<b>PROJECT NO. 1</b>		
<b>Project Name, Location and Owner's contact information:</b>	<b>Nature of Firm's Responsibility:</b>	
ADA-Accessible Restroom Facility at Westwego WHARF Development  Westwego, LA  Prime - Aptim Environment & Infrastructure Gerard Gillen 504.832.4880 gerard.gillen@aptim.com	Marais is part of a team providing structural design services for the construction of an ADA accessible facility at the WHARF. The facility will house restrooms, offices, storage areas, and a small event space. The building will be approximately 4,818 SF upon completion and will include a wrap-around deck, stairs, and a ramp. Due to flood risk, the building will be elevated above the Base Flood Elevation and incorporates building standards for being located in AE flood zone and a high velocity wind area. The design of the building includes an elevated concrete deck over a system of concrete columns and beams. The framing of the building consists of a series of HSS steel scissor truss frames connected with purlins and cross-bracing. The walls of the enclosed space are cold-formed steel. The entire structure, including the ramp, is supported on piles on a system of grade beams.

1450 L&A Road Office and Warehouse Renovations  Metairie, LA  Prime - RGND - A Palmisano Company Erin Comeaux 504.620.8022 ecomeaux@rngd.com	This project consists of renovating an existing approximately 70,000 SF office and warehouse facility located on an approximately 100,952 SF site into a new office and training facility for RNGD Headquarters. The site is located on L and A Road between McDermott Road and Hauser Road in Metairie. Office area to include approximately 30,000 SF of workspace to house +150 employees. Training center to include state of the art conference space, showroom, amenities, and training area. The project will be a collaborative process with RNGD Builders LLC in the lead though each team member will be accountable for direct communication with other team members to ensure both the design and construction schedules are met. Marais is providing civil engineering services for this project including a demolition plan, site plan, and utility plan.

<b>Project Name, Location and Owner's contact information:</b>	<b>Nature of Firm's Responsibility:</b>	
Ninth Ward Stadium  New Orleans, LA  Orleans Parish School Board Prime - Williams Architects Andrew Stephens 504.566.0888 astephens@williamsarchitects.com	This new construction school sports facility will include an artificial turf football field, an 8-lane track with field events included, a grandstand seating 3,000 - 5,000 spectators plus a pressbox and scoreboard, restrooms, concessions and ticketing, parking and site amenities. Marais's scope of work consists of civil and structural design for the complete construction of the stadium facility. Site Improvements include stadium lighting, access drives and parking, entry plaza and ticket booth, and perimeter fencing. The design focuses on incorporating green infrastructure and a storm water retention system in the site design through pervious concrete, stormwater detention/native planting areas, pervious pavers, and stormwater bioswales. The site's infrastructure will include electric vehicle charging stations, bicycle parking, dark sky compliant LED lighting, water-efficient plumbing, and recycled field turf.	
Completion Date (Actual or estimated):	<b>Estimated Cost:</b>

SUNO Cafeteria and Office Design  New Orleans, LA  Office of Facility Planning and Control Prime - Bell Butler Design & Architecture Lindsay Butler, AIA 504.754.1118 lindsay@bell-butler.com	Marais is providing civil and structural design for this project involving construction of a new one-story cafeteria at the Southern University of New Orleans campus. The existing cafeteria will be demolished to make way for the new building, which will include a dining room, kitchen, storage rooms, walk-in cooler and freezer, staff offices, restrooms, mechanical rooms, electrical rooms, corridors, and other necessary spaces. The project also includes modifications to site features, parking, pavement, and sidewalks. Coordination with external vendors for kitchen equipment is essential to ensure seamless integration of utilities and mechanical connections. The scope of the proposal covers design services up to the construction documents phase, excluding bidding or construction administration. Drainage design will comply with the campus stormwater master plan.	
Completion Date (Actual or estimated):	Estimated Cost:	
	Entire Project:	Work for which Firm was Responsible:
Estimated 2025	N/A	\$37,000

