REQUIRED SIGNATURE PAGE FOR SUBMITTALS

This page, signed by an authorized officer of your Company, must accompany your submittal as the cover page.

I, the undersigned, having carefully examined the Request for Qualifications, propose to furnish services in accordance therewith as set forth in the attached submittal.

I hereby certify that this submittal is genuine and not a sham or collusive submittal, or made in the interests or on behalf of any person not therein named; and I have not directly or indirectly induced or solicited any Submitter or supplier on the above work to put in a sham submittal or any person or corporation to refrain from submitting a submittal; and that I have not in any manner sought by collusion to secure to myself an advantage over any other Submitter(s) or person(s).

In order to induce the Sheriff Office to consider this submittal, the Submitter irrevocably waives any existing rights which it may have, by contract or otherwise, to require another person or corporation to refrain from submitting a submittal to or performing work or providing supplies to St. John the Baptist Parish Sheriff Office, and Submitter further promises that it will not in the future directly or indirectly induce or solicit any person or corporation to refrain from submitting a bid or submittal to or from performing work or providing supplies to St. John the Baptist Parish.

Please type or print legibly the information below.

Submitter hereby acknowledges receipt of the RFQ and agrees to Terms and Conditions set forth in this RFQ.

Re: RFQ- Request for Qualifications Architectural/Engineering Services
for New Sheriff Office Admin Building RFQ.2025.01

Dear Mr. Clement,

Sizeler Thompson Brown Architects (STBA) is pleased to submit our qualifications to your Request for Qualifications for the SJBPSO's New Sheriff Office Admin Building. STBA has extensive experience in similar projects for institutional and governmental agencies. We have prepared our response based upon the RFQ, and have indexed our information accordingly in our Table of Contents for your review and use.

Sizeler Thompson Brown Architects is a local architectural design firm with over 45 years experience in planning & designing projects throughout the South Louisiana region. We are proud of our portfolio of public and institutional facilities, which includes a substantial number serving the public through local parish governments and agencies. Additionally, our portfolio includes numerous sheriff's offices, fire stations, safe rooms, community shelters and command centers at hospital campuses which are all indicative of the efforts of our firm serving our region's citizens via decades of community-centered design for public safety facilities. For all projects, we partner with consultants who are highly qualified in their specialties to provide complete quality services to our clients.

As a lifelong resident of the River Parishes in Luling, I am excited at the opportunity to partner with the St. John the Baptist Parish Sheriff's Office for such a critical project in our neighboring Parish. As shown in the following pages, STBA is very proud of our past community based projects in St. John Parish as well as the neighboring River Parishes. The project team that we are proposing for this project has direct experience with our recent projects in the Parish and are excited for the opportunity to again work on such a critical community-based project.

We appreciate the opportunity to provide our qualifications and trust that the information submitted responds to your request for qualifications for this project. If you should need any additional information, please let us know. We look forward to the opportunity to work with you on your upcoming project.

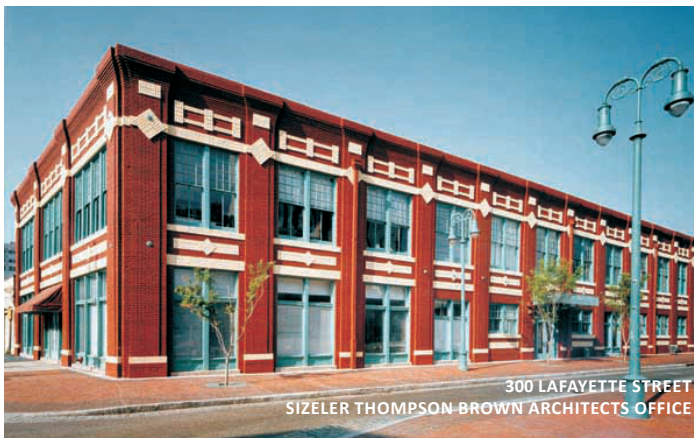

Sincerely,

Sizeler Thompson Brown Architects

Steve Templet AIA, FACHA, ASHE
Principal

FIRM DESCRIPTION

Sizeler Thompson Brown Architects (STBA), located in Downtown New Orleans, Louisiana, is a **full-service** design firm offering architectural, masterplanning, and interior design services, as well as strategic partnering with specialized outside consultants. With a staff of 14, including 8 registered architects, 2 registered interior designers, and administration support staff, STBA is committed to delivering the **highest level of professional service** and expertise to our clients. Founded in 1979, STBA has built an extensive portfolio of Community, Government, Healthcare, Education, Sports, and Corporate projects. STBA's expertise encompasses a range of project construction types, such as new construction, renovation, repairs, and adaptive reuse, as well as project delivery methods that include CMAR, Design-Bid-Build, and Design-Build. As one of the oldest architectural firms in Louisiana, STBA is **deeply committed** to the long-term growth and sustainability of the South Louisiana region.

MANAGEMENT & STAFF

STBA is a Professional Corporation owned by its three Principals who average over 30 years of experience in community-based design. The firm's senior leadership team – made up of Principals and Project Managers – manage the firm's business and oversee all projects.

Our staff's expertise is particularly noteworthy given the depth of our board certifications and other credentials in various critical knowledge areas. With this **broad range of expertise and experience**, our staff is well-equipped to handle complex projects while maintaining **quality and attention to detail**.

CIVIC AND GOVERNMENT EXPERTISE

At STBA, we bring **decades of experience** in designing government and civic spaces that serve communities efficiently and sustainably making us the ideal choice for new developments in these sectors. Our portfolio includes municipal buildings, courthouses, public safety facilities, libraries, and community centers—each tailored to meet the functional needs of government agencies while enhancing public engagement. With deep **expertise** in navigating regulatory requirements, zoning laws, and complex funding structures, we ensure seamless project execution from concept to completion. Our team collaborates closely with our clients and building users to create spaces that embody transparency, accessibility, and long-term resilience. Whether a new building or a renovation, STBA is **committed** to shaping environments that inspire and serve.

PRIOR EXPERIENCES IN RIVER PARISHES

STBA has completed numerous projects throughout the region and we are proud to say that we enjoy **long-standing working relationships** with both St. John the Baptist Parish and St. Charles Parish. Our connection to the River Parishes extends beyond just a working relationship, one of our Principals is a lifelong resident of St. Charles Parish. Because of this, our firm has a vested interest in the success and development of the region.

