigned having familiarized himself with the attached stipulations, which are as follows: Advertisement for Bids, Instruction to Bidders and Detailed Specifications, all of which are made a part hereof, hereby proposes in compliance with these stipulations, to furnish f.o.b., Water Treatment Plant, 5753 Highway 308, Lockport, Louisiana and 1052 Highway 1, Thibodaux, Louisiana, the following complete as herein specified, which excludes State and Lafourche Parish Use and Sales Tax.

An Affidavit and Typical Analysis from the manufacturer shall accompany all proposals stating that each individual product furnished will comply with the standards of these specifications. In addition, the successful bidder shall furnish the District with a Certificate of Insurance, as specified in the Instructions to Bidders documentation, within ten (10) days of the request. Please use the sample certificate of insurance provided as a guide for the minimum required language and coverage.

## ***POWDER ACTIVATED CARBON*** ***MC325-PAC500***

MC325 is a high quality powdered activated carbon ideally suited for treatment of potable water. MC325-PAC500 is produced by steam activation under carefully controlled conditions to create a carbon specifically designed for removing taste and odor causing compounds from potable water supplies. Particle size and density are optimized to obtain a high degree of suspension for excellent water contact making MC325 effective in treating a wide range of water sources. MC325-PAC500 meets ANSI/AWWA B600 standards and is certified to NSF/ANSI Standard 61.

### **Specifications and Properties**

<b>Product Name</b>	MC325-PAC500
Description	Powdered Activated Carbon
<b>Product Specifications</b>	
Moisture	8% maximum as packed
Size	99% minimum minus 100 mesh
Size	95% minimum minus 200 mesh
Size	90% minimum minus 325 mesh
Iodine Number	500 minimum
<b>Typical Properties</b>	
Tap Density	0.4-0.7 g/cm <sup>3</sup>
Tannin Value	350 mg/l

---

Packaged in 1 cft, 2 cft bags or 40 cft super sacks, or bulk truck delivery.