## TEC Professional Services Questionnaire

<b>PROJECT NO. 7</b>		
<b>Project Name, Location and Owner's contact information:</b>	<b>Nature of Firm's Responsibility:</b>	
Lincoln Beach Redevelopment Master Plan  New Orleans, LA  City of New Orleans Prime - Sasaki Joshua Brooks, PE 720.776.4675 jbrooks@sasaki.com	Lincoln Beach is an approximately 15-acre property located on the shore of Lake Pontchartrain bordered on the southeast by a railroad track, flood protection levee, and a large roadway. It was established along the shores of the Lake in 1939 as a recreational area for the city's African American population and managed by the City of New Orleans until its closing in 1964. Since then, the structures and facilities at Lincoln Beach have gradually deteriorated over time due to lack of maintenance and a barrage of hurricane impacts, causing unsafe conditions at the site. The master planning process will facilitate additional public input and engage residents in formulating and implementing a plan that truly belongs to the community. It will include improved amenities for ongoing use of the site as well as shoreline improvements, beach nourishment, and new structures. Marais is providing civil and structural design and assistance with permitting.	
<b>Completion Date (Actual or estimated):</b>	<b>Estimated Cost:</b>	
	<b>Entire Project:</b>	<b>Work for which Firm was Responsible:</b>
Estimated 2025	N/A	\$132,000

524 Bienville St. Restaurant Renovations  New Orleans, LA  Private Client Prime - Cicada James Catalano 504.723.2565 james@cicadateam.com	This project consists of two existing buildings on Bienville Street between Chartres Street and Decatur Street in New Orleans. The buildings are 100+ years old and are currently used as storage. The downstairs will be converted into a café while the other spaces will receive life-safety updates and new MEP throughout. The assumption is that the roof will need some reinforcement for any new penetrations and AC units. Scope will encompass existing conditions, potential roof reinforcement, slab-pour back details, and checking framing sizing for floor to ceiling partitions.	
<b>Completion Date (Actual or estimated):</b>	<b>Estimated Cost:</b>

## TEC Professional Services Questionnaire

<b>PROJECT NO. 9</b>		
<b>Project Name, Location and Owner's contact information:</b>	<b>Nature of Firm's Responsibility:</b>	
757 St. Charles Hotel Renovations  New Orleans, LA  RGND - A Palmisano Company Erin Comeaux 504.620.8022 ecomeaux@rngd.com	A former St. Charles Avenue office building in the Warehouse District is being renovated into a boutique hotel. The existing three-story structure was originally built as a hotel in 1920 and renovated into an office building in 1985. The full renovation of the office building into a large-format hotel will feature 11 suites and a 2,000 square feet café/bar concept on the ground floor. Marais assumed structural design and engineer-of-record responsibilities from the previous engineer including the permit drawings. Our scope includes design and detailing needed to support the VE efforts and early construction, slab/foundation design on first floor historic building, shoring up of joists for 2nd and 3rd floors, stair design, new masonry openings at café, pool structure (including weight of planters), structural support in lobby, preparation of CD drawings, and construction phase services to include reviewing RFIs and Submittals and site visits as needed.	
<b>Completion Date (Actual or estimated):</b>	<b>Estimated Cost:</b>	
	<b>Entire Project:</b>	<b>Work for which Firm was Responsible:</b>
Estimated 2025	N/A	\$33,000

<b>PROJECT NO. 10</b>		
<b>Project Name, Location and Owner's contact information:</b>	<b>Nature of Firm's Responsibility:</b>	
Coushatta Education Building Historic Renovations  Coushatta Reservation Elton, LA  Nelson Worldwide Rebecca Muchow 612.638.6324 rmuchow@nelsonww.com	The current Coushatta educational building is the oldest facility on the Reservation, and in extreme state of disrepair that makes renovations infeasible. A number of educational and social programs critical to support the community that have traditionally been provided are no longer being offered on-site due to the condition of the existing building. A new facility with greatly expanded programming is planned to provide large community gathering space, cultural education space, and multi-generational educational facilities. Early learning, educational assistance, kids tutoring, college research area, K-12 support programming, and Elder services will be supported by the new facility. Marais is providing civil and structural engineering services for this project to include structural (wind) analysis, framing and foundation drawings, civil site design, and construction phase services.	
<b>Completion Date (Actual or estimated):</b>	<b>Estimated Cost:</b>	
	<b>Entire Project:</b>	<b>Work for which Firm was Responsible:</b>
Estimated 2025	N/A	\$40,000