DESIGN PROCESS

Design is a process that evolves from understanding our clients' needs and develops into three dimensional forms through design charrettes, sketches, studies, and reviews. An interactive, collaborative process involving the client, architect and consultants, we believe successful design enhances life's experiences. Whether enjoying a sporting event, working in an office, visiting a hospital, or attending a function at a convention ballroom, design matters.

STBA's approach to project planning and design is straightforward – we strive to provide inspired, **functional** design solutions serving our clients that can be constructed within the project's budget and schedule. We understand **constructibility** to be as important as the design itself, and we know proven construction detailing produces **designs that last**.

Our work is very **hands on**, and we work with you until we are sure that our design meets your expectations. This is achieved by beginning the process with visioning presentations, where we provide you with inspiration images to better understand your expectations for the project. Once the vision is understood, **renderings of key spaces, project flythroughs, and finish presentations** are done to bring these ideas to life and ensure that the direction of the project is continuing as intended.

*STBA's approach to design is simple – we strive to give our clients inspired yet **functional design solutions that exceed expectations** and can be constructed within their budget and schedule.*

TECHNOLOGY

Our professional staff and our consultants are **experienced** in the **latest** production technology. STBA utilizes Revit, a building information modeling (BIM) program for architectural design and construction documentation by generating floor plans, sections, 2D and 3D views, as well as renderings. This technology allows us to develop and work with 3D models of our designs, beneficial at all phases of the project. Advantages to our client are **better coordination** of design and construction drawings throughout the project, access to a constantly updated database of building information, and 3D visualizations which **reduce time and costs** while ensuring higher-quality outcomes.

RENDERING AND FLY THROUGHS

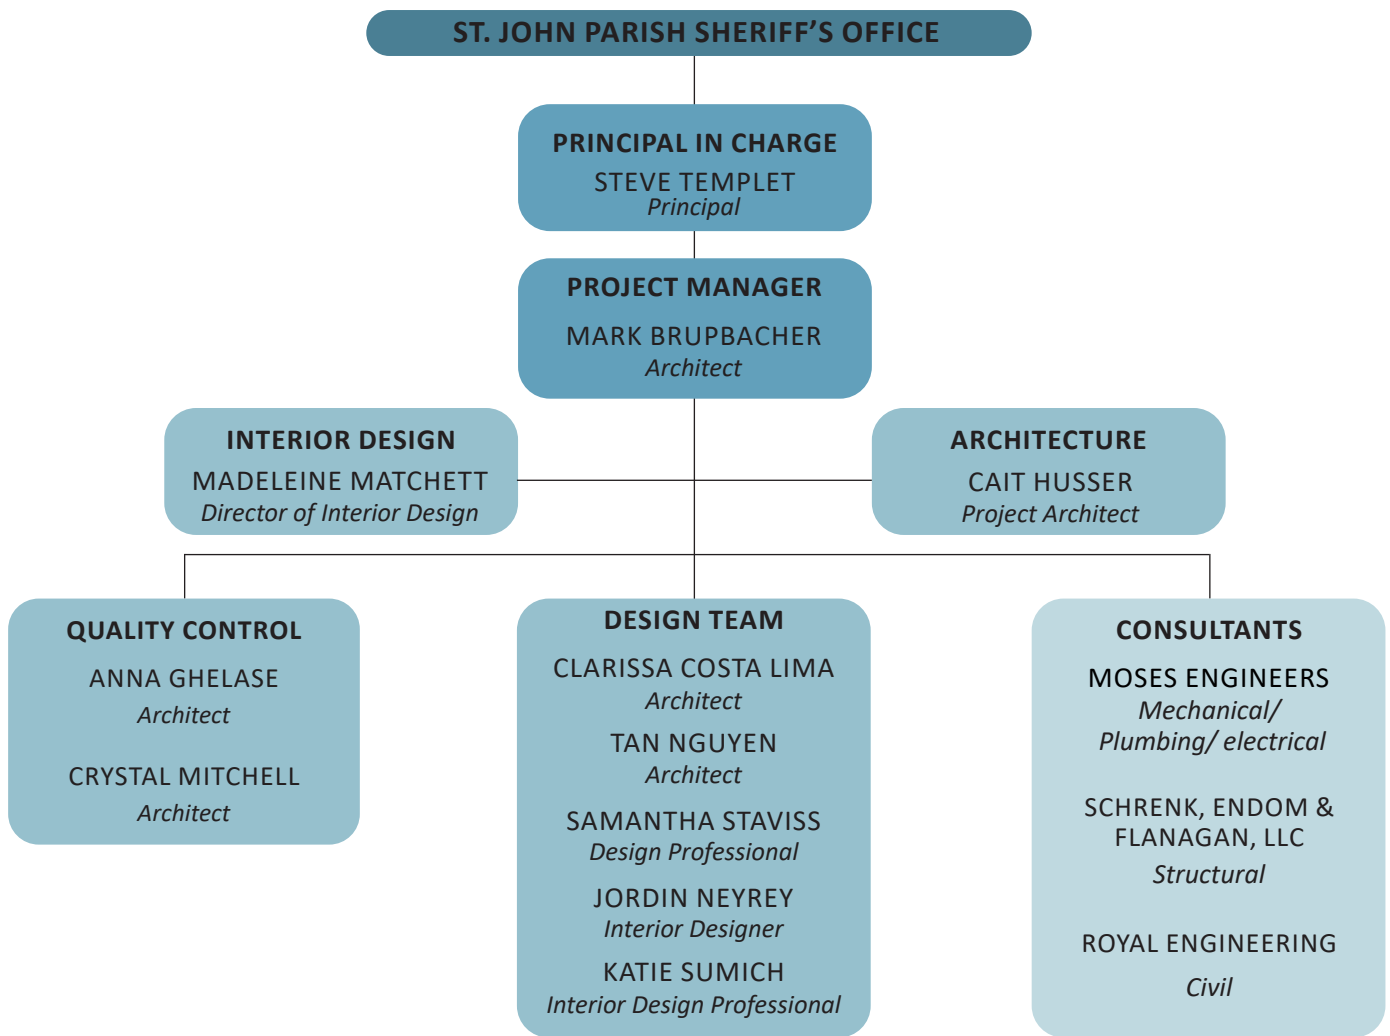

CODE KNOWLEDGE AND EXPERTISE

The STBA team has a detailed understanding of the code compliance requirements of various agencies and regulatory authorities. Our staff regularly attends seminars and conferences to stay up to date on specific code applications and upcoming adaptations. The team starts each project by conducting a thorough project specific code review in order to fully understand any and all code implications and allow the design to respond accordingly without sacrificing aesthetics. Our team also has **extensive experience** navigating the review processes of various regulatory agencies. **This knowledge is paramount in the overall success of our projects.**

