

Pediatric Universal "F" Circuit, w/o Bag, 60" Hose

Description

For animals weighing 4Kg-20Kg.

Features:

- Smaller diameter tubing with less dead space than standard uni-limb system
- Pink colored inner tubing 40"
- one 60" hose

Additional information

Weight	<i>0.5 lbs</i>
Dimensions	<i>21 x 13 x 1 in</i>
Circuit Type	<i>Pediatric Universal "F" Circuit</i>
Breathing Bag Size	<i>w/o bag</i>
Hose Length	<i>60"</i>

ELDRIDGE ANESTHESIA MASK, LARGE

DESCRIPTION

Anesthesia masks are a commonly utilized piece of equipment in veterinary clinics.

The Eldridge Anesthesia Mask addresses a common problem. A standard round mask wants to roll away from patient on a flat table. Towels are often used to brace the mask into position. The Eldridge mask is flat on one side to prevent this "rolling" and safely keep the mask in position. Patent pending.

- Used to induce gas anesthesia and sometimes maintain anesthesia in patients
- Provides oxygen therapy in patients with severe respiratory distress

Canine up to 50lbs

OD: 5" Mask Depth: 4.75" Opening: 1.75" Replacement Diaphragms: J0355ad1

Disposable Pediatric Anesthesia Circuit, w/o Bag

ITEM CODE: J0248A

Description

For use with smaller patients, this lessens the amount of dead space. Consists of two 36" breathing tubes (5/8"), inhaler "Y" piece and mask elbow. Clear color. Complete Circuit without 1-liter breathing bag.

Additional information

Weight	<i>0.2 lbs</i>
Dimensions	<i>14.5 × 13 × 1 in</i>

Single Collection Unit Prefilled CPDA-1, 250ml

ITEM CODE: J0520Q

Description

A wide range of Blood Transfusion Products allows for all species to be recipients of blood transfusion medicine. Canines tolerate standard human transfusion products. Feline patients require much smaller 50_150ml bags. Equine patients need 1_4 liter bags to do the job adequately. Blood component therapy is an expanding field. Plasma and concentrated RBCs can be separated, and specific therapeutic modalities can be implemented. The addition of transfer bags and dry collection bags make this an easy procedure.

Single Collection Unit Prefilled CPDA-1. CPDA-1 is the anticoagulant of choice in human blood banking. After collection, stored blood will have a 35-day shelf life. Bag comes with 16g diamond point non-detachable needle plus double spike ports. Single Collection Unit Prefilled CPDA-1. 250ml. Contains 35ml of CPDA-1.

NOTE: Now available in foil packaging for longer shelf life before use.

JorVet Soda Lime, 3 Lb.

Item Code: J0553

Brand: Jorvet

Specification:

JorVet Soda Lime. Carbon dioxide absorbent granules. JorVet soda lime is a high-grade granular product that effectively absorbs carbon dioxide that is produced as an anesthesia by-product. It is a mixture of calcium hydroxide $\text{Ca}(\text{OH})_2$ also known as lime plus a smaller amount of sodium hydroxide NaOH . Upon exposure to carbon dioxide CO_2 , the calcium hydroxide converts to calcium carbonate $\text{Ca}(\text{CO}_3)$. This prevents CO_2 buildup in a re-breathing circuit. The sodium hydroxide acts as a catalyst in the process. No potassium hydroxide (KOH) is present in JorVet soda lime; this helps to avoid the formation of toxic compounds such as Compound A and carbon monoxide. JorVet soda lime has a pH color change indicator that changes from white to violet when the soda lime needs to be changed. It will eventually return to its original color if not changed. Therefore, a good rule of thumb is to replace the soda lime every time the vaporizer is filled.

3lb (1.36kg) Foil lined bag.

Cat and Wildlife Glove, Medium

SKU: J0872AN Category: Diagnostic and Restraint

Unit of Measure: PR

Description:

- Designed for maximum dexterity and feel (often missing in protective gloves). Provides a very high level of penetration protection through a combination of special materials. The hand features high quality top grain elk hide completely lined with new Spectra, which is ten times stronger than Kevlar. The gauntlet's double layer of Dupont Kevlar Knit resists sharp teeth, talons and claws, covering up past the elbow.
- In addition to penetration resistance, the outstanding feature is you hardly know you have them on. Perfect for handling creatures that can not inflict crushing type bites. Excellent for cats, birds, and small animals. These gloves are NOT bite proof. Please use with caution.

DUKAL TECH-MED SILVER NITRATE APPLICATORS

ITEM CODE: TEC 7482

BRAND: DUKAL

Item Description: Applicator 6", 75% Silver Nitrate, 100/vl, 10 vl/bx
(Rx) (Item is Non-Returnable) (US Only, Excluding IN
and ND)

Supplier Item Code: 7482

NDC Item Code: TEC 7482

DESCRIPTION:

Introducing the Silver Nitrate Applicators 6" – designed for optimal use and convenience for professionals. Our applicators are made up of 75% silver nitrate and 25% potassium nitrate, giving you top-quality materials to get the job done quickly and effectively.

The plastic caustic applicator is malleable, meaning it can be bent or shaped to access hard-to-reach areas of the ear, nose, or throat without damaging its structural integrity. And thanks to our high molded temperatures production process, every silver nitrate applicator is both hygienic and splinter-free.

Make sure your medical practice has the right tools to get any job done properly – choose Silver Nitrate Applicators 6" today!