**N. Use this space to provide any additional information or description of resources supporting Firm's qualifications for the proposed project.**

Whether partnering with government agencies or working with developers, contractors and private enterprises, our team provides structural engineering and design services for new construction, rehabilitation, and restoration projects. Beginning with initial discussions all the way through project closeout, we make quality control and assurance a part of every building project phase. We have developed a deep expertise of wood-framed and brick buildings in southern Louisiana through our design work with existing buildings and new construction. Our structural design services typically start with a structural analysis that includes a wind tolerance assessment. This information is essential for developing framing, foundation, and roof plans down the road. We also incorporate these standards into our designs to ensure stability and safety of the buildings we work on. Well-informed, detailed and accurate structural engineering ensures structures are durable, suitable for their purpose, and make efficient use of materials.

Name & Title:	<b>Gregory K. Futch, CFSP Food Service Consultant</b>
Project Assignment:	<b>Project Manager</b>
Name of Firm with which associated:	<b>Futch Design Associates, Inc.</b>
Years' Experience with this Firm:	<b>34</b>
Education: Degree(s)/Year/Specialization:	<b>3 Years Business Administration, 1984-1988</b>
Active Registration: Year first registered/discipline:	<b>N/A – Licenses are not offered for Food Service Consultants</b>

**Other experience and qualifications relevant to the proposed project:**

Greg Futch is the President and sole owner of Futch Design Associates, Inc. with an extensive background in kitchen facilities design of all types. He has 34 years of experience providing a multitude of professional services that include needs assessment, cost estimating, space programming, schematic/design development, specification writing, construction document preparation, construction administration and site inspections. Five years prior to his career as a designer/consultant, Greg worked for an equipment contractor as an installation technician, draftsman and equipment salesman.

#### **LSU Agriculture Center | New Laboratory Building**

Mr. Futch was the Food Service Facilities Designer/Consultant for the new LSU Agriculture Center Laboratory Building at Louisiana State University. This facility was designed as an instructional/culinary kitchen but is currently used as an incubation kitchen.

#### **LSU Agriculture Center Incubator-Warehouse Kitchen (Completed Thru Construction Documents)**

Mr. Futch was the Food Service Facilities Designer/Consultant for the new Agriculture Center at Louisiana State University. Our services were provided through 100% Contract Documents; however the building was never constructed.

#### **Patrick F. Taylor Academy | Jefferson Parish Schools**

Mr. Futch was the Food Service Facilities Designer/Consultant for the Patrick F. Taylor Academy. This project was a new Science and Technology Education Facility.

### **PROFESSIONAL TRAINING AND EXPERIENCE**

Futch Design Associates, Incorporated is an independent professional food service facility design/consulting firm formed in 1966, offering comprehensive services to hospitality, education, health care, military, and correctional institutions. We are not in any way associated with the manufacturing or sale of food service equipment and receive remuneration exclusively from rendering professional consulting/design services. Our interest is to provide our clients with the highest level of expertise and services available, undertaking each assignment as a unique challenge.

We have provided our services on more than 1500 projects which cover a wide variety of types of installation in locations throughout the United States with projects ranging up to \$8,000,000 in food and beverage equipment costs. While most of our projects are located in the southeastern United States, we have provided our services in many of the continental states as well as a few international locations. Our services include needs assessments, schematic design studies/drawings, design development phase drawings, contract document drawings, cost estimating, food service equipment specifications, construction administration services, and site visits to ensure a well-coordinated design to meet project requirements.

Futch Design Associates, Inc. experience includes the following:

- LSU Agriculture Center | New Laboratory Building
- LSU Agriculture Center | Incubator-Warehouse Kitchen
- Patrick F. Taylor Academy | Jefferson Parish Schools

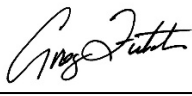

### **SIZE OF FIRM**

Futch Design Associates, Inc. currently employs one (1) Food Service Consultant (Professional Member of Foodservice Consultants Society International), one (1) CADD Technician, and one (1) Administrative Assistant/Specification Writer.