QUALIFICATIONS AND EXPERIENCE - ORGANIZATIONAL CHART

The proposed STBA staff and their roles and responsibilities:

OUR TEAM

Mark Brupbacher will serve as the Project Manager and will manage the project team from design through construction and occupancy, maintaining continuity and knowledge of the project at every phase. **Steve Templet** will be the Principal in Charge and will oversee the project and ensure alignment with the overall goals and design intent. Both Steve and Mark will be the primary contacts for the Sheriff's Office to ensure successful communication throughout the project. **Anna Ghelase** and **Crystal Mitchell** will lead the Quality Control effort to ensure proper coordination amongst the design team through all phases.

We have partnered with a strong team of trusted consultants with whom we have had successful collaboration on numerous projects.

PROJECT STAFFING

Our staffing plan emphasizes collaboration at every step. Through weekly meetings, STBA adapts staffing levels based on a project's unique and evolving needs. In addition to the key proposed project personnel, the remaining staff at STBA is available as additional support, allowing us to scale efforts up or down as the project scope requires. The same STBA team involved with this project during design will also be tasked with providing construction administration. We believe this is vital for the success of the construction phase--providing continuity of the Owner's goals and decision-making from the design phase through to the end of the project.

Steve Templet

AIA, FACHA, CHID, ASHE, LEED AP
Principal

Steve is a native and resident of St. Charles Parish and has a total of 34 years of professional experience, with a concentration in public and institutional projects. The sole focus of his career has been working on projects that serve the citizens of the South Louisiana region, with over 95% of his work located within a 50-mile radius of his hometown of Luling. Indicative of his attention to client service, he has successfully led and managed over 50 projects in Slidell for Slidell Memorial Hospital over the past 12 years. A vastly experienced Architect and Project Manager, Steve will be committed to providing leadership and oversight through all phases of design and construction.

Education

Bachelor of Architecture, University of Texas, 1990

Experience

34 years

Registration

Louisiana Architectural #4682

Professional Affiliations

American Institute of Architects
American College of Healthcare Architects
American Academy of Healthcare Interior Designers
American Society for Health Care Engineering

Steve is a frequent educational speaker at national design conferences and has been asked to serve as a Subject Matter Expert for multiple national organizations such as ASHE, the Facilities Guidelines Institute, and the American College of Healthcare Executives. In 2002 he was inducted into the first class of the American College of Healthcare Architects and previously served in 2022 as National President for their Board of Regents. In addition to his firm-based projects, Steve has served on several local public and private committees, including building committees for local church-based organizations, and served as the Co-Chair for the St. Charles Parish Building Code Task Force in 2002-2004.

Key Project Experience:

- Jefferson Parish Fire Department Administrative Building
- Tangipahoa Parish Jail Re-roof
- Physicians Center Medical Office Building
- Slidell Memorial Hospital Surgery Addition and Renovations
- Jefferson Parish School Board
- Orleans Parish RSD
- Memorial Hospital at Gulfport Administration Offices
- Ridgeland Medical Office Building
- West Jefferson Medical Center Masterplan

Mark Brupbacher

AIA

Project Manager

Mark joined STBA in 1997 and has provided technical expertise, project production, and construction administration on countless institutional projects across South Louisiana. Mark's focus on the technical intricacies of building construction and performance, as well as his attention to detail, have contributed to the overall success and user satisfaction of his projects. His experience with new construction and renovation projects results in seamless integration of new building systems with existing.

Education

Bachelor of Architecture, Louisiana
State University, 1996

Experience

27 years

Registration

Louisiana Architectural #7471

Professional Affiliations

American Institute of Architects

At STBA, Mark has developed a diverse portfolio of projects within the Government, Corporate, Education, and Healthcare sectors. He has served as Project Manager for numerous roofing projects throughout the state. As Project Architect and Construction Administrator, he has assisted the Archdiocese of New Orleans in maintaining and upgrading school buildings on multiple campuses.

Key Project Experience:

- Tangipahoa Parish Jail Re-roof
- St. John the Baptist Fire Department No. 51 (*Project PM*)
- St. John the Baptist Parish Community Center
- St. John the Baptist Parish Roland Borne Memorial Library Expansion/ Renovation
- East Jefferson Levee District Saferoom and Consolidated Facility
- Jefferson Parish Fire Department Headquarters
- Orleans Sheriff's Temporary Executive Offices
- Jefferson Parish General Government Building
- LA DOTD Transportation Management Center and regional Planning Commission
- St. Charles Parish Edward Dufresne Community Center

Cait Husser
NCARB
Project Architect

Cait is an experienced architect committed to creating spaces that enhance the human experience. With seven years of dedicated service at STBA, she has played an integral role in a multitude of projects, including governmental buildings, healthcare facilities, educational institutions, recreational areas, and administrative complexes. Her involvement in each stage of the design process is extensive, from envisioning the initial schematic design to crafting details within the construction documents for many projects.

Education

Master of Architecture, University of Louisiana at Lafayette, 2015
 Bachelor of Science in Architecture, University of Louisiana at Lafayette, 2013

Registration
 Louisiana Architectural #9761

Professional Affiliations
 NCARB

Currently overseeing the construction administration for Jefferson Parish Juvenile Services administrative building, Cait ensures that the vision conceived during the design phase seamlessly translates into reality, guaranteeing the successful execution of the project. Her skill in navigating complex design challenges and regulatory standards shines through her contribution to both the FEMA funded St. John the Baptist Parish Essential Services Saferoom and Federally funded East Jefferson Levee District Saferoom and Consolidated Facilities.

