

## First Communications Company

St. Charles Parish Public Schools Network  
Infrastructure RFP

3-7-16

First Communications Co. is proud to present our bid with St. Charles Parish Public Schools. The solution we designed with Alcatel-Lucent products will propel your school system to the next level and beyond in the growing multi-media trend. First Communications has been partnered with Icon Voice Networks and Alcatel-Lucent for over twenty five years. We have no issues with support and have direct contact with all the executives. First Communications is a locally woman owned company based in Kenner, La. for over 34 years. The President of the company lives in Destrehan.

St. Charles Public Schools will have unprecedented support, not only from First Communications, but also from Icon Voice Networks. Our bid includes the top engineer and installers from Alcatel-Lucent to be on site when the system is configured and turned up. There will be no unknown variables out there before our system goes live.

We hope you enjoy reviewing our proposals and look forward to working with St. Charles Parish Public Schools. Alcatel-Lucent central office equipment is used in the central office for many of the cell carriers in your area. Many other switching companies in our area use Alcatel-Lucent for/or in their central office.

Sincerely,

Cory Mack  
President