Our production facilities utilize computer-aided drafting and computer word processing systems. Our computer hardware includes e-mail capabilities to expedite the exchange of drawing/specification files. Our computer-aided drafting and word processing programs include the latest version of AutoCAD and Microsoft Word.

We carry Professional Liability, General Liability, and Workman's Compensation Insurance, and will provide Certificates of Insurance upon request.

EXECUTIVE SUMMARY & RESPONSE  
New Orleans Food & Beverage Incubator RFQ  
Architectural Services

### Members of the Selection Committee:

We are eager and excited to submit our qualifications for consideration in response to the Request for Qualifications in solicitation of proposals for JEDCO New Orleans Food & Beverage Incubator. Studio Rise LLC (TIN: 86-2175238 - dba studio<sup>^</sup>**RISE**) is a full service licensed Louisiana Architecture Firm (#AF0838) based in New Orleans, Louisiana that was founded by Mark Heck (LA#9451), Calla Bardwell and Calvin Gallion III (LA#10105).

Our team is committed to providing high-quality design-based solutions that will meet the goals of JEDCO to service the Greater New Orleans culinary community. Our team brings together a diverse group of professionals with expansive experience in commercial kitchen and education projects, architectural design, project management from concept to completed project, and community engagement. We believe in working on projects that create and harbor vibrant thriving communities that enhance the end-user experience, in this case the start-up culinary entrepreneurs working to further develop their skills, concepts and products. In the following documentation, you will find detailed information substantiating the qualifications of our Design and Consultant Team outlined in the published RFQ.

Our team includes Huseman & Associates (MEP Engineers) and Futch Design Associates (Kitchen Consultant) who specialize in commercial kitchens of all scales. Additionally, studio<sup>^</sup>**RISE** has worked on new facilities for bakeries, coffee shops, restaurants and coffee roasting facilities. Mark Heck, Principal of studio<sup>^</sup>**RISE**, was the Project Manager for the NOCCA Forum which included the expanded Culinary Program for the school along with a public cafe and event space.

In addition to culinary project experience, the overall team has successfully delivered countless projects of varying scales. While a relatively new firm, studio<sup>^</sup>**RISE** consists of a team that brings a collective 30+ years of professional experience that includes, but not limited to, elementary schools, restaurants and hospitality projects. Through this experience, the team is effective in managing a project through all phases from concept to project closeout. We achieve this through an team-wide organization and quality control measures at every phase. We also have a clear growth plan that aligns our firm's goal of successful project delivery. To date, our firm has two projects in construction that are in the \$4-7 million range, with another in construction documentation with a \$3 million budget.

We are committed to delivering a successful outcome for JEDCO and the Food and Beverage Incubator and are confident that our expertise, experience, and proposed approach align with the objectives outlined in the RFQ.

Sincerely,

**Mark Heck, AIA**  
Principal

# FIRM OVERVIEW

At the core studio<sup>^</sup>**RISE** has one overarching goal - to leave a community better at the end of each project. With this, we hope to create a lasting relationship between our projects, clients and the community.

studio<sup>^</sup>**RISE** aspires to produce work that is based in its community while being meaningful and having a positive impact on its surroundings. We find opportunities on all projects, even private ones, to highlight public interfacing moments to ensure the structures are responding to the community instead of overpowering it. We believe architecture should reflect its surroundings while not simply recreating traditional archetypes. Instead, <sup>^</sup>**RISE** looks to take inspiration from materials, scale and cadence of the neighboring fabric to produce enduring work. We see potential in all projects, no matter the scale or program, and find an intentional approach to a successful design.

At <sup>^</sup>**RISE** we believe that design is larger than one opinion or approach. With this basic principle, we focus on a studio culture that embraces a communal environment and open interaction that allows for all voices to be heard and respected. We believe in exploring options and want to work with other creative individuals. <sup>^</sup>**RISE** searches for fresh ideas both within its team as well as invites outside voices to participate in the design process. We understand that ideas do not just live with the individual; instead, our team takes inspiration from all aspects of our lives.

studio<sup>^</sup>**RISE** is an emerging firm with intentions to grow in the next few years. While at our current size, we complete on average 26 projects a year at a multitude of scales and are on track to do the same in 2024. studio<sup>^</sup>**RISE** utilizes a software called Monograph to schedule projects and keep track of milestones. We can predict, months in advanced, what our workload will be and set appropriate deadlines based on current project loads. In addition to our own tracking with timelines and milestones, we have existing relationships with a number of other architecture professionals that would allow us to hire full or part-time employees, if the need should arise. Our team size and proximity allows for a quick on-boarding process.