Key Project Experience:

- St. John the Baptist Parish West Bank Public Safety Complex
- St. John the Baptist Parish Essential Services Saferoom
- Jefferson Parish Juvenile Services Administration Building
- East Jefferson Levee District Saferoom and Consolidated Facilities
- Jefferson Parish Fire Department Administrative Building
- St. Charles Parish Hospital Pharmacy
- Delgado Community College Math and Sciences Admin Office Reno.
- SMH Support Services Administrative Offices Relocation

Madeleine Matchett

CHID, IIDA, NCIDQ, LA REG ID
Director of Interior Design

Madeleine leads the STBA Interior Design Department as Director of Interior Design and has vast experience in all areas of civic, government, education, healthcare, corporate office, and retail design. She prides herself on staying informed about the latest design trends and innovative products and believes in creating environments that can adapt to evolving technology. Working directly with the client on every project, Madeleine creates a design that is unique to every space and reflects the client's specific vision and needs.

In her spare time, Madeleine manages and mentors student interns. She led a study group for LSU students interning in New Orleans looking to take their National Council for Interior Design Qualifications exams. Madeleine is also a member of the IIDA Delta Regional Chapter, working to advance the profession of Interior Design. Respected by her peers in the industry, Madeleine was voted onto the Board of Directors for IIDA Delta Regional for the 2022-2023 years.

*Mechanical, Electrical, and
Plumbing Engineering*

Moses Engineers is a New Orleans-based consulting engineering firm established in 1947. Now in its second generation of family management led by W. Howard Moses, they provide mechanical, electrical, and telecommunications engineering consulting services for a diverse range of clients. The senior design personnel are all registered professional engineers, and 70% of their technical staff are LEED Accredited Professionals. They are also certified as a Small Entrepreneurship with Louisiana's Economic Development's Hudson Initiative (Certification No. 16555).

Moses's Projects Include:

- St. John the Baptist Parish Safe Room
- St. John the Baptist Parish Safe Room – Interior Build-Out
- St. John the Baptist Parish Fire Station – Electrical Assessment
- St. John the Baptist Parish Fire Station #51
- St. John the Baptist MEP Assessments
- St. John Schools - Hurricane Ida Repairs

Structural Engineering

Schrenk Endom & Flanagan (SEF) has provided Structural Engineering services in Southeastern Louisiana and the Gulf South for over 60 years. The firm has successfully completed over 6,000 projects, with most of them located in Southeastern Louisiana. STBA and SEF Engineers have worked together on over 500 projects in Southeast Louisiana during the past 40 years.

SEF's projects include:

- Slidell Emergency Operations Command Center
- St. John the Baptist Safe Room at Emergency Operations Center
- Jefferson Parish Fire Station No. 15
- JPSO District 1 Station
- Orleans Parish Communications Building
- Louisiana Army National Guard Readiness Center
- Delgado Maritime Training Facility

Civil Engineering

Royal Engineering & Consultants (Royal) has delivered civil engineering design services to public, private, and governmental sectors. Royal offers clients a professional and knowledgeable staff of engineers, architects, planners, and support staff who are well versed in providing planning, design, and construction services for civil engineering projects. Royal provides its clients with the confidence that the execution and management of our civil projects ranging from road and bridge, water and wastewater, to structural engineering projects will be completed on time, within budget, and at the highest quality. Royal prides itself in overseeing a project from the planning stages through design and construction and regularly coordinate with local, state, and federal permitting agencies in the preliminary stages of a project to review the project scope and ensure the scope of work can be achieved within permit regulations.

Royal's projects include:

- East Jefferson Levee District Saferoom and Consolidated Facilities
- NAS JRB Visitor Control Center and Vehicle Inspection Facilities
- STBP Hurricane Isaac Recovery Program
- Lafayette Consolidated Government Polly Lane Extension

BUDGET MANAGEMENT

Throughout all phases of the project, the STBA team will monitor the scope of the design relative to the established project budget. We will accomplish this through detailed cost estimates as outlined in the Construction Specifications Institute multi-division breakdown. Our team will strive to maintain budget integrity by starting the budget management process in the earliest phase of design conceptualizations. At each stage of project development, the budget will be reviewed to correspond to the increase in detail of the project's drawings in order to further inform the Owner of the budget's status.

SCHEDULE MANAGEMENT

STBA utilizes project scheduling software (Microsoft Project) along with owner provided information to establish an initial project schedule and monitor progress throughout the design process. Task responsibilities of all parties are identified early on with milestone dates and deadlines for completion of the project's various phases. As the project progresses, the schedule will be updated regularly to reflect the current status of activities and tasks. Scheduled milestones and completion dates will be revised only after review and approval of the Owner. Schedule management for this project will be accomplished through proven project management procedures combined with a productive Design Team and ongoing schedule review process.

QUALITY CONTROL

Every team member that will be involved with this project understands that quality control is part of his or her responsibility, and high quality standards of workmanship will be established up front. Document coordination and communication is of the utmost priority in maintaining quality control. This is a continuous process and is part of each team meeting throughout the progression of the project. These team meetings will be conducted on a regularly scheduled basis and all team members are highly encouraged to attend each meeting. In a further step to ensure quality control, a separate team that has not been involved in the project will perform an interdisciplinary coordination review.

"Sizeler Thompson Brown Architects has successfully produced a variety of projects for LCMC Health, all with different budget constraints, different delivery methods and schedule constraints. They have been flexible to adapt to the individual needs of each project and have consistently delivered solutions that are attractive and achievable within our established budget."

Martin Johnson
LCMC Health

"We teamed with parish government to build this outstanding facility that allows us to increase manpower in that area and ensure faster response times..."