AMD MEDICOM VITAL-GAUZE MULTI-PURPOSE GAUZE SPONGES

Item Gauze Sponge, 3" x 3", 4-Ply, Non-
Description: Sterile, 200/pk

Absorbable Hemostatic Gelatin Sponge, 10mm x 10mm

Description

CuraSpon® Absorbable Hemostatic Gelatine Dental Cubes

- Hemostatic gelatine sponge
- Hemostasis in 2 – 4 minutes
- Liquefies in 2-5 days in contact with mucosa
- Absorbs at least 35 times its own weight in blood and fluids
- pH-neutral
- Can be used dry or impregnated
- Compatible with pharmaceuticals
- Shelf-life 4 years
- CE class III registered

CuraSpon® is manufactured from highly purified neutral gelatine foam of uniform fine porosity which guarantees a favourable hemostasis. The gelatine sponge activates the thrombocytes at the moment blood comes in contact with the matrix of the sponge. This causes the thrombocytes to release a series of substances which promote their aggregation at the same time as their surfaces change character, thus enabling them to act as a catalyst for the formation of the fibrin. CuraSpon® provides hemostasis in surgical procedures to control capillary, venous and small arterial bleeding when binding, suturing or other conventional methods of control are impractical or ineffective.

Exel International Scalp Vein Butterfly Sets - Scalp Vein Set, 21G x 3/4", 12" Tubing,
Green - 26704

Item Description:	Butterfly, Winged Infusion Set, 21G x ¾", 12" Tubing, 50/bx
Supplier Item Code:	26704
NDC Item Code:	EXE 26704
Unit of Measure:	BX
WEIGHT (POUNDS):	0.6000

Description

- Thin stainless steel cannula is siliconized for easy insertion
- Sterilized with ethylene oxide and ready for immediate use
- Flexible wings hold the needle in position and help to prevent inadvertent pullout
- Color-coded wings for easier identification
- Large-diameter needle permits greater flow of fluids; 12" tube length

MEDTRONIC POLYSORB™ COATED SYNTHETIC ABSORBABLE SUTURES

Composed of LACTOMER™ glycolide/lactide copolymer which is a synthetic polyester composed of glycolide and lactide derived from glycolic and lactic acids. POLYSORB™ sutures are prepared by coating the suture with a mixture of caprolactone/glycolide copolymer and calcium stearoyl lactylate. The advanced extrusion process of the molecule of LACTOMER™ 9-1, the exclusive braiding process and coating system give the suture: Excellent strength over the critical wound healing period; Excellent knot security; Excellent handling; Predictable absorption profile. POLYSORB™ sutures are indicated for use in soft tissue approximation or ligation and ophthalmic surgery, but not in cardiovascular or neural tissue.

Item Description: Suture, Reverse Cutting, Size 2-0, Violet, 30", Needle GS-11, 3/8 Circle, 3 dz/bx.
Supplier Item Code: CL816

MEDTRONIC MONOSOF™ DERMALON™ MONOFILAMENT NYLON SUTURES

MONOSOF™ monofilament nylon sutures are inert, nonabsorbable sterile surgical sutures composed of the long-chain aliphatic polymers Nylon 6 and Nylon 6.6. The advanced extrusion process of the nylon molecule gives the suture: Uniform diameter; Maximum flexibility of the strand; Excellent security with snug and flattened knots; Minimal memory; Excellent and consistent knotting strength. MONOSOF™ monofilament nylon sutures are indicated for use in general soft tissue approximation and/or ligation, including use in cardiovascular, ophthalmic and neurological surgery.

Item Description: Suture, Reverse Cutting, Size 5-0, Blue, 18", Needle C-1, 3/8 Circle, 3 dz/bx

Supplier Item Code: 8886174121

**Dressing, Non-Adherent, Latex Free (LF), Sterile, 3" x 4", 100/bx, 24
bx/cs**

Item No: HAR 48900000

Brand: Hartmann USA, Inc

Provides absorbency while remaining non-adherent to sensitive wounds. The dressing is bonded on both sides by a smooth, perforated polyester film outer surface, therefore it will not disrupt tissue healing by sticking to the wound. The inner absorbent layer is made of a polyester/rayon material. May be cut to fit various wound sizes with virtually no loose fibers.

Sterile Non Adherent Pad 2" x 3"

123

1/PK, 100 PK/BX, 12 BX/CS

Product Features

- Absorbent pad with non-stick outer facing
- Allows dressing to absorb, without adhering to the wound
- Ease of removal helps minimize trauma to the wound site
- Can be cut to fit any size wound without separating

Ultrasonic Cleaning Solution, Gallon

Item No: J0382G

Brand: Jorvet

Description

For years, Jorgensen Labs has provided the highest quality and specialized instruments needed for the veterinary profession. Now JorVet introduces a premium line of Ultrasonic Cleaners (J0382a and J0382b) and Cleaning Solutions that keep your instruments spotless for a longer lasting performance.

What is ultrasonic cleaning and how does it work?

High frequency sound waves are used to produce more than 40,000 alternating high and low pressures per second. As these waves travel through a specially formulated cleaning solution, millions of microscopic bubbles form and violently implode. This process, known as cavitation, creates a scrubbing action capable of cleaning up to 16 times more efficiently than hand scrubbing. In minutes, all body fluids and foreign particles are removed, even from the tightest grooves, cracks and interior surfaces of the instrument being cleaned.

JorVet ultrasonic cleaning systems represent the most advanced technology in ultrasonic cleaning available today.

JorVet Concentrated Cleaning Solution is non-ammoniated. This concentrated solution is designed to dilute one part concentrate to ten parts water. It is specially formulated to provide a mild yet effective solution for cleaning instruments. Properly used, it will easily remove blood and other body fluids for longer instrument life.

JorVet Ultrasonic Cleaning Solution. Gallon.