As a team, the listed studio<sup>^</sup>**RISE** team has completed several projects of varying sizes to date. Please see additional relevant experience, licensures and certifications are attached in the form of team resumes and project highlights.

## MISSION

studio<sup>^</sup>**RISE** collaborates with clients in a creative process that guides them through the nuances of design, at multiple scales. Focused on creating a dynamic design based on intentional choices and unbounded opportunities, the result responds to the needs of the client while being immersed in the community.

## CORE PRINCIPLES

### INTENTIONAL

Effectively processing the detailed needs of the client through analysis of the unique characteristics of the project.

### UNBOUNDED

Openly collaborating to create dynamic design reflective of our ever changing environment.

### IMMERSED

Diligently creating spaces that complement the surrounding language of the place and enhance the sense of community.

## RELEVANT EXPERIENCE

studio<sup>^</sup>**RISE** and our team of consultants have a diverse portfolio that we believe aligns with JEDCO's New Orleans Food and Beverage Incubator. This experience ranges from commercial and educational kitchens, restaurants and cafes, education facilities and innovative landscapes.

### Commercial and Educational Kitchens

Mark Heck, while at a previous firm, was the Project Manager for the expansion and relocation of the NOCCA Culinary Arts Department into the NOCCA Forum. Along with Futch Design Associates, he worked closely with the Director of the program to provide four commercial training cooking stations, a bakery room and butchering room. Additionally, Greg Futch has 34 years of kitchen facility design including projects such as the LSU Agriculture Incubator-Warehouse Kitchen and the LSU Agriculture Center New Laboratory Building which is used as an incubation kitchen after being designed as a instructional kitchen. Huseman and Associates have also worked on several large scale commercial kitchens including Tulane University's Teaching Kitchen and the OPSO Kitchen/Warehouse.

### Restaurants and Cafes

studio<sup>^</sup>**RISE** is currently designing a new boutique restaurant in Algiers, LA. Our office has also completed an expansion of Mammoth Coffee for extended cafe space and roasting operations. Most recently, we completed Le Ponce which is a French cafe that makes high end pastries in house as well as acting as the commissary kitchen for Cafe Degas.

Huseman and Associates have completed several restaurant projects with their most recent being the renovations of Cafe NOMA in the New Orleans Museum of Art and Scrambled a new restaurant that is integrated with Octavia Books. Futch Design Associates has worked on dozens of restaurant projects as one of the leading kitchen consultants in Louisiana.

### Education Facilities

All team members have vast experience working on education facilities ranging from early childcare to collegiate projects. This includes new construction and renovations of public school buildings, university facilities. studio<sup>^</sup>**RISE** has focused on early childhood education facilities most recently, but Mark Heck has been the Project Manager for two new construction elementary schools in St. Bernard Parish, the first was designed in three and half months and built in 9 months.

### Innovative Landscapes & Outdoor Elements

Evans+Lighter and Marais Consultants both have extensive experience with landscape and storm-water design that creates vibrant outdoor spaces.

studio<sup>^</sup>**RISE** recently completed a shade structure/covered outdoor kitchen space for NOCCA in the Press Street Gardens space. This project was designed to fit seamlessly into the existing garden context while allowing for caterers and students to have a space for event based food service.

## KEY PERSONNEL & ROLES

### **Mark Heck**, Principal-In-Charge

Mark Heck's role on most projects will be Principal-In-Charge. Within this role, he will oversee and engage in all work with a focus on client interfacing, design and quality control. He will review all work related to the project before being issued to the client or construction partners.

### **Calvin Gallion**, Design Principal

Calvin Gallion's role will be Design Principal. His responsibilities will involve developing the design, aide in the production of construction documents, coordinating consultants and handling the day-to-day project activities.