Sheriff Tregre

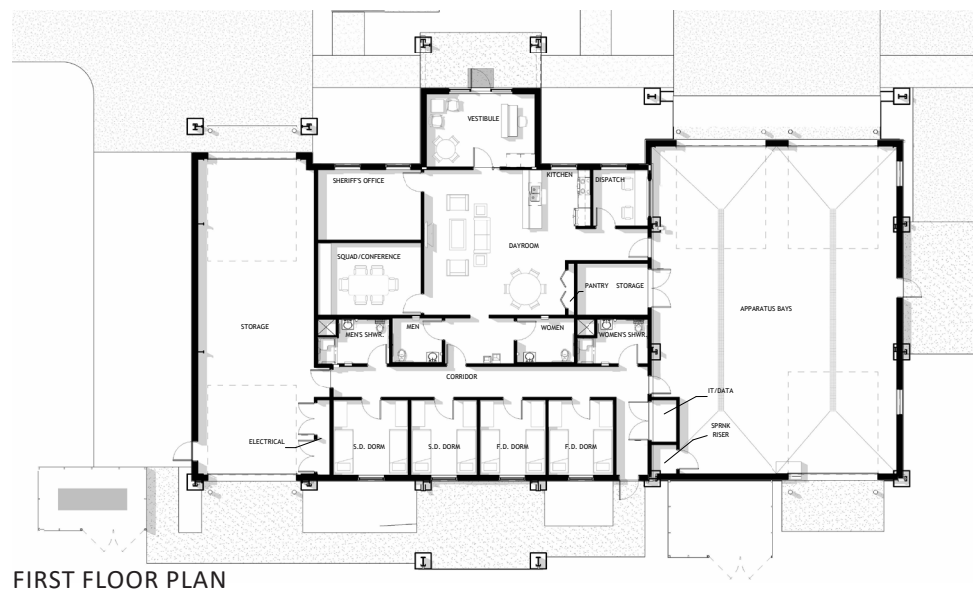

St. John the Baptist West Bank Safety Complex

Edgard, LA

This 6,000 square-foot building seamlessly integrates the St. John the Baptist Parish Sheriff's Office with the Fire Department and Dispatch Center. Featuring a distinctive metal panel construction with an exoskeleton design, the structure extends from the façade to support awnings and building signage.

Inside, the new complex includes an office for the Sheriff, a squad conference room, a dispatch office, a kitchen, a dayroom, restrooms with showers, and four dormitory rooms for the Fire Department. Additionally, it houses an apparatus bay for two fire trucks and storage rooms for boats, four-wheelers, and other search and rescue equipment.

Externally, the building offers amenities such as a dedicated parking area for a mobile command center on the western side, a covered bay for ambulances on the eastern side, and a sheltered outdoor seating area adjacent to the dormitory rooms.

St. John the Baptist Parish Fire Station #51

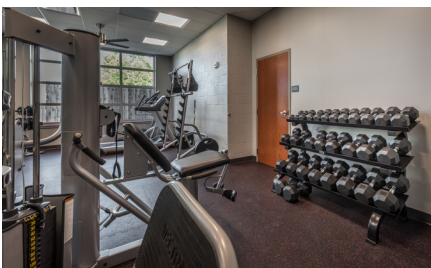

LaPlace, LA

When its original fire station needed an upgrade because of age and hurricane damage, St. John the Baptist parish engaged STBA to design a new station in the same location. The original building was demolished and replaced by the new 2-story, 10,500 sf fire station designed to the current essential facility guidelines.

The new facility includes, on the first floor, three Apparatus Bays, a Decontamination Room, a Maintenance Shop, a Recreation Room with a full kitchen, and a Fitness Center along with a Restroom with a Shower. The second floor houses four sleeping rooms equipped with task lighting and bunk beds, a day room, and support facilities. Because of the uses of the Apparatus Bays and Decontamination area, the design team worked to coordinate a Complete Vehicle Exhaust Capture System for the bays and a full exhaust to the outside of the decontamination area to segregate any contaminants in these areas from the adjacent areas used by the staff. In addition, the building was designed to receive a future admin wing.

"Sizeler Thompson Brown Architects has provided quality services and has been very receptive to the needs of St. John the Baptist Parish. I am confident that Sizeler would be an asset to your company if granted the opportunity."

St. John the Baptist Parish Essential Services Safe Room

LaPlace, LA

Sizeler Thompson Brown Architects worked with St. John the Baptist Parish to design a new hurricane rated safe room adjacent to the Emergency Operations Center building in LaPlace. The 4,200 sf building included a saferoom for essential services personnel, men's and women's restrooms, storage and an enclosed generator.

The Safe Room, designed to FEMA P361 standards for Hurricane Rated Structures, is capable of withstanding 200 MPH winds and is attached to the adjacent emergency operation center by an enclosed walkway. This allows essential personal to safely move to the Safe Room in an emergency event. The building is intended to serve as the last area of refuge in the event the Emergency Operations Center fails. In addition to withstanding high wind force, the building has underground primary electrical service and the generator is capable of operating the entire building during a storm event. The project was divided into two phases: Phase 1 focused on the building's exterior, funded through FEMA, while Phase 2 covered the interior build-out.

East Jefferson Levee District Safe Room & Consolidated Facilities

Kenner, LA

Sizeler Thompson Brown Architects was contracted to design a new safe room and consolidated facility on a site owned by the district located at the intersection of Reverend Richard Wilson Drive and Centanni Lane in Kenner, LA. The project goal was to provide a new facility consolidating the EJLD administration, police, and maintenance shop with a safe room that meets FEMA P361 and ICC 500. The building is also equipped with a dedicated fueling station and emergency vehicle storage to accommodate on-site disaster relief crews before, during, and after emergencies. The double height lobby, designed to mimic a lantern, not only brings in natural light, but also acts as a beacon, providing the building visibility during disaster situations. The building was designed to withstand increased hurricane forces.

"This new state-of-the-art facility is one of the final pieces to one of, if not, the most preeminent, outstanding, capable flood protection systems in the world."

Rick Luttich
Former Vice President
East Jefferson Levee District

St. Charles Parish Government Administration Offices

Hahnville, LA

The St. Charles Parish Courthouse was originally built in 1976 with the entire 3rd floor operating as a windowless jail. STBA worked with the Parish to transform this floor into an administrative suite for the Parish government. Both the demolition and construction phases, which were executed separately, were performed on time and within the established budget.

New windows were cut into the existing exterior walls to allow natural light into as many offices as possible. To create additional interior floor space for offices, a former open-air exercise yard was also enclosed. The new office space serves several departments and includes the office for the Parish President, a common break room, and a large executive conference room. The interior space plan was required to meet the departments' current needs while allowing space for future growth. With an emphasis on ceiling and lighting design, the interior of the new offices space speaks to the traditional finishes in the rest of the building while integrating contemporary detailing. A sophisticated color palette inspired by the Parish logo colors was used throughout.

"The Sizeler team led our efforts to turn our jail into new office space for our general government departments...The utilization of space and ability to factor in growth has been a valuable asset during the process"

VJ St. Pierre
Former St. Charles Parish
President

Jefferson Parish Fire Services Training Center Administration Building

Bridge City, LA

The one-story building is designed for the administrative offices of the Jefferson Parish Fire Department Training Center. Currently located within the main Training Education Building, the relocation of these offices and support spaces will allow several educational spaces to be created in the existing building. The new building provides leadership offices, a combined conference/classroom, staff break area and support spaces. Staff restrooms and showers are also provided, as well as the ability for the building to serve as temporary quarters during emergency periods. The building is sited to allow for visual oversight of the various permanent fire training structures at the Training Center.

AGENCY PROJECT EXPERIENCE (PUBLIC SAFETY)

- Jefferson Parish 911 Call Center and Emergency Operations Center
- LA Department of Transportation and Regional Planning Commission
- City of Slidell Emergency Operations Command Center
- East Jefferson Levee District Safe Room and Consolidated Facilities
- St. John the Baptist West Bank Safety Complex
- St. Charles Parish Government Administration Offices
- St. John the Baptist Parish Fire Station #51
- St. Tammany Fire Protection District #1
- Jefferson Parish Sheriff's Office 4th District Station
- Jefferson Parish Sheriff's Office 3rd District Station
- Jefferson Parish Sheriff's Office 2nd District Station
- Orleans Parish Sheriff's Office Intake and Processing Center
- Jefferson Parish Sheriff's Office Forensic Crime Lab
- Jefferson Parish Sheriff's Office Law Enforcement Indoor Firing Range and Offices
- Kenner City Fire Station #37
- Kenner City Fire Station #35 and Administration Complex
- Kenner City Fire Station #38 and Police Training Facility
- Boothville-Venice Fire Station
- Port Sulphur Fire Station
- Jefferson Parish Fire Department Headquarters

- St. Charles Parish Professional Services as Needed
- St. Charles Parish Public Schools Masterplan for Physical Education and Athletic Facilities
- St. Charles Parish School Board Destrehan High School Athletic Facility Renovation
- St. Charles Parish School Board Hahnville High School Team Room Building
- St. Charles Parish School Board Elementary School Fitness Stations

As evidenced by the numerous successful projects completed in the River Parishes, STBA has shown a strong commitment to the South Louisiana region and are committed to the continued enhancement of the area.

Our office has extensive experience working with all state agencies such as, State Fire Marshal, Department of Transportation and Development, and Louisiana Department of Health, among others. In addition, through our work within the region, we have become adept at working with local municipalities, regulatory agencies, and code officials. This assures that our projects are responsive to both the requirements of the State and the local jurisdictions.

UNDERSTANDING OF PROJECT/FAMILIARITY - PROJECT UNDERSTANDING

At Sizeler Thompson Brown Architects, we pride ourselves on our civic and governmental project experience. For a project such as the New Administration Building, it will be important for all areas of the building to be reviewed and discussed with the Client for their most vital functions, requirements, and infrastructure. We will begin with programming sessions with representatives of the St. John the Baptist Sheriff's Office and will confirm and identify all aspects of the project including function, aesthetics, cost, and schedule. Our past experience designing administration facilities for numerous agencies provides us with unique knowledge of requirements and necessary program elements that will help guide discussions.

PROJECT UNDERSTANDING

It is our understanding that the program for the St. John the Baptist Parish Administration building is for a 24,000 sf office building and associated site work. STBA's team has taken the time to consider the site and review some initial site regulations based on the information we have been given.

The following schemes were explored and developed with the program elements included in the RFQ and our past project knowledge. We have evaluated the benefits and disadvantages of each.