### **Calla Bardwell**, Project Manager

Calla Bardwell's role will be Project Manager. In this capacity, she will work with the team on document production and design development, as well as handling day-to-day project activities.

studio<sup>^</sup>**RISE** is considered a small firm, however we believe that this works to JEDCO's advantage. We will be able to work collaboratively within the office as well as with our consultants. We look forward to the opportunity to meld our varying backgrounds to create the best possible outcomes for the Food and Beverage Incubator. While these are the typical roles, studio<sup>^</sup>**RISE** prides itself on collaborative work and all voices having value. We search for the best solutions to problems as opposed to relying on hierarchy to establish a direction.

studio<sup>^</sup>**RISE** recommends appointing Mark Heck to be the point of contact. He along with Calvin Gallion and Calla Bardwell will divide up the work based on their strengths to complete all work in a timely and efficient manner. Additionally, Mark Heck will coordinate with Project Leads at the consulting firms to ensure the entire team is delivering the needed services and meeting expectations. This method will allow transparency and showcase the depth of talent studio<sup>^</sup>**RISE** possesses. We believe in openly collaborating to create dynamic design reflective of our ever-changing environment while still diligently creating spaces that complement the surrounding language of the place and enhance the sense of community. The ability for our firm to communicate and share ideas ensures continuity and stability throughout the project's development. studio<sup>^</sup>**RISE** regularly practices internal quality control checks to verify our drawings meet all standards and expectations.

studio<sup>^</sup>**RISE** is an emerging firm with intentions to grow in the next few years. While at our current size, we complete on average 26 projects a year at a multitude of scales and are on track to do the same in 2024. studio<sup>^</sup>**RISE** utilizes a software called Monograph to schedule projects and keep track of milestones. We can predict, months in advanced, what our workload will be and set appropriate deadlines based on current project loads. In addition to our own tracking with timelines and milestones, we have existing relationships with a number of other architecture professionals that would allow us to hire full or part-time employees, if the need should arise. Our team size and proximity allows for a quick on-boarding process.

As a team, the listed studio<sup>^</sup>**RISE** team has completed several projects of varying sizes to date. Please see additional relevant experience, licensures and certifications are attached in the form of team resumes and project highlights.

## MANAGEMENT PLAN

Our focus throughout all project phases is to engage in an effective collaborative process resulting in successful outcomes for the client and overall team. Clear communication creates a team wide understanding of design intent, project goals and important milestones that will allow our team to deliver a successful project that meets JEDCO & the Incubator's needs, budget and timeline. We hope to deploy the best in industry technology and established best practices to create and shepherd an effective and efficient approach that organizes project phases and milestones and allows for on-going QA/QC for the most successful final project.

We have included our Project Methodology below which outlines all phases of the project process. At each deliverable review, studio<sup>^</sup>**RISE** will provide a set of current documents in either physical or digital format for the review by JEDCO along with a digital comment form to collect project feedback. These documents will be reviewed and comments either addressed in the documents or response provided.

## PROJECT METHODOLOGY

studio<sup>^</sup>**RISE** prides ourselves on working with clients to meet each project's scope and objectives, and our work on the JEDCO New Orleans Food Incubator would be no different. Our approach is outlined below:

- **Pre-Design**
  - Review the project's program and Food & Beverage Incubator Recommendations Report provided by JEDCO extensively and meet with the JEDCO Project Staff to confirm our understanding and raise any questions that have come out of our review.
  - Participate in further programming discussions with potential tenants for needs and desires.
  - Establish Schedule through Schematic Design, Design Development, Permitting, Construction Documents and Bidding with exact milestone dates.
- **Design**
  - Develop a schematic design & preliminary budget package for review by JEDCO.
  - Move forward with design development & outline pricing package for review by JEDCO.
  - 50% construction documents provided to JEDCO for review with updated outline budget.
  - After JEDCO's review, 50% construction documents would be submitted to permitting agencies for review.
  - Bid documents provided to JEDCO for review with final outline budget.
- **Bidding**
  - Issue Bid Documents.
  - Hold Pre-Bid and Award Meetings.
  - Issue addenda based upon questions from potential bidders.
  - Work with JEDCO to confirm the qualified bid.
  - Issue draft contract to qualified bidder and work through contract negotiations and requirements.
- **Construction**
  - Attend contractors pre-construction site meeting.
  - Attend weekly construction meetings.
  - Provide required field reports.
  - Respond to RFIs and review of submittals.
  - Review and certification of Pay Applications.
  - Attend contractor set regulatory inspections.
  - Final inspection for punch list review and closeout.
- **Post Construction**
  - Review all closeout documents for compliance and turn over to JEDCO.
  - One year warranty walk with JEDCO and contractor.