3-STORY STRUCTURE WITH PARKING ON GROUND FLOOR

SITE PLAN

SCHEME 1

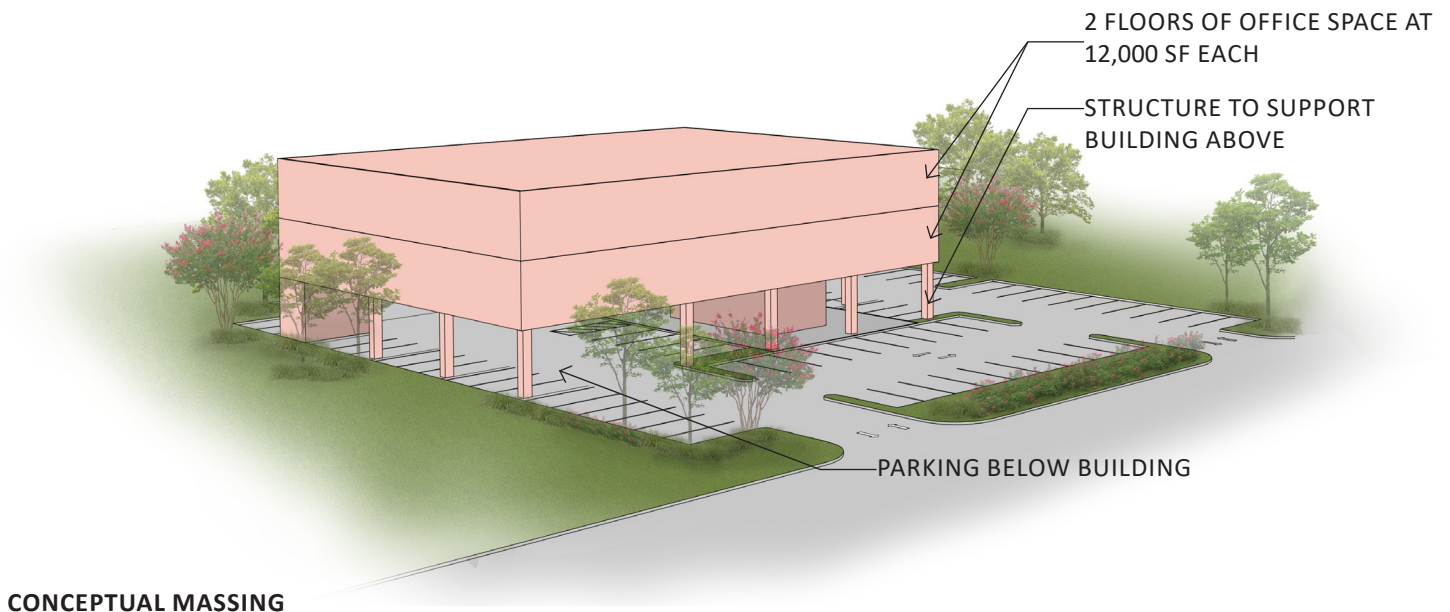

Based on the information provided and responses to questions, this scheme is for a 3-story office building with 2 floors of dedicated office space totaling 24,000 sf over a ground floor of parking. This scheme also shows the site area that would be needed assuming that parking spaces (80) would be in accordance with the SJP Zoning Ordinance for an office building. If this were calculated based on Government Office and Facilities the spaces needed would be 40, but we have shown the greater of these to be conservative and to allow for added parking needs considering the visitors that would frequent the building in addition to the every day staff.

Pros:

- This allows the building to take up less land area and allow more to remain for future development
- The building will have a more prominent appearance from the street
- Covered parking for critical vehicles and staff

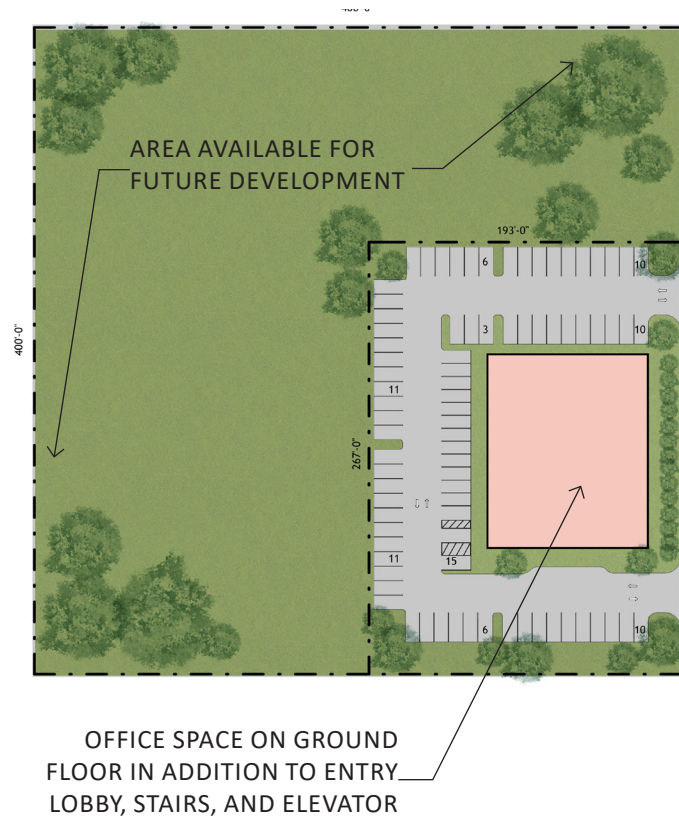

Cons:

- The building has the expense of the first floor structure and additional lobby and stair space
- Because the structure on the ground floor is exposed, it must be designed to withstand weather and impact from vehicles which will add additional cost.
- Height of ground floor must be designed to accommodate tall vehicles.

CONCEPTUAL MASSING

2-STORY BUILDING

SITE PLAN

SCHEME 2

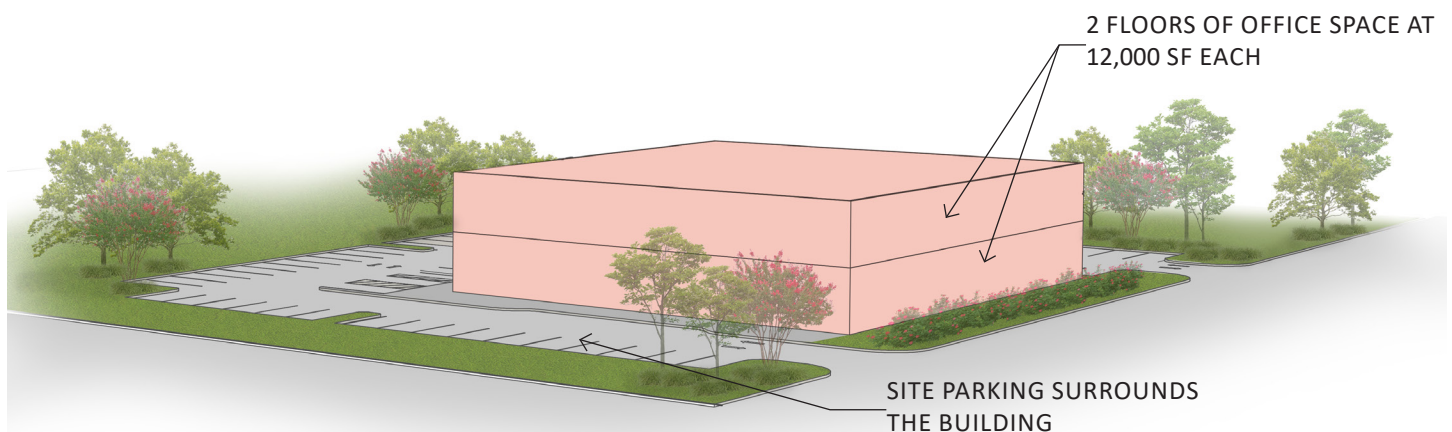

After reviewing the available site and program information, we have developed another option to allow for a more efficient building envelope that would allow for faster construction which could be a more cost effective option. This scheme also shows the site area that would be needed for this assuming that parking spaces (80) would be in accordance with the SJP Zoning Ordinance for an office building. If this were to be calculated based on Government Office and Facilities the spaces needed would be 40 as well, but we have still shown the greater of these to be conservative. This scheme alleviates the parking below the building and creates a 2-story building with 12,000 s.f. of offices on both floors.

Pros:

- This scheme has a less expensive building by avoiding building another floor of structure or an additional floor of lobby, stairs and elevator.
- Can be built in less time due to less total square footage and less site work and parking coordination

Cons:

- The site area needed for this building is greater leaving less area for future development
- The building sits less prominent on the street because it is only 2 floors

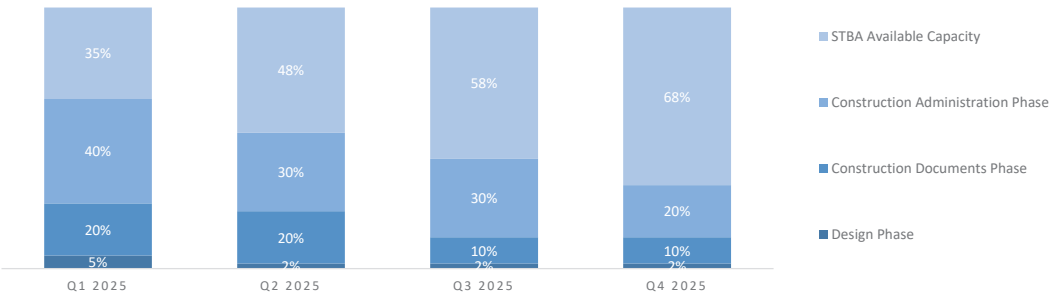

CONCEPTUAL MASSING

CURRENT WORKLOAD

Our firm’s current workload is focused on the projects listed below by current phase, as well as a workload capacity projection through the end of 2025.

Design Phase <ul style="list-style-type: none">Archbishop Chapelle H.S. Incarnate Word Hall 18,300 sf/\$8,800,000 (New Construction)WJMC MRI Renovation 1,750 sf/\$900,000 (Renovation) Construction Documents Phase <ul style="list-style-type: none">Livaudais Middle School Repairs 101,105 sf/\$2,061,275 (Storm repair)JC Ellis School Renovations 44,357 sf/\$650,000 (Storm Repair)UMC Cancer Center Renovations 8,600 sf/\$1,200,000 (Renovation)	Construction Administration <ul style="list-style-type: none">EJGH Emergency Dept. --	--

STBA CAPACITY

Our staffing method allows for multiple large projects to occur simultaneously. As evidence of our ability to complete project documentation efficiently, we offer a few recent examples. Design and construction documents for each project were completed in a timeline ranging from 8-12 months. The three projects in the first group and the three projects in the second group were all produced concurrently.

- West Jefferson Medical Center Renovations - 243,300 SF, \$75 million
- Kenner Discovery Health Sciences Academy - 125,000 sf, \$31 million
- Young Audiences Charter School - 101,000 sf, \$31 million
- Slidell Memorial Hospital Surgery Addition - 74,000 sf, \$34 million
- Jefferson Parish Juvenile Services - 11,000 sf, \$5 million
- East Jefferson General Hospital Renovations - 40,000 sf, \$30 million

The proposed project team, along with our selected consultants, are available to begin the work should STBA be selected as Architect. None of the team members’ current workload and project schedules would impact their ability to perform in a timely manner.

CLIENT SATISFACTION

At STBA, client interaction is at the heart of our design philosophy. We believe that successful architecture is not only about creating aesthetically pleasing and functional spaces but also about fostering strong, **collaborative relationships** with our clients.

We prioritize active listening and open communication throughout the entire design process. From the initial consultation to the final walk-through, we engage clients in every phase and milestone, ensuring their input shapes the outcome. This collaborative approach allows us to tailor our designs to meet specific requirements and preferences, resulting in spaces that are both functional and deeply personal. Our **commitment to customization** ensures that no two projects are alike, each one reflecting the distinct character and needs of the owners, users, and public.

Client satisfaction is our ultimate measure of success. We take pride in our **long-lasting relationships** with clients, many of whom return to us for future projects or recommend our services to others. Their testimonials and feedback highlight our dedication to exceptional service and outstanding design. A project can only be considered successful in our thoughts if the client is happy with the result.

"They did something that was truly amazing. They brought us a beautiful, incredible looking building and they brought it in on budget."

Cynthia Lee-Sheng,
Former Jefferson Parish Councilwoman, District 5
Current Jefferson Parish President

"The Kenner Discovery library is a beautiful Discovery-branded place for students to read, research, write, create, think, and collaborate. It is large and inviting with spaces to gather for meetings, clubs, and classes yet it also has many cozy nooks for small group and individual work and learning. Our design team understood what we wanted when we said the library would become the center of our school campus. It is a favorite meeting spot for students, faculty, and community members."

Patty Glaser, Ph.D.

WHY CHOOSE SIZELER THOMPSON BROWN ARCHITECTS?

At Sizer Thompson Brown Architects, we pride ourselves on our exceptional design ability and expertise in various sectors and excel in transforming existing structures into modern, functional, and aesthetically appealing spaces. Our work contributes to the long-term resilience and beauty of the communities we serve and our families live in. We are proud of our extensive portfolio of critical institutional projects that are foundational to our local communities in South Louisiana.

QUALIFICATIONS AND EXPERIENCE

We have assembled a specialized team with a strong track record for maintaining project budgets and schedules. STBA consistently delivers high-quality projects within budget constraints, balancing cost-effectiveness with design excellence.

RELEVANT EXPERIENCE

STBA is proud to have accumulated a large portfolio of civic and administrative office projects serving our local community. With past experience in St. John the Baptist Parish, our team has a notable familiarity with the Parish contributing to the overall success of our projects.

AGENCY PROJECT EXPERIENCE

We are well acquainted with the codes, policies, and procedures in the area as well as in the State due to our extensive experience in St. John the Baptist Parish and in the State of Louisiana over the years.

UNDERSTANDING OF PROJECT AND FAMILIARITY

With extensive experience designing facilities for law enforcement administrative functions, we have a deep understanding of their specialized programmatic requirements and the expertise to deliver successful outcomes. After a thorough review of this RFQ, our team prepared some preliminary development options to illustrate our understanding of the project.

CURRENT WORKLOAD

Our design studio is sufficiently staffed and has experience managing a diverse range of projects simultaneously. Based on our current workload, we are ready to start work on your project immediately.