## EARLY PARTNERS MAIN CAMPUS

New Orleans, LA

Mark Heck  
Calvin Gallion  
Calla Bardwell

Summer 2022  
8,300 sf  
Kim Frusciante  
504.376.5110  
[kim@earlypartners.org](mailto:kim@earlypartners.org)

After a successful pilot program year at a temporary space, it became paramount that Early Partners find a permanent home to establish their future. studio^RISE assisted the executive director in reviewing possible locations before the Annunciation Firehouse was selected. The Firehouse is the oldest firehouse in the city of New Orleans and is being adapted from its previous use as an event space into a dynamic learning environment for students aged 1-5 years old. Flexible areas, such as the large indoor playroom, allow for students to experience different learning environments. As a non-profit, Early Partners had a limited budget for the project and studio^RISE worked with the team to bring in contractors early to provide preliminary budgets and make an early selection on the contractor to allow for budget input and release of long lead items to allow for timely construction.

## PRESS ST GARDENS SHADE STRUCTURE

New Orleans, LA

Mark Heck

dtuohy@nocca.com

Press Street Gardens approached studio^RISE wanting an economical and multi-purpose shade structure that could double as a serving structure for events and for everyday garden prep. With this in mind, the team set forth on designing multiple forms and landed on one that could grow in the future if need be. studio^RISE worked in conjunction with Press Street Gardens, the NOCCA Foundation, Youth Rebuilding New Orleans and Urbanscapes NOLA to see this project to completion.

## NOCCA FORUM

New Orleans, LA

Mark Heck (w/ Williams Architects, Project Manager)

2014  
62,000 sf  
Ayman Jaber  
504.940.2917

[Ajaber@noccafoundation.org](mailto:Ajaber@noccafoundation.org)

The adaptive reuse of an 1830s rail depot, 1850s warehouse and existing infill structure into the NOCCA Forum provided an expansion of the existing New Orleans Center for Creative Arts campus. The school needed facilities for an expanded culinary arts department, science labs and academic studio classrooms. Enhancing the community engagement with the project and student works, the public has access to a public art gallery, private event space and a tenant space, now home to JAM Nola. Mark Heck (while employed with Williams Architects) oversaw the entire design, construction document and contract administration phases of the project.

## ERRORS AND OMISSIONS

With over 20 years of professional experience, studio<sup>^</sup>RISE and its team understand the realities of the design and construction process. A part of that reality is the possibility of design errors and omissions. While we make all efforts to produce a thorough set of documents through rigorous internal quality control reviews, mistakes can be made. Our team believes in addressing all issues head on. We intend to work through issues to come to an amicable result that allows for all parties to achieve the goal and deliver a successful project.

If our team, internally or our consultants, produce work that leads to rework, we will work with the overall team to resolve the issue with the goal being a resolution that serves the project intent with no claims being made. The same applies to omissions in the documents. We follow the standard AIA contract language in the realm of the financial responsibilities of all parties when these instances arise.

## studio<sup>^</sup>RISE CURRENT & PROJECTED WORKLOAD

Below is a list of studio<sup>^</sup>RISE's current projects and the time allotted per individual. At this time, our team is currently working at approximately 80% capacity with opportunity for about 20% more workload. Many of our current projects are in Construction Administration with varying completion dates. By the New Year, 3-4 of the projects currently in construction will be complete with most of the projects in design being complete or near completion and transitioning into the construction phase. This projects our capacity by end of the first quarter of 2025 to be in the range of 50-60%.
